FRIDAY FEBRUARY 26 1993

Amato wins vote but corruption investigation draws in more leaders

Italy's crisis deepens as key figures face probes

THE ever-widening investigation into corruption in Italy yesterday ures in the political and business worlds, deepening the crisis over bribes and illegal financing of political parties. Mr Giorgio La Malfa resigned as leader of the small Republican party immediately after being notified he was under investigation for alleged illicit financing of the party.

Mr Giampiero Pesenti, a top

industrialist whose group includes Italcementi, the country's largest cement company, was granted bail by Milan magistrates, pending charges of alleged corruption and illicit funding of political parties. He is alleged to have paid L7bn (\$4.5m) each to the Christian Democrats and Socialists concerning power industry contracts. Mr Lorrenzo Necci, head of the state railways, was last night also warned he was under investigation.

The three cases, although unrelated, combined to overshadow vesterday's no confidence debate in parliament. The Amato gov-

debate with the full support of the four coalition parties, head-ing off what at one stage this week threatened to be a major

The allegations against Mr La Malfa relate to some L50m received by the party from the Lombardy industrialists association, money derived from professional training courses funded by the European Community.

The corruption investigations have now acquired an unstoppable momentum. Mr La Malfa is the second party leader to be directly affected. Two weeks ago, Mr Bettino Craxi was forced to step down from the leadership of the Socialist party having received 11 warrants advising him he was under investigation for alleged corruption.

Although Mr La Malfa, aged 53, is likely to be asked to stay on as

leader of Republicans, his image has been badly damaged. He has ne out of the way to promote the Republicans, who won 4.5 per cent of the vote last April, as "the party of honest people". But the threat of losing one of the

Prime minister Giuliano Amato addresses the Italian parliament before yesterday's vote of confidence

most dynamic members of the younger generation of Italian pol-iticians underlined the way in which the corruption scandals are eroding Italy's political class.

The business class is being equally damaged now. The charges against Mr Pesenti, who is on the board of eminent Italian business groups including Flat and Mediobanca, follow the arrest on Monday of Mr Francesco Paolo Mattioli, Fiat's chief financial officer. Mr Mattioli was still being detained yesterday in a Milan jail on charges allegedly relating to pay-outs on a metro

contract.

In a grim reminder of the human tragedy involved, the body of Mr Sergio Castellari, a former director at the ministry for state shareholdings, was found yesterday near Rome. Police said he had committed sui-

Mr Castellari had been wanted for questioning over the alleged inflated price paid by ENI, the state oil concern, to Ferruzzi Montedison for the latter's 40 per cent stake in the chemical group, Enimont. His was the seventh

investigations since last June. Mr Necci was served notice of investigation for his role in the Enimont deal. At the time, he was Enimont's president.

With so many businessmen and politicians now being implicated, moves are afoot to prevent the investigation getting out of hand. Mr Giovanni Conso, justice minister, said it was urgent to find a solution which both addressed the legal problems of guilt and prevented an entire political and economic elite from disappearing.

Amato survives, Page 2

■Petrochemical investment halted ■9,000 jobs cut worldwide ■£949m exceptional charge

ICI splits in two and narrows horizons

IMPERIAL CHEMICAL Industries, the UK's manufacturing flagship since the 1920s, yesterday signalled an end to its ambitions to be one of the world's leading chemical groups.

Britain's biggest manufacturer announced it was cutting 9,000 jobs worldwide, would split in two and would cease investment in the petrochemicals and chloralkali industry.

Sir Denys Henderson, chairman, announcing the largest restructuring in UK industrial history, said ICI would split in June, creating a separately quoted company called Zeneca. Zeneca, with annual sales of about £4bn (\$5.6bn), would consist of ICI's drugs, agrochemicals and seeds, and speciality chemicals businesses. ICI shareholders wili receive one Zeneca share for each ICI share. The group's shares rose 70%p to £11.52%. Mr Ronnie Hampel, chief oper-

ating officer and the new ICI's designated chief executive, said ICI was in the middle of the lonTHE ICI DEMERGER Page 19

gest recession since the 1930s "We are restructuring ICI so it can face the future. The world is becoming ever more demanding. There will be slower growth over the next five years because of shortage of capital. We must prepare for a harsher competitive

The group announced 9,000 worldwide job losses over the next three years. About half -4,500 - will be in the Britain, representing about 10 per cent of ICI's UK's 44,000-strong workforce. About 7,000 jobs will be lost from the new ICI and about 2,000 from Zeneca. The combined groups' bead count will fail to

environment'

ICI reported a £384m pre-tax loss for the year to December 31, following an exceptional charge of £949m, including £516m for rationalisation. Sir Denys said the outcome was not satisfactory, but was in line with the experience of the company's peer group in the world chemical industry.

Sir Denys said there might be an improvement in trading conditions during the second half of the year and that both ICI and Zeneca would improve on last year's results during 1993. New ICI's operating profits fell from £324m in 1991 to £148m last year, on turnover of £8.89bn, Zeneca's trading profits dropped from

£682m to £587m. 1CI maintained the dividend at 55p, although it was paid wholly from reserves. ICI and Zeneca will each pay a dividend of 27.5p

for 1993. The split must be confirmed by an extraordinary general meeting in May. Zeneca will raise about £1.3bn through a rights issue, underwritten by S.G. Warburg and BZW. The proceeds will be used to reduce ICI's debts, pres

ently at £2.3bn. The new ICI will have net debts of £600m and

Zeneca £400m. Mr Hampel said last year's net cash outflow of £454m was unacceptable given the group's target of being cash-flow neutral. Standard & Poor's, the credit rating agency, yesterday downgraded ICI's debt from double A minus to A plus, citing the higher cyclicality and lower profitability of

the chemical operations. Mr Hampel said: "ICI in its new

form will be a performancedriven, no-frills cost-conscious entity. Non-performing activities will have to be dealt with more quickly than in the past. We

must be more ruthless

Petrochemicals and chlor-alkali production did not make sense in the long-term, explained Mr Hampel. The case for additional investment could not be made. He said the businesses would not be sold, but could be integrated into joint ventures.

EC agrees strategy for future of steelmaking

INDUSTRY MINISTERS in the European Community yesterday agreed on a broad strategy to support Europe's ailing steelmakers, but divisions emerged over which countries should bear the brunt of deep cuts in capacity. Ministers and the European Commission said it was now up to EC steelmakers to put forward concrete proposals for wideranging capacity cuts by the end of September. Except in special cases, closures - which could cost EC producers 50,000-100,000 jobs - will have to be carried out by the end of 1994. The Commission believes 30m tonnes

must be cut in crude steel, and 20m tonnes in rolled products. The Commission is expected to submit formal proposals to min-isters at their meeting in May, but Mr Martin Bangemann, EC industry commissioner, welcomed yesterday's agreement as

"a very significant step" towards the salvation of the EC industry. French and British ministers leapt to the defence of their own efficient industries. They suggested the main burden of capacity cuts would be borne by Italian, Spanish and east German industries, which they said had yet to carry out necessary

restructuring programmes. In return, Mr Giuseppe Guarino, the Italian industry minister, said Rome would not be prepared to approve an EC-wide plan, unless the Commission and member states backed his goverament's proposals for a L650bn (\$420.4m) recapitalisation of state-owned steel producer, Ilva.

Mr Claudio Aranzadi of Spain said his country was committed to its controversial plan to subsidise steelmaking in the volatile Basque country in return for capacity cuts elsewhere. The Commission has indicated that the balance between aid and cuts in Spain will have to be altered.

Mr Günther Rexrodt, German economics minister, distanced himself from German industry predictions that up to 40,000 jobs would be lost in the domestic industry, and said it was up to steelmakers themselves to decide where cuts should be made. But he admitted the German government might soon be faced with

Bundesbank urges action on east German 'solidarity pact'

By David Waller in Frankfurt

THE Bundesbank yesterday called for urgent action to conclude the long negotiations in Bonn between the government, the federal states and the opposition on a "solidarity pact" to revive the east German economy. In its most outspoken interven-

tion to date, the central bank stepped up pressure on the politicians to bury their broad differences over the size and shape of extra taxes needed to finance soaring spending in the east. "It is imperative that the phase of controversial discussions does not last much longer," said Mr

Hans Tietmeyer, Bundesbank

vice-president. "Business needs

clarity about what the whole

package of measures means, and it needs it soon." His call suggests growing con-

cern in Frankfurt at the prospect of weeks if not months of further negotiations, causing uncertainty in the financial and currency markets, and reducing the room for the Bundesbank to make further cuts in its lead interest

It came as the opposition Social Democrats in the German parliament unanimously approved proposals, including sharp increases in taxation from July 1, and excluding any cuts in social spending - in broad contradiction to the government's plans.

He warned that the scope for further tax increases was slim from an economic viewpoint, and that the burden of taxes and other contributions was already high in Germany in comparison to other

countries.
"A further substantial increase (in the tax burden) could damage the long-term competitive posi-tion of German business," he warned. On the positive side, he said wage developments this year had been a victory for good sense, referring to the 3 per cent settlement for public sector

power to force him. The debate also revealed the growing contradiction between Mr Amato's view of his government as being above party issues and the coalition partners, who believe their views should be fully repre-

Italy's 'honest party' trips up

La Malfa's plight is seen as poetic justice, writes Robert Graham

learned yesterday he was under investigation for alleged illicit financing of his Republi-can party, he had little option but to resign from the leader-

Ever since Milan magistrates hegan investigations into political corruption a year ago, Mr La Malfa has sought to present the Republicans as "the party of the honest". In May he even boasted how the party was not

Some of Mr La Malfa's critics felt his being caught in the magistrates' investigatory net was a form of poetic justice. But Italian politics risked losing - albeit temporarily - one of the few national figures capable of renovating the mortbund postwar party structure.

Son of the long-time leader of the Republicans, Mr Ugo La Malfa, the 53-year-old economist has been in the forefront of those arguing for a shake-up of the traditional party system. His open manner, clear mem-

bership of a new generation and apparent personal integrity gave him an influence out

ONCE Mr Giorgio La Maifa Republican party. His party munist Party of the Demowon just 5 per cent of the vote in last April's general elec-

fresh elections.

The party's tradition as a stronghold of the Italian liberal intelligensia and its potential as a government coalition partner gave added weight to Mr La Malfa's position.

He took over as party leader in 1987 and became the first Republican to break the postwar alliance with the ruling

cratic Left (PDS), the populist Lombard League and dissidents in the Socialist and Christian Democrat parties such as Mr Mario Segni, the referendum movement leader. In these contacts he has sought to find a new and wider majority to rule during the current transition period with the specific task of introducing electoral reforms and supervising economic austerity. A minority

Champion of party political clean-up joins those under investigation

Christian Democrats. He refused to join the seventh Andreotti government in June 1991. This was done largely out of pique because the party was not offered the portfolios of its liking. Nevertheless, Mr La Malfa was able to represent this subsequently as a policy decision - cutting free from a discredited system of coalition government.

Since then Mr La Malfa has effectively been in opposition, all proportion to the size of the flirting with the former com-

Well before his resignation

the Republicans had begun to be implicated in the ever-widening corruption scandal. In particular a former Republican appointee on the board of Enel, the national electricity authority, has begun to make a series of damaging allegations about the latter's pay-offs to political par- with a quick solution.

and to seek a new endorsement for his mandate as party leader. Then last week Mr Giorgio Meddri, former political secretary of the party and a close friend, was arrested for allegedly receiving illegal funds for the Republicans.

ties, including the Republicans.

These developments obliged Mr La Malfa to call a special

party congress on March 12 to

consider the party's involve-

ment in political corruption

It is still uncertain whether the party will accept Mr La Malfa's resignation. But in the meantime the plight of Mr La Malfa, symbolising the progressive decapitation of the Italian political class by the corrup-tion scandal, is likely to speed up discussion of ways to limit the scope of the magistrates'

Mr Giovanni Conso, who became justice minister 12 days ago, said his ministry was working on proposals to tackle the phenomenon of corruption that took account of both the legal and politico-economic considerations at stake. He said it was vital to come up

Spending power in UK below EC average

By David Gardner in Brussels

BRITISH people's real spending power fell well below the average of continental based on purchasing power Europeans in 1991, according to Eurostat, the EC statistics

office in Luxembourg.
The UK thus joined Spain, Ireland, Portugal and Greece at below the average per capita ty - but without being poor enough to get the heavy funding earmarked for these member states to enable them to catch up.

Nevertheless, the European Commission proposed on Wednesday that the Merseyside and Highlands and Islands regions of the UK be made eligible for the highest levels of EC regional aid. These are devoted to Europe's most backward areas - and put the two UK regions on a par with the south of Italy, Spain and Portugal, western Ireland and north-

Eurostat calculates that gross domestic product (GDP) per head in the UK in 1991 was 95.5 per cent of the EC average, parities. This is obtained through adjusting GDP by the ratio between prices for comparable goods in different

countries In "real" or purchasing income per head in 1991 was Ecu14,732 (\$17,383) against an BC average of Ecul5.432. Top of the list was Luxembourg at Ecu19,636 per head, followed by Germany (Ecu18,345), and France (Ecu17,250 per head). Italy as a whole was substantially above the UK at Ecul5.890 per head.

Of the four poorest countries below the average line, Spain, the best off, is well below the UK at Ecu11,964 per capita - or 77.6 per cent of the EC average - with the very poorest, Greece, at Ecu7,397, or 48

German businessmen see deeper recession this year

By Ariane Genillard in Bonn

GERMAN entrepreneurs see no prospect of a domestic economic improvement in 1993 and are instead planning further production cuts and redundancies, according to a poll of business opinion by the German chambers of com-merce and industry, the DIHT.

The survey, which takes the pulse of 20,000 companies in west Germany and more than 5,000 in the east, suggests that the number of businessmen believing the economy will slip further into recession is steadily increasing.

In western Germany, 48 per cent of entrepreneurs see the state of the economy worsening, compared with 31 per cent last autumn. Only 10 per cent of them see the future with confidence, compared with 18 per cent six months ago. Further job cuts are to be expecwith employers blaming high labour costs as the main

cause. Investment plans are to

be revised downwards and structural problems are apparent in all sectors of the economy, the report says.

The recession is widening and a spiraling economic decline cannot be ruled out any longer," Mr Franz Schoser. chief executive of DIHT, said yesterday.

recovery are pinned on economic growth in the US, a moderate growth in salaries and a further reduction in interest rates, he added.

But uncertainty over the future economic policy of the federal government is aggravating feelings of instability among business men and hampering investments. In western Germany, 43 per cent of companies are planning to invest less this year, compared with 34 per cent last autumn.

Despite the recent appreciation of the dollar against the D-Mark, more than a third of smen expect no immediate rise in their exports.

However, glimmers of hope come from eastern Germany where the mood is slightly less pessimistic. While more entrepreneurs there also believe that the overall economic situation is worsening, a third of them expect the situation in their own companies to union in Europe, has

improve. This is slightly more announced a programme of than in the last survey. assistance for the weak and The most optimism is in the trade, services and construction sectors. Food stuffs luxury and consumer goods are the targets of increased investment. In general, the level of investment is continuing to increase, showing the sustained efforts of companies to

improve productivity. The most gloomy note from the east concerns the rapid rise in wages, with some 50 per cent of all manufacturers fearing that their very survival is threatened by the drive for equalisation with the west. A fifth of say they will reduce unemployment while over half

sacrifices Economy faces painful truths, writes Christopher Brown-Humes ∕European economies right now, and it will soon be apparent that few countries are in a worse condition than

Finland. "We have lost our eastern market, our western market and our domestic market," says Mr Tarmo Valkonen, the head of forecasting at the Research institute of the Finnish Economy.

Record unemployment, massive foreign debt, international recession, huge banking losses, and the collapse of trade with the former Soviet Union are the key symptoms and causes of a crisis which has seen GDP shrink by 10 per cent over the last two years - more than it did in the depression of the

As if things were not bad enough, the Finns have had more bad news in recent days. Kansallis-Osake-Pankki, the country's leading commercial bank, has predicted negative 1993 GDP growth of 0.5 per cent, reversing last autumn's forecast of 1.5 per cent growth. The Ministry of Finance has also just scaled down its previous forecast of 2 per cent growth to zero, partly because of continuing recession in

many key export markets. 'We are in an acute crisis, the worst crisis in decades. And the recession elsewhere in Europe is making matters worse," said Mr Sixten Korkman, director-general of the Ministry of Finance.

Finland is paying the price for its over-dependence on a single export market - the former Soviet Union - and over-

reliance on one particular sector - forestry. However, it is also undergoing a painful period of read-justment after the boom years during the 1980s when the property and share markets

became grossly over-heated. A total of 18.6 per cent of the workforce is now out of work and many economists predict the figure will exceed 20 per cent before it starts to fall. The construction, manufacturing and retail.

Falling tax revenues and high unemployment pay-outs have sent debt soaring. Foreign debt will rise to FM250bn (\$42bn) this year, while net interest payments on it will

reach FM27bn. For 1993 alone the state's net borrowing requirement is esti-mated at almost FM80bn, pushing up state debt at the year end to nearly 50 per cent of GNP compared to just 16.5 per

cent at the end of 1991. The fear of further aggravating the debt burden means the centre-right coalition government has so far ruled out any package to stimulate the economy. "There is nothing to hand out, just sacrifices," said Mr liro Viinanen, the finance min-

Confirming this, the government this week announced a new FM9.3bn savings package

OMPILE a list of the ailments inflicting west ing does not exceed target.

The government is pinning all its hopes on export-led recovery, and on that score at least, there is cause for optimism. The 30 per cent drop in the value of the markka that has resulted from two devaluations over the last 16 months has led to a dramatic improvement in the competitiveness of

Finnish industry.

Last year exports grew by 9 per cent, and this year they are predicted to rise by 11 per cent. But even here, there is reason for caution, with demand weakened in the country's main export markets, such as

Germany, Sweden and the UK. The government, led by prime minister Mr Esko Aho. appears to be under no immediate threat, partly because there is no concensus about alternative courses of action. Nevertheless, business leaders

FINLAND's centre-right government yesterday voted in favour of building a fifth nuclear power plant, ending weeks of division on the Issue. The project still faces a difficult passage through parliament, with a final decision expected in May. writes Christopher Brown-Humes.

The plant would be built on the site of one of the existing power stations at Loviisa or Olkiluoto, with completion expected around the year 2000. The Finnish utilities, IVO, TVO and PEVO have already received bids from potential suppliers.

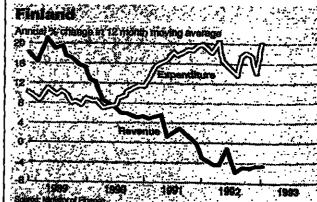

Music

have recently become uncharacteristically outspoken in their criticisms

Mr Pertti Voutilainen, the head of Kansallis-Osake-Pankki implied a lack of decisive political leadership when he said recently that he did not know the prime minister's opinions on the European Community, nuclear power policy, or the country's banking difficulties. The government was able to get FM20bn banking sector several weeks ago but not before parliament rejected a broader package which would have done more to instill confidence in the

country's financial system. The turnround in the Finnish economy should finally become apparent next year, when 2-3 per cent growth is predicted. Apart from the stimulus of higher exports, the country is now in a lower interest rate phase which is expected to lead to higher

investment. One surprising thing is that the pain has been endured with little outcry. Some put that down to the national tem-perament. "Everybody is slightly ashamed," says Mr Olli Kivinen, political columnist on Helsingin Sanomat, the leading Finnish newspaper, "They took part in the casino economy of the 1980s and now they are willing to suffer for it."

FEWER than 15 per cent of all property claims in the former East Germany have been settled, and it will take another decade to resolve the outstanding claims, officials at the federal office for

cent have been settled. Over 2m claims for houses have been registered, but only

Stix, had an agreement with Estée Lauder to set up shops in Tomsk and other Tomsk-7, its secrecy denoted by the western Siberlan cities such as Novosibirsk, Kemerovo and Novokuznetsk, Mr number, was created by Stalin in 1949 Plitsov said the US cosmetics company had sent an architect to help him design a

to help the Soviet Union make a nuclear bomb. Set in the heart of Siberian forestland, the town is still so heavily guarded that even a trip to the beach involves crossing a Russian equivalent of Checkpoint Chartie, lest intruders try

swimming across from the other side of the Tom river. It is still closed to foreigners, and even Russians from other parts of the country. Its main role is to produce enriched uranium and plutonium for nuclear weapons. A spin-off is to supply 40 per cent of the heating for the neigh-

bouring city of Tomsk. Barbed-wired gates to the town slam shut behind a bus carrying in a team from the International Finance Corporation, the World Bank's investment arm, and another set of gates bar the way ahead. A guard from Russia's internal troops checks passports.

rates, or the minimum monthly rouble wage.

The restrictions on visitors to the town will go once its remaining two military reactors are closed, Mr Yuri Krasnov, the city council chief, says, although the Russian Atomic Energy Ministry says this is unlikely to happen until the year 2000.

It says a new power plant has to be built for Tomsk and a new centre made ready to cleanse ageing plutonium which needs replacing in nuclear warheads not earmarked for destruction. The difficulties of shifting Russia's military-industrial machine mean that Tomsk-7 will continue to produce new plutonium to renew existing warheads

for the foreseeable future. The task of adjusting is especially hard for a town of 100,000 inhabitants geared to just one thing. As one IFC official put it: "Does anyone know how to restructure a closed city which

makes plutonium? Two years ago we could not even invite foreigners here," says Mr Krasnov, who keeps in his office a portrait

US message in Bosnian air-drop plan IIII conde, the energetic head of Generation Recologie, is plastered all Mr Antoline Waechter, 44, head of the Grans immediately and the Grant immediately and t

PRESIDENT Bill Clinton's plan for high attitude air-drops of relief supplies into Bosnia is intended to highlight not only his humanitarian concerns but to demonstrate a new US willingness actively to engage in European security problems.

At his press conference with

Mr John Major, the British prime minister, on Wednesday afternoon, he said he had been assured by General Colin Powell, chairman of the joint chiefs of staff, that operations could be conducted at minimal risk to US pilots.

He conceded that high altitude air-drops might not be optimally accurate, but that it was planned "to leaflet the area in advance" so that if any loads fell outside the intended balf-mile target area they could easily be located.

Mr Major again endorsed Mr Clinton's proposals in US television interviews yesterday morning and the administration thinks it is in the process of lining up enough allied support to minimise objections to

the initiative. Ms Jennone Walker, of the White House national security council, said that even if Russia could not assist in this particular operation it was admin-

istration's general policy to offer Moscow "a constructive role in European security,

including a military role.

In an address to the European Institute here, Ms Walker contrasted the new US engagement in European security issues with that of the Bush administration, which, she said, saw the unravelling of the former Yugoslavia in purely bumanitarian terms and had down-played US strategic

"The Yugoslav tragedy," she said, "illustrates that military power still matters in Europe".

She added that beyond the airdrops, "I think you will see us willing to use force again on a case-by-case basis, but in a variety of combinations." She cited possible umbrellas for action as the UN, the Conference on Security and Co-operation in Europe and Nato.

Mr Clinton had also stressed the continuing US commitment to find a negotiated settlement in Bosnia, though neither he nor Mr Major specifically endorsed the existing Vance-Owen plan dividing up the country into semi-autonomous provinces. Mr Major said he had "no view" on its merits and Mr Clinton said it might be difficult to monitor and enforce from a peacekeeping

French left discovers green bolthole

But political re-grouping spells trouble for recently formed ecologist coalition, writes Alice Rawsthorn

ASSEMBLÉE Over the NATIONALE these days. He Elections '93 is pictured breakfasting with his children for Paris-Match, cycling with his wife in Le Nouvel Observateur, and even suffing a spring

teur, and even sniffing a spring of paraley on the cover of VSD. The publicity is scarcely sur-prising. Mr Lalonde. 47, who resigned last year as socialist environment minister, is a pivotal figure in the French elec-toral campaign. Some polls total campaign. Some poils suggest that GE's alliance with the idealistic Greens could win second place, ahead of the socialists and behind the conservatives, in next month's

parliamentary elections.

Mr Lalonde is also in the limelight as a central player in the "political big bang" announced last week by Mr Michel Rocard, former premier, to create a centre-left coalition of socialists and ecologists.
Until now, Mr Lalonde has

steered an independent path, spurning the socialists' suggestions of an electoral alliance and flirting inconclusively

londe, the ener- has been much more positive

the man who appointed him to the French cabinet in 1988. Mr Antoine Waechter, 44, head of the Greens, immedi-ately rejected the Rocard proposals. Mr Lalonde praised his former boss and cordially invited him to join GE in the

The split between Mr Lalonde and Mr Waechter over the Rocard plan is the first significant sign of strain between the two ecologist parties since the start of the parliamentary campaign and could mark the return of their old rivalry. The Green party was the dominant force in French envi-

ronmentalism until Mr Lalonde formed GE in 1990. But whereas the Green party sees itself as an ideological movement, GE is a product of contemporary French politics. It is committed to environmental issues. Mr Lalonde, former head of Friends of the Earth, left the cabinet after a row over conservation. But GE is far less radical than the Green party in key areas, notably nuclear power, where it advo-

cates tighter regulation of

waste, rather than an outright

tioned it as a bolthole for socialist sympathisers who are disillusioned with their own scandal-scarred party after a decade in power, but who can not bring themselves to vote conservative. Even before the Rocard plan he made no secret of his hopes that GE would eventually be a linchpin in re-grouping of the French left.

Until recently the two ecologist parties were at logger-heads. The crunch came at last year's regional elections when they clashed in separate campaigns and won a combined 14 per cent of the vote, a significant advance on the Greens' 3.8 per cent in the 1988 parlia-mentary elections and even on their 10.6 per cent in the 1989

European elections.

Mr Waechter, well aware that other ambitious Greens, such as Ms Dominique Voynet, the 34-year-old party spokeswoman, were snapping at his heels, agreed in November to join forces with GE for the parliamentary poll.

So far the campaign has

gone smoothly. Mr Lalonde, Mr Waechter and, increasingly, Ms Voynet, have presented a united front. There have been no ideological squabbles, possibly because the emphasis of

Brice Lalonde, 47, Parislan Génération Ecologie in 1990. Previously in mainstream politics minister, Stormed out of cabinet last vear, in protest at its conservation policy. Has since centrated on GE, helped by his wife. Patricia, his ications director. Greens

campaigning has been on pos-sible liaison with the established parties, rather than on the ecologists' own policies. The ecologists have also benefited from the steady stream of scandals and gloomy eco-nomic news that has haunted the socialists. The latest polls give theecologists 15-20 per cent of the vote, leaving them thanks to idiosyncracies of the

French electoral system, with

Has to stave off threat from Génération Ecologie, and Irom within his own party.

parliamentary seats. The pollsters have not yet had a chance to gauge the impact of Mr Rocard's proposals. The ecologists are confi-dent it will give them another boost in the polls. It may well do so. But once the elections are over and Mr Rocard starts to assemble his alliance, his "political big bang" may prove just as explosive to the ecologists' coalition, as to his prime

Strikes sweep **France**

By Alice Rawsthorn in Paris

FRANCE'S beleaguered socialist government yesterday faced a barrage of strikes and demonstrations across the country from farmers, dockers, scientists and factory workers.
Militant farmers blocked the Paris-Lille motorway with tractors in protest against the fall in potato prices. The port of Dunkirk was disrupted by dockers protesting against the government's dock reorganisation scheme.

The socialists, already embarrassed by this week's violent demonstrations by fishermen and facing humiliating defeat in next month's parliamentary elections, have for some time been plagued by protests from farmers and

dockers. However the government now faces industrial action from public sector employees. The staff at the National Centre for Scientific Research in Meudon-Bellevue yesterday protested against the proposed closure of the site, which

employs 400 people.

There was also a strike at Syseca, a subsidiary of Thomson, the state-controlled electronics group, in Toulouse, in protest at job cuts.

Moslem enclaves may fall to Serbs

By Laura Silber in Belgrade

SERB forces are close to seizing control of some of the Moslem enclaves in eastern Bosnia targeted for air drops of emergency relief supplies, according to western diplomats in the Serbian capital.

They said a string of hamlets around the village of Cerska, where thousands of Moslem most vulnerable to Serb forces. The town of Srebrenica is also under threat. Diplomats say it may house as many as 70,000 people, twice its pre-war population.

Despite earlier warnings by Serb military leaders that the air drop risked spreading the war, Bosnian Serb command-ers yesterday issued an order not to shoot at US aircraft, according to Tanjug, the Belgrade news agency. The state-ment coincided with intensified preparations for the US operation. Western diplomats in Belgrade said leaflets written in Serbo-Croat describing the operation could be dropped in a matter of hours.

Meanwhile relief workers returning from the north-eastern city of Tuzla said conditions were rapidly deteriorating in the largest of a handful of government strongholds in

Bosnian military leaders said support to Tuzla is essential and pleaded for the opening of the city airfield for humanitar-

access for aid to hundreds of thousands of people," said a western diplomat.

Swamped with refugees forced from their homes by Bosnian Serb forces, Tuzla's population of 720,000 is barely coping, even though it has received 10 UN convoys in the last few months. It is not under direct attack, but it has been cut off by Croat and Serb forces. Relief workers estimates energy reserves will last six weeks.

If Tuzla is not opened up, diplomats are worried that the city will descend into chaos. Limited ground-based relief operations continued else-where in eastern Bosnia.

Irish plant

Digital to

phase out

DIGITAL Equipment, the troubled US computer maker, is closing its manufacturing facility in Galway, Ireland,

with the loss of 780 jobs. Work will be phased out over the next 12 months, the com-pany said yesterday. Its European software development and distribution headquarters in the same area, with 350 employees, will be retained.

In Dublin, Mr Ruari Quinn, minister for enterprise and employment, said the decision was "a major disappointment".

There was intense lobbying by the UK and Irish govern-ments when it seemed Digital would choose between Ayr, Scotland, or Galway for closure. The Irish government has asked the European Commis-sion informally to investigate UK government incentives, which Dublin suspects helped

to keep the Ayr plant open.

Manufacturing will also continue at South Queensferry, Scotland, where the Alpha microprocessor, said to be the fastest in the world, is made.

Mr Edward McDonough, Digital's vice-president for manufacturing, said the closure was part of a three-year restructuring programme. The Galway operations would not go to Ayr but to other Digital plants.

The decision had been made on the basis of manufacturing efficiency and not for social reasons.

Once the world's leading minicomputer manufacturer. Digital has been hit by changes in the computer industry which have cut the profit margins on computer hardware.

French bid to win UK TV accord

By Andrew Hill in Brussels

MR Dominique Strauss-Kahn, the French industry minister. said yesterday he supported plans to concentrate the EC's advanced television strategy on the development of wide screen television programmes and equipment.

Mr Strauss-Kahn, in Brussels for a meeting of EC industry ministers, said he thought such an approach might win the support of Britain, which is blocking an earlier attempt to pump Ecu500m (£414.5m) of funding into high-definition television (HDTV) over the

next five years.
France has been one of the leading advocates of an aggressive HDTV strategy, partly because Thomson, the French electronics manufacturer, has invested heavily in the original "Mac" family of HDTV stan-dards promoted by the European Commission.

Britain opposes funding because it believes the Mac standards are being overtaken by digital HDTV technology developed in the US. Mr Martin Bangemann, the EC industry commissioner,

said last week there was no need for Europe to develop its own exclusive digital HDTV standards, because European companies - including Thomson, and Philips of the Netherlands – were already bidding to produce the US technology. Mr Strauss-Kahn agreed yesterday that European companies were playing a leading role in developing digital technology, but he said digital HDTV might not arrive before 2005. Mr Bangemann has indicated that digital HDTV might be possible as early as 1997.

Ever since the earliest pioneers made their first sorties up the Kio de la Plata and desistened Argentina The country of silver', it has been a land of opportunity for travellers from every corner of the world.

la recent years, those opportunities have multiplied, both for toerists and investors in tourism.

Argenting now attracts more visitors per year than any other country in South America. In the last ten years the number of overseas visitors to Argentino has doubled. With tourism now contributing approximately 14% of total export earnings, in an economy which grew by 8.5% in 1991 and 9,0% in '92.

When you consider the sheer diversity of tourism opportunities that Argentina offers, it is easy to see the reasons for such dramatic growth. From the exciting, cosmopolitan city of Brenes Aires, to skling to the Andes, 'eco-tourism' in the Valdes Peninsula, ranch

holidays on the Pampas and beach holidays along the Atlantic coast. Argentina can offer every type of haliday in every type of climate.

Why not find out more about this brand new field in travel and tourism? And turn 'The country of silver' into gold.

To find out more about investment apportunities, or truvel & tourism products currently offered in Argentinu, contact the Consulate General of Argentina, 100 Brompton Rd., 5th Floor, London SW3 1ER. Tel: (071) 589 3104, Fax: (071) 584 7863.

Smokers may face higher taxes

By George Graham in Washington

PRESIDENT Bill Clinton warned yesterday that smokers may face higher tobacco taxes to help pay the cost of giving everyone access to healthcare.

"I think we are spending a ton of money in private insurance and government tax pay-ments to deal with the healthcare problems occasioned by health habits, particularly smoking. It's costing us a lot of money," Mr Clinton said yesterday. "You do have to find some way to recover some rev-enues to cover people who now don't have coverage."

Higher tobacco taxes are reported to figure on a list of potential ways of raising money to pay for overhauling the healthcare system, which Mrs Hillary Clinton, who heads the White House task force, is now working on, along with other "sin taxes" such as alcohol and gun levies.

The Los Angeles Times said yesterday that Mrs Clinton had ruled out the option of taxing employees on the health insurance benefits they receive from their companies, viewing this as too damaging to her hus-band's chances of being reelected president in 1996.

Mr Clinton said he had not ruled anything out, and White House officials said a number of revenue options remained under consideration. Healthcare reform is likely to save money over the long term; it is seen as essential if the federal budget deficit is to be brought into check, because health programmes such as Medicare and Medicald are the fastest-growing items of government spend-

Extending coverage to the 35m people who do not have employer-provided health insurance, but are not poor enough to qualify for Medicaid, is expected to cost anywhere from \$12bn (£8.40bn) to \$44bn a year. Costs of subsidising long-term nursing home care could drive the bill higher.

The Congressional Budget Office estimates that treating employer-paid health insurance as a taxable benefit where it exceeds a reasonable average could bring in \$113bn over five years, and would introduce stronger incentives to curb medical inflation.

Drought declared over in California

By George Graham

CALIFORNIA'S five-year drought is officially over, after last weekend's snow storms in the Sierra Nevada capped a

wet winter, bringing reservoir levels close to normal levels. Governor Pete Wilson declared the drought ended this week, but warned citizens they should not give up their water conservation measures. Officials had been reluctant to declare the drought over, for fear Californians might resume their old ways of profligate water use, but Los Angeles has received 23 inches of rain dur-

ing this winter season. But water experts warn that the ground has dried up so much since 1986, the last wet year, that it may take several years for it to be replenished.

The drought has hurt California's farmers, who account for over 60 per cent of the state's 50bn-gallon-a-day water consumption, harmed forests through insect infestation flourishing in the dry condi-tions, and ravaged fisheries. with salmon stocks particu-larly low. California has always depended on billions of gallons of water being pumped to irrigate farms, water suburban lawns and fill city bathtubs in defiance of its basically

arid conditions. Rainfall is usually low, averaging less than 10ins in San Diego, 14 in Los Angeles and 20 in San Francisco, but since 1987 it has ranged between 61 per cent and 86 per cent of

these normal levels. Reservoirs had dropped by last year to little more than half their normal levels, and the snowpack on the Sierra dwindled

Los Angeles considered building a water pipeline from Alaska, but instead rationed water supplies for 13 months during the worst of the drought, and retains curbs on watering lawns and hosing pavements. The city of Irvine installed parallel plumbing systems in some office buildings to allow "grey water" from washing to be recycled for flushing.

Britain's PM heaps praise on Clinton after Washington visit

Major confident on US relations

By Philip Stephens, Political Editor in Washington

BRITAIN'S prime minister, Mr John Major, left Washington yesterday offering lavish praise for President Bill Clinton's domestic and foreign policy agenda and voicing confidence that the arrival of a Democrat in the White House would not weaken Anglo-US relations. Reviewing his first meeting

with the new president, Mr

the clear impression that the US would not seek to re-open the so-called Blair House accords on farm trade which would be at the heart of any trade deal. He also gave a broad hint

the Gatt world trade talks. Mr

Major said he had been given

that he settled with Mr Clinton the terms under which a US

whatever" that he was committed to an early conclusion of the communities in the province, Mr Major said. The president, in the UK

view, is under intense pressure from Congress to meet his campaign pledge to take an active role in Ulster. The US political perspective is that this pressure is, by Washington standards, very modest. Nevertheless, Mr Clinton is expected to announce the

of Representatives, may be asked to lead it.

The prime minister was determined to demonstrate this week that he could establish a good relationship with Mr Clin-He summed up their meeting

with the comment: "I don't think the relationship could have been any more natural and easy than it has been,"

agreed on the priority of a the next week or so, Mr Tom with the main US and UK tele-political settlement between Foley, the speaker of the House vision networks yesterday Mr Major found himself pushed on to the defensive in defending his domestic policies in Britain. Several of the interviewers pressed him on the rising youth crime rate in the UK and on the high and rising level of unemployment. He admitted that the government had made mistakes but insisted that the policies were

in place to generate sustained

Concern at lag in filling top posts By Jurek Martin

DISCONTENT is mounting in Washington over the slowness of the White House in approving appointments to senior sub-cabinet positions in the new administration.

The concern, now being voiced by some members of the new cabinet, has been heightened this week by the admission to hospital of Mr Les Aspin, defence secretary. Yesterday. Mr William Perry. selected to be his deputy, finally appeared before Senate committee confirmation hearings, but meanwhile, the Pentagon's civilian command rests with a middle-level appointed

of President George Bush. The Justice Department is still also under hold-over Republican management pending confirmation of Ms Janet Reno as attorney-general. No other senior Justice nominations have been made, including that to the important position of solicitor-general.

Open or veiled criticism of the process has come this week from Mr Federico Pena, transportation secretary, Mr Mike Espy, agriculture secretary, and Mr Henry Cisneros, who runs the housing and urban development department.

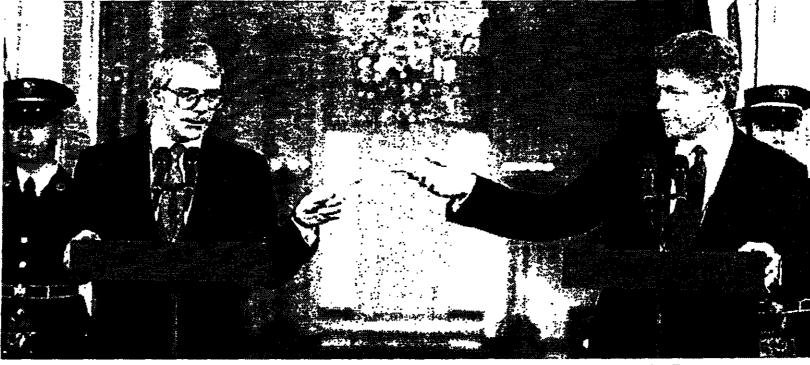

According to yesterday's New York Times, the White House has so far submitted only 30 names to fill the nearly 300 positions subject to Senate confirmation - about half the pace of the Carter and Reagan administrations at the same stage. This includes 21 nominees advanced earlier this week in an apparent attempt to deflect public criticism.

Two reasons are cited for the delay. First is the painfully slow process of background checks conducted by the White House and FBI. These have been made all the more laborious by the need to ensure there are no skeletons in the household closet, such as afflicted Ms Zoe Baird and Judge Kimber Wood, both candidates for

attorney-general The second is the White House insistence on ethnic, gender and geographic diversity in senior appointments. A list submitted by Mr Cisneros was reportedly rejected because it contained too many New Yorkers, More common complaints concern the intensity of the search for women and members of racial minori-

Meanwhile, several prospective and likely nominees are already working in their respective departments, but often on a temporary basis or as consultants without formal bureaucratic authority.

Mr Aspin was released from his four-day hospital stay yesterday, saying he was "fully recovered" from complications arising from a heart ailment and would quickly resume a full schedule at the Pentagon.

Making their points. Mr John Major (left) and President Bill Clinton gesture at each other during their joint news conference in the White House

Premier makes music in a minor key

The UK leader's visit was cordial if unexciting, writes Philip Stephens

R JOHN MAJOR came to Washington to make friends.
He left yesterday convinced that during his first encounter with President Bill Clinton he had made a

The British prime minister could not claim that his visit had stirred the excitement of a Washington establishment preoccupied with the new administration's domestic programme. For its part, the local media's interest in Britain this week has focused on the murder in Liverpool of two-year-old James Bulger rather than on the warmth of Mr Major's reception at the White House.

Nor did several hours of talks with Mr Clinton yield any diplomatic breakthroughs on the issues facing the US and Europe. The days have gone when Republican presidents and Conservative prime ministers would jointly pre-empt the decisions of their allies.

But for Mr Major the trip had a limited objective. He had to prove that he could get on with a Democratic president; that British influence in Washington had not vanished with the departure of Mr George Bush; and that Mr Clinton would not seek retribution for the help offered by the Conservatives to the Bush campaign.

The president's calculated generosity during their joint appearance at the

minds" over the need to conclude the stalled Uruguay Round of world trade talks perhaps went too far. Mr Clinton speaks still of the need for "fair" trade, a coded demand for more concessions

But the tone of the president's comments - and suggestions by US officials that extension of congressional "fasttrack" approval arrangements for any Gatt accord will be for months rather than years - reinforced the view that he does want a settlement this year. "I got no sense of a protectionism president." Mr Major said with some justice.

There were differences between the two men: over the "map" of Bosnia being proposed in the peace negotiations between the warring factions in the former Yugoslav province; over the remit for an American emissary to Northern Ireland; and over a raft of transatlantic trade disputes concerning steel, Airbus and public procurement.

The activism in international economic management which Mr Clinton expects of the Group of Seven countries may be difficult to square with the limited expectations which Mr Major has of joint action to manage demand in the world economy. But this week at least the differences remained below the surface. Mr Clinton was generous. Mr Major was mightily relieved.

NOTICE IS HEREBY GIVEN that, in accordance with the provision of the Trust Deed dated 16th December, 1980 between Nigata Engineering Co., Ltd. (the "Company") and The Bank of Tokyo Trust Company as Trustee, the Company has elected to exercise its right to, and shall, redeem on 31st March, 1993, all of its outstanding Bonds at the redemption price at par of the principal amount thereof, together with accrued interest to such date of redemption.

The payment of the redemption price and accrued interest will be made on and after 31st March, 1993 upon presentation and surrender of the Bonds, together with all coupons appertaining thereto maturing subsequent to 31st March, 1993 at the principal office in the city indicated below of any of the following Paying Agents:

Citibank, N.A., Citibank House, in London

icated below of any of the following Paying Agenus:
Citibank, N.A., Citibank House, in London
The Long-Term Credit Bank of Japan, Limited, in London
Mitsui Trust Bank (Europe) S.A., in Brussels
Banque de a Paris et des Pays-Bas, in Paris
The Dai-Ichi Kangyo Bank, Limited, in London
The Sakura Bank, Limited, in London
Morgan Guaranty Trust Company of New York, in Brussels
Dresdner Bank Aktiengesellschaft, in Frankfurt

Cound after 21st March, 1003 interest on the Rands will rease

On and after 31st March, 1993, interest on the Bonds will cease to accrue. The Bonds may be converted into shares of Common Stock of the Company at the conversion price (with Bonds taken at their principal amount translated into Japanese Yenat the rate of Yen 215.25 equals U.S. \$1) of Yen 323.70 per share of Common Stock. The certificate for the Company's Common Stock is issuable only in Units of 1,000 shares of integral multiples thereof. A cash adjustment will be paid for any fraction of a Unit.

Each bondholder who wishes to convert his Bonds should deposit his Bonds, together with all unmatured coupons, with any of the Conversion Agents being the same as the Paying Agents specified above, accompanied by a notice of conversion (the form of which notice is available from any of the Conversion Agents). SUCH CONVERSION RIGHTS WILL TERMINATE AS TO ALL BONDS AT THE CLOSE OF BUSINESS ON 31ST MARCH, 1993.

For the information of the conversion agents of the conversion agents of the conversion agents.

CLOSE OF BUSINESS ON 3131 MARCH, 1933.

For the information of the Fondholders, the reported closing price of the Common Stock of the Company on the Tokyo Stock Exchange on 19th February, 1993 was Yen 470 per share. The aggregate principal amount of bonds outstanding as of 8th February, 1993, was \$42,000.00. Dated: 26th February, 1993

Mexico pressed over TV concessions

would be to new money". US ably in most cases since

Citicorp to make new loans to Brazil

By Damian Fraser in **Mexico City**

THE Mexican government is coming under growing pres-sure to rule on the granting of concessions for 62 new local TV stations, which are reported to have gone to Televisa, Latin America's largest media company.

Award of the concessions to

Televisa would enable it to

complete its third national net-

work in Mexico, but threatens

Mexico's state-owned TV channels 7 and 13, due to take place by June. Televisa already has about 80-90 per cent of Mexico's TV audience, and further expansion would make it much harder for the buyers of the two state-owned channels to

Newspaper reports have suggested the two state channels might fetch \$500m. They would provide the only effective competition to Televisa, a self-proclaimed supporter of

MR Mickey Kantor, the US said he has asked for consultations with the EC over Airbus subsidies and intends to seek assurances that loans made to the consortiums are being repaid on schedule.

Although the Clinton administration has reassured the EC that it will hold to the bilateral Airbus agreement, reached last July, a series of public statements by both President Bill Clinton and Mr Kantor have demonstrated the administration's continuing preoccupation with Airbus, as conditions in the US aerospace industry have worsened.

In the last month the US industry has announced thousands of job losses at McDonnell Douglas, Boeing and Pratt & Whitney.

The president raised his concerns about Airbus at a lunch on Wednesday with Mr John Major, the British prime minis-

He also told Boeing workers last Monday that he hoped it was not "too late" to counter the alleged \$26bn (£18.3bn) in subsidies paid by the Airbus governments.

Announcing the consultation request in a radio interview yesterday, Mr Kantor affirmed the US right to request special consultations under the agreement, which prohibited all future production supports, including supports for sales and marketing, and limited funding for aircraft development to 33 per cent of total development costs.

The agreement also established strict terms and conditions for the repayment of development funds advanced by governments.

According to the US trade representative's office, interest rates on the funds must be set at close to market levels, which are "significantly higher than those charged in the past

. trade dispute between Japan and the US threatening

to flare up into an all-out trade

This week, officials from the US and Japan are meeting in Washington to try to avert a potentially damaging row over aviation rights which has already triggered threats and counter-threats of retaliation. At stake is a large market for Asian-Pacific air travel from Tokyo, an area expected to be one of the largest growth mar-

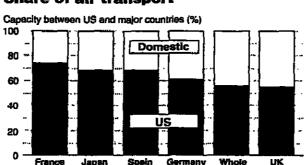

kets for the industry.
The Japanese airline industry believes that its entire international operation could be at risk and it is watching the outcome of the talks very

The current confrontation began with the refusal by Japan to allow United Airlines the US carrier, to extend its New York-Tokyo flights to Sydney. Under a bilateral aviation accord signed between the US and Japan in 1952, US carriers have what are known as beyond rights".

These give permission to carry passengers not only from the US to Japan but from there on to a third destination. United saw the Japanese

refusal as a violation of its "beyond rights" and took the matter to the US Department of Transport, which also ruled that Japan had violated the bilateral aviation accord. Japan's Ministry of Transport

Share of air transport

maintains that the flight is not an extension of the New York-Tokyo route but for all practical purposes a separate flight that is aimed at eating into the market for travel between

Japan and Australia. The two countries' aviation line with the stipulation that accord states that US airlines the primary route be between should serve primarily US-Ja-US carriers exercising

"beyond rights" to a third destination out of Tokyo should be carrying mainly US passen gers, not Japanese passengers, to that destination. However, given the extra travelling time a Tokyo stop over entails, it is highly

via Tokyo. "It is nothing less than an attempt by United to take Japanese passengers away from

unlikely that United will be

carrying mainly US passengers

cial at the Ministry of Transport. Japan is prepared to give United the go-ahead on condition that passengers from Tokyo to Sydney be restricted to less than 50 per cent. That, for the Japanese, would be in

the US and Japan. The US says that it is impossible to quantify what is meant by primary route in the avia-

rom the US point of view, Japan's refusal to grant United unrestricted "beyond rights" is an attempt unilaterally to redefine the bilateral accord in order to protect the country's airlines from international competi-

"In order to keep JAL viable, it was necessary to keep marUS industry official. The Japanese Ministry of Transport is trying to protect the Japanese market by reining in other countries' rights and restricting foreign carriers' slots at Narita Airport and at Kansai, which is scheduled to open in

1994, the US official says. Japanese officials admit to being protective of their air traffic. If US carriers, which have a much lower cost-base than the Japanese, are allowed to compete for business from Tokyo to destinations other than the US, Japan's airlines will be devastated.

"The supply-and-demand balance will be upset and we will see what the US domestic industry is seeing - excessive competition leading to prices below cost," says Mr Chikara Sugimoto, director of international affairs at JAL.

But what Japan is most concerned about is that if United is allowed unrestricted "beyond rights" to Sydney now, it could set a precedent for US airlines wanting to break into the most profitable routes Japanese airlines have:

Tokyo to Europe.
"It is a matter of life or death for Japanese airlines," says Mr Sugimoto. The dispute has led Japan to take an unusually firm stance against the US, cials promising retaliation if the US attempts to penalise Japanese carriers for the government's stance. The feeling in Tokyo is that

the US is taking excessive liberties with a bilateral accord that was signed more than 40 years ago when the aviation industry was dominated by US carriers and direct long-distance air travel was impossible. That view is shared by other countries such as Thailand and France which have abrogated their aviation

treaties with the US. The UK in 1977 renegotiated its US aviation accord. eanwhile, Australia, eanwhile, Austrana, which is also con-cerned about losing its share of travel to and from

request to Northwest Airlines to limit one of its three flights from Tokyo to Sydney to US passengers only.
The Japanese government may have to push for a renegotiation of the aviation accord, a Ministry of Transport official

said. However, as this would be politically difficult, Japan would prefer to reach agreement on how to define "pri-mary route" as stipulated in the accord.

"It is a question of interpretation and application," JAL's Mr Sugimoto says. As aviation authorities face each other across the negotiation table, retaliation may have been averted for the time being. But as similar agreements between the US and Japan have shown, a difference of interpretation is usually the most difficult gap

Hungary's motorway contract for French

By Nicholas Denton in Budapest

TRANSROUTE, the French toll-road operator, yesterday emerged ahead in the bidding to finance, build and operate Hungary's first private-sector motorway project.

Hungarian Euro-Expressway. a consortium led by Transroute internationale, won the extension of the MI motorway to the Austrian and Slovak borders, the Budapest authorities announced yesterday

Also participating in the con-sortium are Banque Nationale de Paris, the French bank, Strabag, the construction group, and OKHB and OTP, two Hungarian banks.

The European Bank for Reconstruction and Development, the London-based institution aiding eastern Europe, has also agreed to support the venture in a letter of intent concluded with Budapest. The Hungarian government is ilm iting its contribution to Ftlbn (£8.4m) for the acquisition of

land along the route. Hungary has an ambitious \$3bn programme to build two bridges across the Danube and nearly 600km of new motorway. Three consortia have already been shortlisted for a 130km extension costing \$460m (at 1992 prices) to the M5 south-eastern motorway down to the Serbian and Romanian borders. The bidders include the two finalists for the M1 tender and another group led by Bouygues, the French con-

east Asla.

The enterprise, which has an annual production capacity of 150,000 tons of sulphite and cellulose, and 6,000 tons for paper production, last year achieved a turnover of DM153m (£64.8m). Traditionally, its turnover was earned on the domestic market, but following a restructuring by the Treuhand, which cost DM46m, sales to west European countries now account for 90 per cent of turnover. Dalmia, whose activities

range from cigarette, cement and chemical production to the textile and paper industry, has agreed to invest DM70m in the company immediately, and a further DM150m in the next two years. It will also guarantee 405 of the 550 jobs for three years. Dalmia's total turnover last year was \$725m,

\$500m earned through exports. Meanwhile, the Trenhand earlier this week announced it had reprivatised, or sold back to the original owners, more than 5,750 enterprises from 13,183 restitution claims.

By Nancy Dunne

MR Jack Valenti, president of the Motion Picture Association of America, yesterday attacked the EC for "building barricades between them and us" while removing barriers between its member states.

The US government must not "cut and run" at the Uruguay Round trade talks. he said. Enraged by a number of EC directives governing broadcasting, satellites and rental

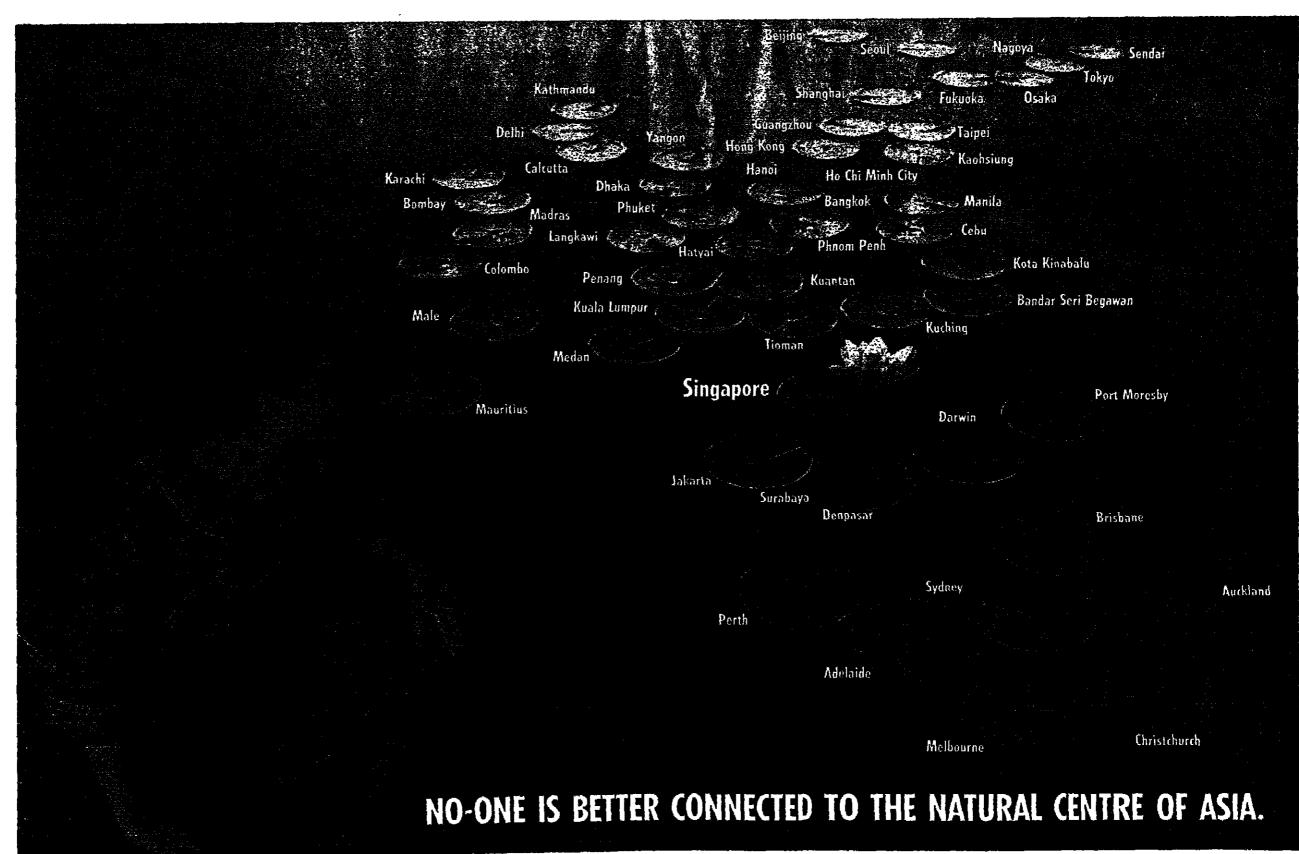

rights, he said the EC is regulating "every nook and cranny of the audio-visual landscape" to restrict US access to its

market. The colourful former aide to President Lyndon Johnson warned that without full national treatment for US films and television programmes in the EC, "we will, like Banquo's ghost, haunt the edges of the marketplace our clamours for access and equity unheeded

Re-export boost for Dubai ports

Freight traffic at Dubai's two ports, Rashid and Jebel Ali, rose by 18 per cent in 1992 to 1.48m containers, writes Mark Nicholson in Cairo.

Traffic was buoyed by a big rise in electronics re-exports to former republics of the Soviet Union. The emirate's older Port Rashid handled some 800,000 containers and Jebel Ali the remainder.

for restart of talks on colony's future

By Simon Holberton in Hong Kong

HOPES were raised last night that China would finally agree to talks with Britain about Hong Kong's political development when the colonial government issued a statement suggesting that an announcement of renewed dialogue was expected shortly.

A government spokesman said that Governor Chris Pat-ten's executive council, his top advisory body, held a special session last night at which it was decided not to gazette a bill containing Mr Patten's proposals for a broadening of mocracy in Hong Kong. He did not say when the bill would be published. On Wednesday in the legis-

lative council, the colony's law-making body, Mr Michael Sze, secretary for constitu-tional affairs, intimated that agreement to talks for the gov-ernment to postpone the publication of its legislation beyond the end of February.

Last night, the spokesman said the government would make a statement "explaining the position on this issue within the next few days." It is understood the government expects this announcement will concern a return to the talks with China.

Britain had planned to announce the start of talks last Wednesday, but Beijing falled to give the go-ahead. It is understood that Britain received a communication from the Chinese government suggesting it was nearing the end of deliberations which, for the past week, have left an

announcement in abeyance. The UK's position has been that it was willing to talk to China about the arrangements for Hong Kong's 1994-95 elec-tions without pre-conditions. China has said it would be prenared to talk on the basis of past accords and understandings, while maintaining opposition to Mr Patten's plans.

Hopes rise China continues to penetrate its future territory on the basis of publicly declared deals that mainland business and political estab. one government official: "It the late 1960s Bank of China

N June 1991, Mr T T Tsui, one of Hong Kong's new rich, was in London doling out HK\$16m to refurbish the Victoria and Albert Museum's display of Chinese antiquities. The Prince of Wales turned up for the occasion. Last week, Mr Tsui was in

Beijing for the launch of a business venture, New China Hong Kong Group, a company that plans to play the Hong Kong stock market and invest in China – this time with Mr Li Peng, China's prime minister, in attendance. Mr Tsui's impeccable politi-

cal connections are topped only by his ability to entice many of Hong Kong's leading businessmen to invest in his company. Mr Li Ka-shing, one of the colony's wealthiest men, Mr Stanley Ho, Macao's casino king, and Mr Lim Por Yen, chairman of Lai Sun, a large property developer are but three of the colony's personalities who have contributed to the company's paid up capital lishment have taken more than a passing interest in Mr Tsui's new company. But their main concern is with the list of mainland Chinese investors and one in particular, the Hong Kong and Macao Affairs Office of the State Council (cabinet), HKMAO. This is China's top policy-making body on Hong Kong and reports directly to

has been vividly demonstrated China Merchants, China that a mere statement from HKMAO can affect the Hong Kong stock market and indeed individual stocks. If Hone Kong people thought that an important agency of the Chinese government had a financial interest in its policy statements then they would be very concerned indeed."

There is concern over the growing number of Chinese investors in Hong Kong and their interests, writes Simon Holberton

the prime minister; it is widely believed to lead the mainland investors who control about 32.5 per cent of New China

Hong Kong's capital.
The Hong Kong government watches New China closely but is powerless to act. The Securiries and Futures Commission. the colony's financial watchdog, vets management compeice, not ownership.

Conflict of Interest is the main concern. According to

This view has been echoed by merchant bankers and stock

brokers in the colony. However, western diplomatic observers of Hong Kong take a less alarmist view of the company. Says one: "It possibly does give them an advantage, but I don't think they are ready to compete with some of the more rapacious personalities in Hong Kong." China has always had a pres-

years ago. Wan said that China would co-opt Hong Kong's leading businessmen by offering them political status as a reward for fostering Hong Kong's economic development. "After a certain period of time Hong Kong's economic system would be absorbed into China's. As a special economic zone, Hong Kong's economy would not be allowed to develop independently for ever."

Ghosts of gold and dollars take to the streets of Beijing

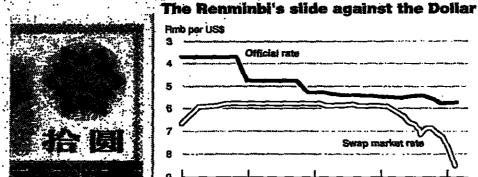

Demand is ballooning for hedges against any further devaluations in China's currency, writes Tony Walker

Beiling newspaper this week told its readers The two ghosts were wandering the city's streets - gold

and US dollars. This was a reference to ballooning Chinese demand for the two commodities as a hedge against the continued depreciation of China's currency, the Renminbi, amid persistent rumours of a further sharp devaluation.

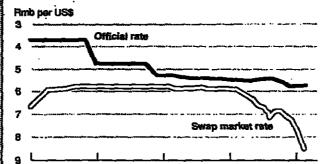

The Beijing Youth Daily reported that in the six weeks to mid-February, the city's main department store sold some RMB4.47m (£542,253)-worth of gold jewellery, double the amount for the whole of

Chinese officials this week signalled alarm at the continuing pressure on the currency, although it was unclear whether this was genuine or connected with the presence in Beiling of a team from the Office of the US Special Trade Representative - the first high-level US delegation to

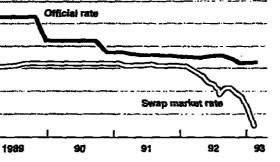

visit China since the change of administration in January. The US, whose trade deficit with China last year reached \$18bn, does not want a further depreciation of the Renminhi as this would make Chinese exports even more competitive

US officials have even been hinting that support for China's plans to rejoin the General Agreement on Tariffs and

Trade may be conditional on it on "subsidised" foreign stabilising its exchange rate. Chinese officials have pledged to move gradually towards a unified rate based on the "market value" of the Renminbi, but foreign bankers in Beijing are sceptical that a single market rate is possible

Many of China's faltering state enterprises are dependent

exchange allocations for imports of raw materials and Under China's foreign

exchange system, there are broadly two rates: an administered "official" rate used largely for trade transactions under the state plan, and a more market-based rate determined in the 100 or so foreign

exchange "swap" centres throughout the country where approved enterprises are allowed to buy and sell.

Some 80 per cent of foreign exchange transactions are conducted through these centres. There is also a street "black market" in many Chinese cities. Rates on the street shadow those in the swap cen-

by an overheated economy, Since December, 1989, Chiaccompanied by a surge in na's official "administered" imports and pressure on the rate has depreciated by more Renminbi, it was unlikely they than 60 per cent against the US dollar, due to several devaluawould be stampeded into hasty tions and a managed float of the Renminbl. At one stage, Thina's trade surplus the difference between official

reached about \$5.5bn in 1992, its foreign and market rates was reduced to about 8 per cent, but in the latter part of 1992, as China's exchange reserves remain healthy at about \$50bn, and It economic boom and consecontinued to trade strongly quent demand for imports gathered pace, the gap widened through the first months of this year. "Maybe they will be dramatically, with the differenhappy to sit back and do littial this week standing at about 30 per cent. With China's economy contle," said a western official. That may prove to be the case, although a further widentinuing to grow at a rate exceeding 12 per cent, there

ing in the gap between the official and market rates would almost certainly test the nerve of Chinese central bankers. China's plans gradually to unify its dual exchange rate system and bring about at least partial convertibility of its currency have been set jing say that although Chinese officials are worried about back. push to restart Mideast talks

By Mark Nicholson in Cairo

MR Warren Christopher, US secretary of state, said yesterday he was ready to invite Arab and Israeli delegations to resume stalled Middle East peace talks in April, adding that his tour of the region made him "confident enough" that all parties were willing to return to the negotiations.

Mr Christopher's statement, made in Geneva after his departure yesterday from Jerusalem, came as senior Palestin-ian leaders said a US proposal to break the deadlock over 396 Palestinian deportees held the "elements to a solution" to the issue which has blocked the resumption of talks.

There is no indication yet whether the American proposals are acceptable to the Israeli government which prior to Mr Christopher's visit had appeared to rule out any further concessions on the depor-

The revival of full bilateral peace talks by April would be deemed a successful conclusion to a tour which Mr Christopher and his aides billed in advance as principally a chance for the new secretary of state to meet the main players and listen to the issues.

But in spite of continued US insistence that Mr Christopher carried no fresh proposals to break the deadlock which has encased the talks since Israel's deportation in mid-December

of alleged activists belonging to the Hamas Islamic move ment, American diplomats have been quietly packaging a possible compromise.

Palestine Liberation Organisation officials in Tunis said yesterday that the US had proposed that Israel should accelerate the repatriation of the deportees and issue assurances that it would not resort to further expulsions in future.

Israel has previously stood by an earlier offer, made in consultation with the US, to repatriate 101 deportees immediately, and the rest within a year. Palestinian delegates rejected the offer, calling for Israel to implement United Nations Security Council resolution 799, which demands the return of all 396 immediately. While the Palestinian delega-

tion to the talks has not yet committed themselves to returning to the table, they issued a statement from Jerusalem yesterday saying that discussions on the US proposal were continuing and that they hoped to "solve outstanding issues in the near future."

Senior Palestinian officials in Cairo said talks on the proposal would continue quietly through "diplomatic channels' and that no formal acceptance of a compromise offer on the deportees was likely before Mr Yitzhak Rabin, the Israeli prime minister, travels to Washington to meet President

Christopher in Indian security forces thwart BJP mass rally

By Stefan Wagstyl in New Delhi

INDIAN security forces yesterday thwarted an attempt by militant Hindus to hold a banned mass rally in New Delhi, at the cost of bringing the capital to a virtual stand-

Some 80,000 police and troops kept demonstrators out of the city centre, forcing thousands of protesters to gather instead at five points where they staged noisy rallies and fought running battles with security forces for much of the day.

Thousands of protesters were detained, including Mr L.K Advani and other leaders of the Bharatiya Janata Party, the right-wing Hindu party which organised the rally. The BJP said 50 demonstrators were injured, among them Mr M.M Joshi, the party president, who was taken to hospital with

The BJP claimed success in having forced the government to deploy so many police and troops. Mr Advani said the government had gone "berserk" and had "let loose a reign of terror" in the city. The BJP said 100,000 supporters had taken to the streets, though the figure was difficult to substantiate. Crowds at the biggest rallying point, in the BJP stronghold of Rajinder Nagar, numbered no more than 10,000.

The ruling Congress (I) party blamed the BJP for the disruption and said the rally had been a "complete failure and a flop". It said the rally had been banned because of the threat to public order. Although the BJP had promised to stage a peace-

ful event, the government is lifting bans on Hindu militant wary after its supporters stormed the Ayodhya mosque last December and set off nationwide inter-religious vio-

The BJP staged the demonstration to press demands for organisations proscribed after the Ayodhya incident, including the RSS, a shadowy group from which many of the BJP's own cadres are drawn. The

BJP wants elections in the four

states in which BJP-controlled

after the mosque's destruction. and are also seeking a general

It is not clear how much yesterday's protests will have advanced the BJP's cause. Some New Delhi residents

blamed the party for disrupting their daily lives, but others condemned the government. BJP officials plan to decide

their next step today.

The rally showed the BJP's organisational power and the dedication of its supporters. Because of the government ban, supporters had to smuggle their way into the city in ones and twos, then keep a low profile until yesterday. They were housed and fed for up to five days by party supporters in the capital. Among these was Mr Ramesh Babu, owner of a small bookbinding business, who said 25 people slept in his home. "I was proud to do it," said Mr Babu, who attended

The demonstrators travelled from as far away as Kerala, in the southern tip of India. They were young and old, with a strong middle-class element -including a tax consultant from Madras, a marine engineer from Bombay and a law-yer from Rajasthan. Their common wish was to give India a greater sense of identity as a Hindu nation. They said this meant removing privileges given to India's Moslems, notably the right to observe Islamic civil laws.

Harking on a standard BJP theme, Mr Babu added that India's Moslems could not be fully trusted because they

Kohl visit | Unita in to Japan may herald attack on closer ties

By Charles Leadbeater in Tokyo

JAPAN aims to initiate an extension of its political ties with Germany through talks over the next few days between Chancellor Helmut Chancellor Kohl's visit which starts today could mark the start of a shift of emphasis

in Japan's policies towards Foreign ministry officials

stress bilateral relations between Japan and the UK will not be affected by the more active approach Tokyo is taking towards Germany. However, the plan to estab-

lish a broader political dialogue with Bonn marks a recognition in Tokyo that the future of Japan's relations with the EC as well as its involvement in eastern Europe will largely turn on its rela-

tions with Germany.

Foreign ministry officials said it was significant that the Tokyo talks would not simply focus on economic and trade questions, but would extend across a wide range of interna-

tional issues. Chancellor Kohl and Mr Kiichi Miyazawa, the Japanese prime minister, are expected to launch a bilateral discussion forum as the immediate focus for efforts to strengthen

Such a move by the Japanese government is expected to encourage private sector initiatives to strengthen bilat-

eral ties.
The talks are likely to focus on trade issues, particularly Japan's growing surplus and market-opening measures in Janan. as well as the promotion of foreign investment in

eastern Germany. Chancellor Kohl is likely to call for more Japanese aid to the former Soviet Union and to suggest Japan should invite President Yeltsin of Russia as an observer to the world summit in Tokyo in July.

Senior officials at the finance ministry and the foreign ministry are in favour of more aid, but this is strongly opposed by senior figures within the ruling Liberal Dem-

ocratic Party. The two leaders will also discuss possible revisions to the United Nations charter which could increase their influence within the organisation. Before his arrival in Japan, Mr Kohl made it clear he supports Japan's claim for a permanent seat on the UN security council.

• Mr Kohl yesterday backed an Indonesian initiative to improve dialogue between industrialised and developing nations, adds William Keeling in Jakarta.

His support, however, may not guarantee an invitation for President Subarto to attend the G7 Tokyo summit in July as requested by Jak-

continued Huambo

THE central Angolan city of Huambo was under constant shelling yesterday and the streets were full of decomposing bodies from fighting between government troops and the rebel Unita movement. write Michael Holman in Lon-

and Reuter in Luanda In one of the first eyewitness accounts from Huambo, Angolan journalist William Tonet, trapped in the besieged city since early January, said the residents were in danger from Unita shelling whether they stayed at home or went out in the streets to look for food. He estimated that 10,000 to 13,000 people had been killed there.

A report published in London today says neither the MPLA government nor Unita can win an outright military victory. Compiled by the Economist Intelligence Unit, the report concludes that both sides will ultimately be

"obliged to compromise."

It says that the resumption of the peace process will require a larger role for the United Nations. The UN has been monitoring the 1991 agreement which paved the way for multi-party democracy.

Oil, diamonds and other minerals, and an abundance of arable land, make Angola one of Africa's most richly endowed countries: "If Angola enjoyed political stability and good management, its economy should prosper".

South Korea president sets goals

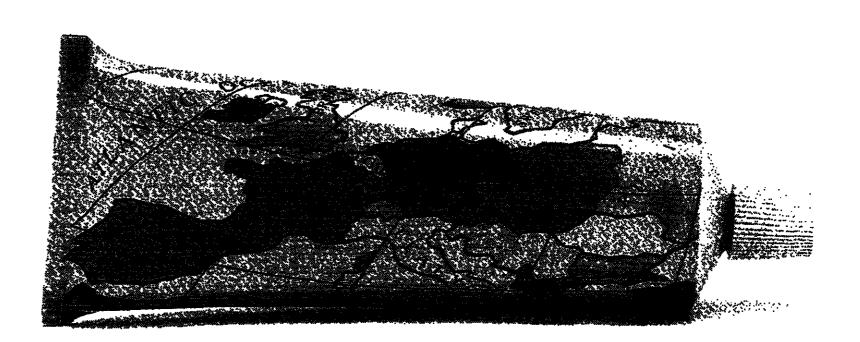

MR KIM YOUNG-SAM, who was inaugurated yesterday as South Korea's seventh president, said the main goals of his administration would be to deregulate the economy, eliminate corruption, and reverse a declining work ethic, writes John Burton in Seoul.

He also offered to meet Mr Kim Il-sung, the North Korean president, "at any time and any place" to discuss unification in what would be the first summit conference between the leaders of the two Koreas.

The 65-year-old former dissident leader declared in his inaugural address that his goveroment, the first civilian administration in 32 years, would build a "New Korea."

Mr Kim said South Korea threatened to "become bogged down at the threshold of the developed world" after achieving considerable economic progress in the post-war era. He blamed the country's problems on a declining work ethic and its centralised eco-

Car guidance system to get Scottish trial

Correspondent

SCOTLAND could become the first part of Britain where cars are fitted with guidance systems to help motorists find the best routes to their destinations and provide instant warn-ing of traffic jams.

The introduction of in-car guidance systems would follow the upgrading and expansion of traffic management systems for roads in the greater Glasgow area and north and south of the Forth estuary, including

Lord James Douglas Hamilton, the Scottish Office roads minister, is expected today to reveal the four companies which have been shortlisted to bid for the upgrading of the two existing traffic management systems, the first stage of which will cost about £12m and

eventually total £33m. The new traffic management systems will measure traffic flows more accurately by means of electronic detectors under the roads. The information will be fed to a central computer and information about unexpected hold-ups and suggested alternative routes

side indicator boards. It will also be fed to local radio stations for instant broadcast to cars able to receive dedicated traffic information.

The information received by the central computer can also be used to support in-car guidance systems. Motorists will be able to install receivers which, by means of displays or voice simulators, will alert them to traffic hold-ups and suggest

alternative routes The Scottish Office will today issue a consultation document detailing how in-car guidance systems can be intro-duced in Scotland on a commercial basis. The names of the four companies which have been pre-selected from 20 applicants to tender for the project are thought likely to include

The traffic management system is likely to be operating by late 1994. Scotland's lead may be partly due to its relatively simple administrative structure, with the Scottish secretary having responsibility for roads, local government and the police, which in England

PowerGen seeks £140m to keep coal stocks

POWERGEN, one of the UK's two largest electricity generators, is seeking compensation of more than £140m (\$200m) over five years in return for agreeing to government requests that it keep coal stocks at existing levels to help preserve some of the UK's threatened 31 pits.

PowerGen's stance suggests the government package to save pits will cost considerably more than \$500m - the subsidy the state-owned British Coal is estimated to need to sell at world coal prices.

The power plant capacity of National Power, the other generator for England and Wales is 50 per cent larger than PowerGen's and, if anything was conceded to its rival would presumably demand half

as much again.

Both companies' stocks are higher than anticipated at privatisation three years ago because of the recession, competition from nuclear power plants and a warm winter. Both were committed to buying coal on three-year contracts which end next month but are now switching to use

BRITISH COMPETITION POLICY

Heseltine overrides fair trading regulator

By John Willman, Public Policy Editor

THE DECISION by Mr Michael Heseltine, trade and industry secretary, not to refer the acquisition by Airtours of the Owners Abroad Group to the Monopolies and Mergers Commission has alarmed and surprised specialists in competition law in the UK.

It is the second time in two weeks that Mr Heseltine has overridden a recommendation from Sir Bryan Carsberg, the director-general of fair trading, to refer a merger to the com-Earlier this month, he

rejected advice to refer a merger of the infra-red defence components businesses of GEC and Philips Electronics.

Until this year, the director-general's advice to refer a been overridden on only 11 occasions since the arrangements for such referrals were

put in place in 1973. Mr Heseltine appears more willing than many of his prede-cessors to second-guess the director-general, who is the competition regulator.

More puzzling to observers,

however, are the grounds on which Mr Heseltine is believed to have made his decision. It appears he felt that the case for referral on competition grounds was "finely balanced" based on the following factors: The large number of compet itors in the package tour busi-

 The ease of entry for compa nies wishing to enter the mar-

panies' market share can change in the industry. In taking these reasons into account, Mr Heseltine has chalthat the merger would reduce competition in the package tours market. Sir Bryan will have reached his recon tion only after detailed analysis of the package tour market. Mr Stephen Locke, director mended referral.

of the Policy Unit at the Consumers' Association, described the decision as "haffling": "The substantive issues may have been finely anced but the case for refe ring the merger to the MMC to review them was not." Mr Heseltine gave similar

reasons earlier in the month when he rejected referral of the erger of the GEC and Philips Electronics businesses. He felt the competition issues were not sufficient to justify a refer-

GM raises output by 23% as Ford and Rover decline

By Kevin Done, Motor industry Correspondent

GENERAL MOTORS of the US. the world's largest vehicle maker, increased its vehicle output in the UK by 23.1 per cent last year to 350,914 from 285,129 in 1991.

Car production by Vauxball. GM's main UK subsidiary, increased by 12.6 per cent to a record 287,884, according to figures released by the Society of Motor Manufacturers and Traders. GM began engine production in the UK again last year for the first time since the early 1980s at a £190m V6 engine plant at Ellesmere Port,

Cheshire. The main setback suffered by GM in the UK was at Group Lotos, the heavily loss-making specialist sports car maker and ngineering consultancy. Lotus output fell by 69 per cent to 691 from 2,240 a year earlier following the end of production of the new Elan sports car range.

the disposal of all or parts of

Ford of the US remained the leading vehicle producer in Britain despite a 2.2 per cent fall in output to 474,123 from 484,639 in 1991. A 10.9 per cent fall in Ford's UK car output (excluding Jaguar) to 302,416 under the impact of extensive short-time working in the second half of last year was partly offset by a 24 per cent rise in commercial vehicle output.

Rover, a subsidiary of British Aerospace, suffered a 4.8 per cent fall in vehicle output to 399,661 from 419,907 a year earlier, although it was narrowly the leading carmaker in the UK ahead of the Ford group.

Total UK car output rose by 4.4 per cent last year to 1,219,880. Lower production by Rover, Ford and Peugeot was offset by the rapid build-up of production by Nissan, the Japanese carmaker, which raised output at its Sunderland, Type and Wear, plant by 44 per cent

Big growth UK employers back revival hopes despite news of 13,400 job losses

Major sees end to recession

By Peter Marsh,Peter Norman and Kevin Done

MR JOHN MAJOR, the prime minister, insisted yesterday that Britain was emerging out of recession despite one of the leakest days on record for job loss announcements.

Mr Major's view appeared to be supported by a survey from the Confederation of British Industry, the employers' organ-isation, suggesting manufacturers may be starting to reap the benefit of sterling's devaluation and lower interest rates.

ICI announcement of 4,500 job cuts was followed by 2,400 job losses at British Gas and 6.500 redundancies in the British army under the second phase of the Options for

reform package.
In Washington, Mr Major

said, after meeting President Clinton, Britain was moving out of recession. He blamed the recession's "painful kick-back" for yesterday's job losses. However, Mr Robin Cook,

the opposition Labour party trade spokesman warned that it was "a serious possibility that within this parliament the government could end up with more people out of work than are employed in manufactur-

ing industry."
Mr Ian McAllister, chairman of Ford of Britain, called yesterday on the government to develop urgently an industrial policy to restore the UK's economic strength and re-establish its competitive position.

vative governments for "side-stepping" the issue of industrial policy during the 1980s. It was a "myth" that services could generate the wealth the country needed to survive, he

Declining economic activity in Germany and France and fears that recession will spread to other continental European are set to dominate informal discussions of the Group of Seven finance ministers in London tomorrow. But Mr Norman Lamont, the

UK chancellor of the exchequer and host of the meeting, will underline that Britain has done enough by way of fiscal stimulus and lower interest rates to return its economy to growth.

Britain in brief

subsidies

Mr Brian Pearse, chief executive of Midland Bank, last night called for the government to subsidise banks to provide loans to small busises, and to give tax breaks to individuals to provide new forms of equity finance.

It is the first time a bank chief executive has publicly indicated that losses suffered by banks on small business lending may lead to them lim-iting their exposure to small companies unless they receive public subsidies.

Mr Pearce admitted that banks had sometimes "pulled the rug too soon" from under struggling small companies. But he said tax incentives were needed because otherwise the return on equity capital for small businesses was not high enough.

Ambulance system flawed

The government faced political embarrassment over a report cataloguing repeated examples of flawed management leading to the collapse of the London Ambulance Service (LAS) com-

Mr Jim Harris resigned as chairman of the LAS board when the report was published and Labour MPs called on Mr Tom Sackville, the junior health minister responsible for the ambulance service, to join

him in resignation.

Mrs Virginia Bottomley. health secretary, has given health authority officials a month to produce arrangements for better accountability in the service.

Army defends redundancies

and fraudulently injected

made compulsorily redundant in its latest round of job cuts. "We honestly could not exclude someone simply because he happened to be serving somewhere on February 25," General Sir David Ramsbotham, the adjutant general, responsible for army personnel, said after strong criticism of the move from opposition MPs.

Eight officers currently in Bosnia and Croatia were among those told by their com-manding officers yesterday that they had to leave the army, in addition to nine whose applications for voluntary redundancy were accepted. A further 80 noncommissioned soldiers in former Yugoslavia are also being made redundant.

Boost in unit trust sales

The unit trust industry had its best month for more than two years in January, with net sales of £505m pushing funds under management to a record high of £66.1bn.

The sector is benefiting from the recent highs in the UK stock market and from the fall in base rates, which has forced savers to consider alternatives to the building society. The effect of the 1987 stock market crash has now dropped out of five year performance statistics, which regulations require unit trusts to show investors.

Fraud charges cut back

Fraud charges faced by Mr Roger Levitt and three other former directors of the Levitt Group, the collapsed financial services company, have been drastically cut back by the trial judge, Mr Justice Laws. Mr Levitt, along with Mr Mark Reed, Mr Alan McNamara and Mr Robert Price,

will face just one charge of fraudulent trading contrary to Section 458 of the Company's Act when their trial begins in After his arrest, Mr Levitt

was charged with 62 offences. This was later reduced to 22. The remaining joint charge denied by all four defendants alleges they fraudulently produced and distributed false accounts about Levitt Group

Opera seeks finance chief

The Royal Opera House Covent Garden is seeking a Director of Finance and Resources. The person appointed will have a broader role than the current Director of Finance, Mr Philip Jones, who, after illness, will stay on with Covent Garden in another senior post, perhaps concerned with the projected re-development programme.

The Royal Opera House denied that the new position is its reaction to last year's critical Arts Council review of its workings, headed by Baroness Warnock, which advised that Covent Garden should be "financially led", rather than "artistically led". A fall in box office revenue caused by the recession will mean that the Royal Opera House will add this year to its accumulated deficit of around 12.5m.

Audit merger considered

The UK's six principal profescanvassing their members' views on increased cooperation which could ultimately lead to a series of mergers. An independent market research organisation has been

hired to question accountants about a range of options on "rationalisation" which would include reducing the current number of different bodies.

M0 increase

M0, the narrow measure of the money supply, rose in the year to the end of this month by about 4.2 per cent, above its target range of 4 per cent for the second month running. according to estimates based on Bank of England figures.

Meetings on bus strike

wooden oar looks more than a little incongruous leaning against the wall in Lthe glass, chrome and leather office of Audi's new chair-

But Franz-Josef Kortúm, 42, sets great store by the welcoming gift presented to him by Ferdinand Piech, who moved out in January to take the wheel at Volkswagen, Audi's lacklustre parent.

It is a symbolic reminder of the responsibilities of a steersman, says Kortum. But it also has what amounts to an explicit directive burnt into the blade: "Audi, the most attractive European in the world market."

Piech's parting homily lacks the appeal of the brand's world-re-nowned "Vorsprung durch Technik" slogan, but then the author is an engineer, not a copywriter. Kortum, by contrast, is a salesman, hardened on the forecourts of the family motor business, tempted away from Mercedes-Benz last May to take charge of Audi's new mar-keting division and promptly bumped up to the top job in Volks-

wagen's showpiece subsidiary. His arrival from relative obscurity outside the closed circuit of Volkswagen management, his youth and his business background provide ample fuel for speculation on Piēch's mould-breaking intentions within VW's hide-bound central bureaucracy in Wolfsburg.

Despite the apparent risks of appointing a young unknown, the clues Piech left behind at Audi show the new group chairman is no gambler. He prepared the ground meticulously before handing over. Plans to extend the model range with a new Clagship V8 car at the top and a cheaper model to slot in below the popular Audi 80 at the bottom - were already well advanced at the time of his departure. A dedicated marketing division, separate from that of VW, was established a year ago. Since then Plech has replaced

most of the old hands at the Audi heim. Most recently, he poached a production director, 48-year-old Jürgen Gebhardt, from his job as manager of General Motors' brand-new. low-cost Opel works in Eisenach, eastern Germany.

Erich Schmitt, 46, was brought in from Vauxhall, another GM subsidiary, to fill a new board seat devoted to purchasing, finance and

centres - a matter for negotiation

incoming V8, due out next spring.

Mercedes had 6.5 per cent last year. Customers are relatively well-off. Most Audi buyers in Britain and the US are well-educated, senior, white-collar workers or managers. A typical German customer, who may not have spent so much time at college, takes home double the national average pay.

Even so, the vast bulk of sales in Germany are still accounted for by the more modest models bearing the Audi 80 badge.

"What we need now is to stabilise our position in the top rank. Perhaps I can explain in a picture . . .

Although Kortum claims there is a downward trend at the lower margin of the age profile, he admits there are still too few young people on dealers' registers. Enter the Audi 50 - a car pitched close to the market position now occupied by the evergreen VW Golf. Kortum sounds less than certain when he promises its arrival for sometime in the second half of the decade. However, he considers it essential for his strategy of drawing in new buyers early and keeping them moving upstairs in the Audi

> He recognises the strengthening tendency for car buyers to switch brands more readily. New competition is emerging from all sides - not least from Mercedes, which also plans to introduce a cheaper entrylevel model to its heavyweight range. Demand is also undergoing subtle changes influenced by a reluctance among the well-off to flaunt their possessions. Environmental awareness is generating new trends in taste and behaviour.

Despite the present structural deficiencies, Kortum considers Audi well-armed to cope. The marque's carefully nurtured reputation as a high-tech maker will be protected. The "Vorsprung durch Technik" selling line will remain, however, future promotions will be "a bit more emotional", extending the appeal to people looking for a "sympathetic" brand.

These qualities, he promises, will become wholly apparent with the launch of the flagship V8. "It will be elegant and overall an environmentally-compatible compromise in terms of weight, fuel consumption and recyclability," Kortiim claims.

That may be so, but Kortum, who is faced with having to cut Audi's total output by up to 15 per cent this year and does not foresee an upturn in the depressed motor market until 1995-96, cannot hope for more than modest early sales.

While the recession runs its course, his oar will act as a reminder of why he was brought in. His job is to ensure the brand's new age aura is radiating at full wattage when Villa Audi is complete.

with Wolfsburg - will be dedicated as prestige showplaces for Audi. But it will also put them under an unprecedented degree of market and managerial discipline. house rather than down the road to Whether the move results in vic-

tory or defeat, it will be seen by future business historians as in keeping with the times and entirely logical. In many senses it narks merely a further stride in a stampede of strategic revisionism which has gripped western industry over the past decade. The new orthodoxy argues:

 Cross-business "synergies" of any kind - technological, marketing or any other - are far more elusive than was thought in the 1960s and 1970s. Diverse corporate portfolios are

hard for stock markets to understand and value, and for executives to manage, especially in an era when most individual busises are growing more global. The most effective way to create value for both the customer and the shareholder is therefore to substitute diversity with focus. • There has also been a growing realisation that focus is not just a matter of concentrating on businesses in related product markets, technologies and geographic areas. As Hanson, BTR and other specialist conglomerates have shown, it is even more a matter of the managerial characteristics of those businesses, such as the relative maturity of their industry. their technology and marketing intensity, and their investmenttime horizons. A set of businesses without similar managerial characteristics is difficult for the same company to "parent" effectively.

in the terminology formulated by Britain's Ashridge Strategic Management Centre, which is Shaking off the heavy brigade

Christopher Lorenz argues that diversity is dying

ICI's move will be seen by future business historians as in keeping with the times and entirely logical

influential in this field, these principles apply to "vertical parent-ing" - the relations between the group corporate centre and an individual business - and to "hor-izontal parenting" - the centre's ability to foster synergies between the different businesses. Growing awareness of the importance of these various types of relatedness and focus has spurred the flood of divestments and the growing number of de-mergers.

Companies have not just "spun off" diversifications they made through acquisition, but which have failed. They have also divested businesses which they developed organically, but for which they are no longer a suitable "parent".

One of the clearest examples of the second type - leaving aside stock market-driven de-mergers such as Racal's 1991 split with Vodafone - was the separation three years ago of the British Courtaulds combine into a chemicals and a textiles group. Martin Taylor, chief executive of the latter, points out not only that the

shares of both companies have outperformed the stock market ever since, but that the split has enabled each management to con-centrate more single-mindedly on

its own industries.
Which brings us back to ICI's "light brigade". For the best part of the last 40 years, this band of managers - especially those running pharmaceuticals, but also those at agro-chemicals, paints and some specialties felt frus-trated at the priority given to the heavy side by the ICI board, which until very recently was dominated by heavy chemicals people.

Andrew Pettigrew, a Warwick University professor of strategie change who researched an acclaimed study of the company more than a decade ago. says: There's always been an atmosphere of great distance between pharma and heavy chemicals at ICI." As long ago as the 1960s, he says, the "light brigade" felt neglected and starved of funds. This attitude fermented through the 1970s and early 1980s, he recalls, as the internal power of the "heavy brigade" persisted long past the point at which its side of the business was the more impor-tant in terms of profitability and growth potential.

In the minds of the light brigade", the thinking behind the de-merger goes back to the mid-1970s, says Pettigrew. But only since the mid-1980s has its weight on the board been sufficient to give its view real force.

It should be clear from the forcgoing that the managerial logic behind ICI's de-merger makes it by no means a peculiarly Anglo-Saxon move, as critics have alleged. In common with Union Carbide in the US, France's Rhone-Poulenc has already been moving in a similar direction through a string of divestments.

By the same token, the new Zeneca and ICI portfolios will be far from sacrosanct. A manage ment consultant who specialises in the chemical industry says that much so-called synergy in chemicals is merely "historical". He agrees different chemical businesses often share technology and production facilities, partly because they have grown out o each other. But, "unlike the branches of a tree, little sap sometimes flows between them - or needs to".

So Zenera and the new ICI are oulte capable of being dismembered by outside intervention. In military terms, they will both now mount a charge for victory. But they could still suffer the sort of treatment meted out to Lord Cardigan and his men in 1854.

NAT

BUSINESSES FOR SALE

Fashion Retailer in Finland

The owners of a major fashion department store chain with locations in four leading shopping centres in Finland offer the business for sale. Principal features include:

- Projected 1993 turnover of circa £30 million.
- "Flagship" store located in the prime commercial area of Helsinki. ■ "Shop-in-shop" concept with experienced salesforce (400
- employees in total)
- Excellent reputation and image in Finland as a fashion brand
- Register comprising some 100,000 regular customers. In-house credit card.

For further information please contact Nlamh O'Flynn, KPMG Peat Marwick, 8 Salisbury Square, London EC4Y 8BB. Tel: 071 236 8000. Fax: 071 832 8252.

(The contents of this advertisement have been approved for the purpose of section 57 of the Financial Services Act 1986 by KPMG Peat Marwick which is authorised by the institute of Chartered Accountants in England and Wales to carry on investment business).

The second secon

SMALL AIRLINE COMPANY FOR SALE -C.A.A.O.C. Aircraft and Crew Available.

n the remote south of Zambia. not far from the banks of the Zambezi river, about 50 women sit under the shade of an immense tree. All carry infants, most less than a year old. Some mothers have travelled nearly 50 miles on foot, carrying children on their backs for up to two days.

The mothers' trek allows them to participate in the worldwide battle between disease and man-made vaccines. The event is part of the Expanded Programme of immunisation, run by the World Health Organisation. Its aim is to vaccinate children against six childhood diseases: polio, measles, tuberculosis. diphtheria, whooping cough and tetanus. By the end of 1990, the programme had helped inoculate 80 per cent of the world's children against these diseases. The target is 90 per cent by 2000.

The vaccines involved in the programme are well-established products that have considerable drawbacks. The main problem is although those for diphtheria, tetanus and whooping cough can be injected together, other vaccines cannot be used simultaneously because they interact with each other. Others have to be boosted by further doses to create immunity. This means the Zambian mothers will have to repeat their journey if their child is to be fully immunised. The logistics involved mean not all children complete the vaccination

In addition, many vaccines are heat-sensitive. In tropical countries with little primary health care, a special transport infrastructure must be built up specially to ensure the vaccines have been kept cold and are still potent.

The market growth has been helped by a reduction in the level of litigation associated with vaccination

However, the application of biotechnology and, in particular, recombinant DNA technology, is leading to a second generation of vaccines. These are more resistant to heat and less likely to interact with each other. They are also safer than first-generation products, with fewer side-effects. These new technologies are also opening up the possibility of inoculation against a far wider range of diseases, ranging from herpes and hepatitis to Aids

and even certain forms of cancer. The creation of vaccines for diseases against which it was previously impossible to inoculate is driving the growth of the world vaccine market. Previously, vaccines were low-priced, high-volume comPaul Abrahams continues a series on drug discoveries by examining the latest advances in vaccines

On target with a single shot

modity products. The sector was dominated by demography - how many new-born children required

However, the market, valued at about \$1.5bn (£1bn), is expanding at 15 to 18 per cent by value, faster than the traditional pharmaceuticals market, according to Institut Mérieux, the French group. The new products, for the most part generated through biotechnology, can be patented and therefore command higher prices than their traditional commodity counterparts.

The market growth has been helped by a reduction in the level of litigation associated with vaccination. Some vaccines create side effects in a small number of patients. In the US, vaccine companies found themselves involved in product liability claims.

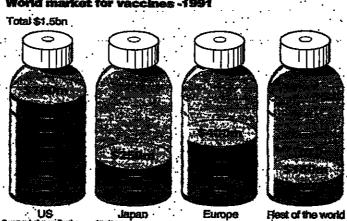

First-generation vaccines come in three forms.

· Live vaccines are based on weakened strains of the micro-organism causing the disease. These provoke an immune response from the body without generating the full-blown disease. When an inoculated patient is later infected naturally, the body's immune system is ready to react against the disease.

 Inactivated vaccines involve creating immunity by injecting micro-organisms that have had the dangerous elements within them inactivated or have been completely killed. The obvious risk associated with these killed vaccines remains the danger of injecting patients with only partially inactivated organisms. Outbreaks of tuberculosis and polio have occurred because of poorly prepared vaccines. On the other hand, if the inactivation is too effective, then poor immunisation occurs - sometimes even leading to patients being more sensitive to later infection.

• The third type of first-generation vaccine involves inactivated toxins such as tetanus.

The second-generation products are mostly based on recombinant DNA technology. This allows the previously hazardous attenuation process to be carried out more effectively. The genes within an organism that lead to the disease can be World market for vaccines -1991

US market for vaccines 1993

identified, and then inactivated or cut out. The weakened organism can then be bred by using something as simple as yeast. When injected into the body it creates an immune response

The rapid growth of the market is driven by new products for previ-ously untreatable diseases. Ignace Goethals, senior vice-president of SmithKline Beecham's vaccine business, believes 40 per cent of the world market is made up of hepatitis vaccines. Eight years ago, none existed. Sales of SB's Engerix-B, a hepatitis product, grew from £103m in 1991 to £267m last year.

The next generation of products to drive the market will be multidose products, combining a number of vaccines in the same dose, says Michel Greco, European director at Institut Mérieux. The eventual aim, set out in a WHO programme called the Children's Vaccine Initiative, is to create a super-vaccine. This should require only one or two doses, be given orally, be heat stable, have a low rate of side effects

and be affordable. However, while a laudable target, the super-vaccine is technically a long way off, says Greco. In the medium term, any vaccine is likely to remain injectable rather than oral. Institut Mérieux is registering a product which covers diphtheria, tetanus, whooping cough, HIB (against meningitis) and polio in a single injection. The next aim is to add hepatitis B, which should be developed by 1997.

in the long term, one technology that should prove useful in creating multidose vaccines is microspheres, says Greco. This would involve covering the different vaccines with retardant coatings that dissolve at different speeds. These should allow the vaccines to be released into the body at different times, preventing interaction. But this technology could take 20 years to develop.

The rapid expansion of the vac-cine industry has led to changes in its structure. In the past, the industry has been dominated by a few competitors with international sales structures, notably Institut Mérieux and SmithKline Beecham in Europe and Merck and Lederle in the US. Although the market is growing

fast, the barriers to entry remain immense, says Greco. They include: • Large development costs. A long-term Swedish clinical trial designed to test the safety of a whooping cough vaccine involves 50,000 children.

 Significant manufacturing costs. Each product needs to have its senarate production line and often a separate building to prevent contamination. Ensuring that vaccines are potent but not dangerous requires considerable expertise. Marketing reach. To keep down production costs, companies must be international, supplying large volumes around the globe.

• Products. Groups must be able to supply customers with the range of products they need. Moreover, as multi-dose vaccines become more important, companies must have access to the range of vaccines necessary to put them together. In spite of these entry barriers,

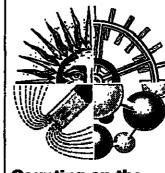

the emerging technologies allow small companies to enter the industry. They are typically biotechnology companies that create a vaccine but do not have the means to develop and market it. Their products are instead licensed to the larger groups.

Although growth in the vaccines market has been rapid, the sector remains concerned that pricing could hold it back. This month US President Bill Clinton attacked the industry, claiming low US vaccination rates were due to the high prices of vaccines. SB's Goethals denies this, pointing out that 90 per cent of vaccination costs are related to the healthcare infrastructure and only 10 per cent to the vaccine.

Paradoxically, the single-shot vaccine programmes originally aimed at reducing the burden on those mothers by the Zambezi may also boost the health of America's inner

The series continues next month with a look at drugs for the treatment of high blood pressure.

Worth Watching · Della Bradshaw

Counting on the zeta potential

ZETA potential has little to do with starry galaxies or even movie starlets. It involves the way particles interact in a liquid. When ions in the liquid attach themselves to the charged

particles, they affect the speed with which the particles move. This velocity (the zeta potential) can be measured when an electric current is applied.

By measuring the zeta potential companies can calculate how liquid products will react over time and so cut down on testing. Lots of movement means the liquid will form a long-lasting emulsion - good for face creams - while a low score means the liquid will destabilise, useful in oil recovery.

The Zetamaster, from Malvern Instruments, should enable medium-sized companies to carry out the tests at the press of a button. Malvern Instruments: UK. 0684 892456.

A direct line to cholesterol

Biotechnology specialist Genzyme, of Cambridge. Massachusetts, has been granted clearance to sell a test kit to US laboratories for measuring the level of low-density lipoprotein (LDL) cholesterol - or "bad" cholesterol - in the patient's bloodstream. LDL is recognised as a primary

factor contributing to coronary heart disease and atherogenesis - clogging of the arteries. The kit enables laboratories to neasure directly the levels of LDL in a sample and so cuts down

the time needed to get the test results to the doctor and nationt. The traditional method of letermining LDL involves indirect measurements using calculations and means the

patient has to fast for 12-14 hours

before the test is conducted. Genzyme: US, 617 252 7570.

Favourite mobile phone of the year

The Cellnet award for the best mobile phone of the year has gone to Panasonic for its I Series phone. The phone also won the sub-categories for features innovation and pocket-to-car mobility — the back light colour (green or orange) even changes to match the dashboard display lighting in the car. The overall runner-up was the Motorola MicroTac II, which also won the award for ergonomic excellence. Cellnet: UK, 0753 504000. Panasonic: UK, 0344 853239. Motorola: UK, 0256 817474.

Computers talk on the radio

lapanese manufacturer Sharp bas launched the first personal organiser with a touch screen and the ability to communicate with another organiser by radio. By touching icons on the screen of the IQ-9000 different functions can be carried out - calculations. filing or word processing. And sketches drawn on the screen can be used to annotate written text - a map could accompany

an address, for example. The infra-red link enables data to be transferred between one IQ and another up to 80cm away. The proprietary software also enables the gadget, which sells for £349.99, to send data to a fax machine or modem. Sharp: Japan. 06 621 1221; UK, 071 493 8258.

Sending the baby to sleep

The Japanese are now going wild over something the British have had for years - a cassette which calms crying bables and persuades them to sleep.

The soundtrack, put together by Roger Wannell, of Somerset, combines three rhythms with a background of "pink" noise. Although to adults the track sounds like a washing machine, to a baby it sounds like a combination of the mother's womb and the human voice. The British Technology Group has licensed the soundtrack to Victor Musical Industries, a subsidiary of JVC. JVC: Japan, 03 3242 8520. BTG: UK, 071 403 7586.

BBC's new finance director chosen

The former group financial control director of Midland Bank has been appointed director of finance and information technology at the BBC. Rodney Baker-Bates who will take up his appointment on March 22.

Baker-Bates, who was born in Liverpool and educated at Shrewsbury School and Hert-ford College, Oxford, succeeds Ian Phillips who was director of finance and chairman of BBC Enterprises, the commer-cial arm of the BBC. In December Phillips sought

an assurance about his long-term future from John Birt, then director general desreceive such an assurance, he decided to resign.

The finance director's job has since been expanded to take in responsibility for information technology. A chartered accountant, Baker-Bates, 48, joined Midland Bank in 1984 and held several positions; a casualty of the Hongkons Bank acquisition of Midland, he left

acquisition of Midland, he lent at the end of last year. Previous posts included the group finance directorship at Orion Bank, and he has also worked for consultants Arthur Andersen, spending six years working on major IT projects. Although Birt said yesterday that Baker-Bates brought great financial strength and experience to the BBC "and will ensure the effectiveness of all our finance functions and

information systems", he will also have to try to ensure that there is no repetition of the spends of the past two years. Birt recently estimated the total involved over the two

AITC picks stockbroker

The Association of Investment Trust Companies has again gone outside the immediate confines of the industry to find its next boss, replacing Philip Chappell, who retired last November because of ill

terly been chairman and chief executive of Greenwell Montagu Stockbrokers, has spent almost all his working life in Greenwell in 1968. Chappell, credited with having greatly raised the profile of the investment trust business, had a largely merchant banking

"We wanted another fresh says AFTC chairman Paul Manduca. "He has run a business, he has good commu nication skills and he is steeped in the City."

Fenton, 54, whose Scottish pedigree will be regarded as an of the industry, says he has

become increasingly interested years; he was closely involved in setting up the Fleming Income & Capital investment trust a year ago and has gone

Greenwell Montagu Stockbrokers was merged into James Capel last autumn as a result of the Hongkong Bank takeover of Midland.

Whereas Chappell, who spent only two or three days a week on the job, was plain old 'director" at the AITC, Fenton becomes the association's 'director-general", a full-time position, reflecting how the husiness has grown.

Clearly there is still a big job to do in educating the consumer about investment that work has just begun on convincing independent financial advisers of the industry's merits. "But Fenton will need to be more methodical and planned in what he does. You cannot expect investment trusts to lift their marketing expenditure in the current climate of falling dividends short-term, he will have to use

Lord Stevens steps down as chairman of Drayton Far Eastern Trust and is replaced by Sir Michael Richardson, chairman of Smith New Court who has been on the board of the trust for 29 years.

Henderson moved at **Alexon**

The campaign to get women into commanding positions in British publicly quoted compa-nies has sufferred a setback with the latest reshuffle at Alexon, the clothing company, where Ruth Henderson has been stripped of her chief exec-utive's title. Ruth Henderson became

chief executive in June 1991 when Alexon demerged from Claremont Garments, the Marks and Spencer supplier. However, following a reorganisation of board responsibilities Renderson has been named joint chief operating officer. Alexon says this is not a

demotion for her, although it does mark promotion for the joint holder of the title, Peter Ridsdale. Neither has had a salary change. In 1991-92, Henderson earned more than £160,000.

Since a decline set in in Alexon's performance - it has warned of a film pre-tax loss in 1992-93 — there has been speculation about Henderson's position. One source close to the company said it was no more accurate to portray the decline as her fault than to praise her for the previous

good performance.

It was hoped that a side effect of the announcement would be that the company would no longer "suffer the

high-profile problem of having a woman chief executive". Henderson will concentrate on product and merchandising. on product and merchandising;
Ridsdale — who came from the
Burton Group in September
1991 — will focus on marketing
and restal. The group has
recently relaunched its two
main biands: Alexon womenswear and Dash leisurewear.

ohann Christian Dahl's heroic landscapes, of thundering waterfalls and mountains majestically rising under brooding skies, established him as a leading Romantic painter and the founding father of the Norwegian school. In carefully orchestrated canvases such as the 9ft-wide "View of Stalheim", it seems as if the gentler natural dramas of Rulsdael and Everdingen have been transferred to the untamed North. "A landscape must not only show a particular country or region, it must also represent the character of this country," he wrote in 1841: "It must speak to the sensitive beholder in a poetic way."

Ceres Chann

What we find in an imaginative loan exhibition opening at the Whitworth Art Gallery in Manchester, is the more intimate work of Dahl and his protégé Thomas Fearnley. Their oil sketches, watercolours and drawings are little known outside Scandinavia, but they are immediately familiar. For Dahl and Fearnley are revealed to belong to that mainstream of early 19th century European painters - from Constable in England to Corot in France and Dillis in Munich - who sought truth to Nature by scrutinising and recording her often fleeting effects in the open air. This relatively modest show triumphantly places another piece into the still unfinished jigsaw of European naturalism.

At a time when nationalistic impulses prompted most European landscape painters to focus their attention on their native land, Dahl was obliged to go into artistic exile. Although recently freed from Danish control, Norway had no formalised system of art education and no means of providing a living for an ambitious artist. Copenhagen, the cultural capital of Northern Europe, was an obvious first stop, a Wander jahre in Italy essential. Dahl was to settle finally in Dresden, becoming an intimate of Caspar David Friedrich. He returned to Norway only five times, making study trips that resulted in the earliest paintings of the country's most remote and dramatic regions.

He appears to have painted outdoors almost from the start. "View near Presto" of 1816 - which he described as a "study from nature" - seems an attempt to reconcile the landscape style of the Dutch masters with the new directness of the widely admired pleinair oil studies sent back from Paris and Rome by the Danish master C.W. Eckersberg. The precise handling of the foreground vegetation is echoed in the careful, scrupulously observed graphite and wash drawings here of rocks, trees and boats. It is the experience of Italy,

'Scene from the Villa Malta', 1821, by Johann Christian Dahl

Romantic views of nature

Susan Moore admires the landscapes of J.C. Dahl

of working in oils directly before Nature in the time-honoured tradition of the resident foreign artists, which seems to have liberated Dahl's art.
Faced with the heat-hazy panorama

across the Bay of Naples, for instance, he instinctively lightens his palette and improvises with his brush in an attempt to seize the limpid atmospheric effects. In a prospect of Ischia his fluid touch is assured. The unusual "Scene from the Villa Malta" in Rome shows this ever-changing artist harking back to the classical lucidity and heightened colour of the Italian oil studies of de Valenciennes and Thomas Jones.

For all his directness, Dahl cannot resist introducing favoured Romantic devices. We are encouraged to take a subjective view of nature either by looking through open windows or through the eyes of isolated foreground figures who stand, backs towards us, silhouetted against the gloaming. Dahl

may not invest his landscape motifs with symbolic meaning like Friedrich, but it is tempting nonetheless to detect a reverence in the face of God's creation - and some significance in, say, his decision to record the salvos of cannon shot fired at dawn on Easter Day.

No one could dispute the immediacy or the emotive power of the astonishing small moonscapes and cloud studies painted in and around Dresden. These alone make the exhibition a must. The latter beg comparison with the closely observed skies of Constable, 14 years his senior. Revealingly, Constable – like Turner – applied the lessons learnt in the field to the working practices of the studio and in so doing developed an entirely new and dynamic pictorial language. For Dahl and the majority of the early 19th century plein-air painters, oil sketching remained an entirely independent activity, a personal response to nature painted for its own sake.

patetic Thomas Fearnley, the grandson of a Yorkshire merchant's representa tive who settled in Norway, proves a markedly different artistic personality. His works are confident, deliberately monumental and theatrically Sublime be is another Francis Danby of Romantic art. Dahl dubbed him the "Professor of Effect Landscape Paint-

The even less known and more peri-

ing". His oil studies are nonetheless joyous, remarkably facile, sumptuously rich and freely painted. A visit to the show amply reveals why Dahl advised the Nasjonalgalleriat in Oslo to buy these nature studies rather than the finished paintings.

"Nature's Way: Romantic landscape from Norway" continues at the Whi-tworth Art Gallery, University of Man-chester, until March 27, and shows at the Fitzwilliam Museum, Cambridge, April 20-June 20 Opera/Andrew Clements

'Così fan tutte' and 'Falstaff'

he latest season of English Touring Opera, launched this week at Sadler's Wells, joins last autumn's novelty, a Falstaff directed by Tim Hopkins, to a brand new Cosi fan tutte. The Cosi is the work of Claire Venables, her second staging for the company (she produced Albert Herring during its previous incarnation as Opera 80) and her third ven-

The Cosi promised much. Colleagues have spoken highly of the Venables Magic Flute (for Opera Northern Ireland) and Figgro (for Norrlandsoperan in Sweden), and certainly the short essay which she contributed to the ETO programme suggested a serious examination of just what the opera is about: "I am curious to test," she writes, "whether the opera is telling us that it is actually possible to fall in love with anybody. If this is the case it means everybody is loveable and can be loved. Once we grasp that. We can then choose whom to

Somewhere in that testing process, though, things seem to have gone seriously awry. The staging begins promisingly. Idit Nathan's designs fix it firmly in an art school where the lovers are fellow students and Alfonso their jaded teacher; the women's class is adorned with male icons, the men's with ideals of

Through the first act art and reality are gradually melded together: as the men go off to war Alfonso evokes 18th-century military imagery, scrawling "Love equals Death" across an easel while they make their farewells; Despina illustrates her views on men with Cagnacci's The Rape of Lucretia and Manet's Olympia. The lovers' portraits are caught on Polaroid, and when the strangers appear they are decked out as Laurel and Hardy, or perbaps, in this context, Gilbert and

The effect of all this is to

disorientate rather than to engage. Apart from the unfailing invention of Jeremy Sams's witty English text, the only common denominator is a lowgrade knockabout humour. Once real life has been thrown out of the window (literally in the second act as the set begins to crumble away too) nothing is left to pull together the threads in the finale. Whatever the mise en scène for a Casi, the emotions have to be credible the moral dilemmas real: Venables does not begin to make a dramatic case to match her own manifesto. Ivor Bolton nevertheless con-

ducted briskly and with a good

deal of stylish wit, and the per-formances of Julie Unwin as a feisty and always watchable Dorabella and Charles John-ston's cool Alfonso in particu-lar followed him well. Andrew Burdon's Ferrando was forthright and Meurig Davies, apparently under the weather as Guglielmo, gained steadily in power and confidence; Catherine Pierard, though, seemed badly miscast as Fiordiligi. Eleanor Bennett's engaging Despina began with a strong Scottish accent and then allowed it to deconstruct, along with everything else in the pro-

The Falstaff by contrast is both consistently fascinating and coherent, even though it may not be to all tastes. The curtain rises on a Garter Inn that would serve for a production of Wozzeck or Die Soldaten; Falstaff and his cronies drink alone in bare claustrophobic cubicles, harshly lit; Dr Caius appears to have come

straight out of Nosferatu. Bar-dolph and Pistol from an unnamed Büchner drama. None of the later images is so striking, but Hopkins's produc-tion (designs by Peter J. Davison) never quite loses that formalising element of mannered

Even if the result does not celebrate Verdi's glorious affirmations as wholeheartedly as could (the final scene is very hard to mould into this con-cept) everything works; there is a discipline about the proceedings and a refusal to go for the easy jokes that is refresh-ing and revealing. Its one big miscalculation is to treat Ford's deeply serious outburst in the second act (well sung by Patrick Donnelly) with such levity, losing a precious ele-ment in the opera's miraculously balanced scheme of feel-

The cast maintains the dramatic consistency. Jonathan Velra's Falstaff seems less concerned with concepts of chivalry than with personal integrity and, in the end, with just getting through. He delivers all his music with a salutary straightforwardness; Amanda Holden's fine, relaxed translation is always easy to catch. There is a deft and nimble Alice Ford from Margaret Preece, a cutely pointed Mistress Quickly from Marie Walshe, and a small-toned but engaging Nannetta from Gaynor Morgan. Charles Peebles conducts without unnecessary rhetoric. It is well worth catching somewhere during the

Sadler's Wells until Saturday, then touring England until the end of May; London season sponsored by Arjo Wiggins Appleton

It has always seemed to me that the pianist there enjoys an unfair advantage. The concerto repertoire is so much wider: the virtuoso opportunities so eye-catching, if the competitor

The controversy over the

return to favour of examinations in the government's edu-

cation policy has been a reminder of how difficult it is to evaluate the performance of students in any subject area. Competitions, in particular, cause heated debate in musical circles, especially when they pit one instrument against

chooses a big, romantic piece. Frederick Kempf (born 1977) won last year playing Rakh-

Radio 3's Monday lunchtime

would be difficult to argue against his first place. Kempf did not play like a child prodmusician, who just happens still to be young.

For his Barbican concert on Monday, with the Royal Liverpool Philharmonic Orchestra, he chose Rakhmaninov again: the Third Piano Concerto. It was an ambitious undertaking, for the concerto is hard work

maninov, but in his case it for young fingers, Much of the first movement seemed to be sensitively played, but it was underprojected, leaving the

His energies, however, were being conserved. The cadenza brought determination into play, the lead out of it was magical, the scale of the playing suddenly better judged. All of the slow movement had a fine, impulsive lyricism and the finale scampered

off towards a scintillating finish at a pace that the conduc-tor, Libor Pešek, had no intention of allowing. For all that, Kempf showed that he has a real interpretation of this con-

certo in the making.

If Pešek kept his young soloist rather sternly in check, he
was correspondingly lax with the orchestra during the opening movements of Berlioz's ble was not sharp, nor were the textures very clear. The best playing came in the final witches' sabbath, where the forward drive at last started to make the flesh tingle a bit: the bells, tolling noisily out from on high, really did sound like

On the Piste

Theatre/Antony Thorncroft

John Godber's plays are immensely popular. Only Alan Ayckbourn among living British playwrights attracts a bigger audience. It is easy to believe in his appeal. When salesman in *On the Piste*, describes girl friend Bev (Gillian Tompkins) as "something to do when the pubs close" he gets a hiss that would have pleased any villain in Victorian melodrama.

Godber catches the speech and prejudices of the working class with the facility of a writer of television soaps, and his plots would seem familiar to an addict of Eastenders. His magic Ingredient is to set the plays in specific oddball locations - a night club in Bounc ers; a rugby club in *Up 'n'* Under: and an Austrian skiing village welcoming its weekly

band of British holidaymakers in On the Piste. This has toured the provinces for some time but has been drastically re-written and re-designed for its London debut. The biggest change is to the sets, by Julie Godfrey. These are truly impressive, as nursery slope follows mountain top, with a sauna and hotel lobby thrown in. Few actors can have addressed the

West End suspended from a

stalled ski lift. For the first ten minutes you marvel as the actors snow plow and traverse down the astro turf (the secret is to line the skis with baby bubble-bath), and speak their

It is a fresh approach for Godber, who traditionally favoured minimalist sets and plenty of action, but gives an undoubted fillip to the evening.
The plot is familiar - the falling apart of a group of no hopers who by the end have had as miserable a time as the cast of Hamlet - but some characters are woefully under written and strangely unbelievable.

Tony, the ski instructor, is the only link with Austria (the action could really take place anywhere), and although Peter Birch is chillingly familiar as he goes through his weekly sales pitch to his band of ski virgins you never quite know whether he is as superficial as he seems or dying quietly inside. You might like to guess whether he sleeps with frustrated Alison (Julia Deakin), superior Melissa (Stephanie

Pack) or good natured Bev. Melissa, too, the Sloane fallen among plebs, never gets her moment at the confessional, and remains elusive. and in making the nerdish Chris (Paul Bown) a successful

Ivan Kaye as used car salesman Dave

voice over in TV commercials Godber is way off-target. Olivier, Welles, even Angus Deakin, have milked this lucrative and much sought after

Still there are pleasures along the way as we re-learn the familiar lesson that men are bastards and women are weak. Bev. with her macaw

voice and bruised heart, is a memorable character, and the involved audience, well seasoned with skiiers, loved it, happy to laugh at the tumbles. cry with the rejections, and shriek with embarrassment at the sauna scene. Bob Thomson directs.

Garrick Theatre (071 494 5085)

broadcasts, live from St. John's, Smith Square, have long served us as reminders that serious concerts need not submit to the standard twohours-plus format. Monday's recital by the violinist Gyorgy Pauk and the cellist Ralph Kirshbaum was a rewarding case in point. Here we had a piquant pairing: a near Old ester, as Pauk certainly is, known equally for his objective musical penetration and his virtuoso finesse – and a much younger, ultra-sincere American whose musicianly intimacies are his great trump.

There is no violin and cello repertoire but the duo-sonatas of Ravel and Kodály; but

Recital/David Murray Pauk and Kirshbaum

instead of doing the obvious and playing both those duo-sonatas, or exhuming some forgotten duo for the sake of variety, Pauk and Kirshbaum began with expansive unaccompanied solo works. The vio-linist chose neither lofty Bach or Bartók, nor brilliant Paganini or Ysaye, but old Prokofiev's Sonata op. 115 (1947) designed for performance by student violins in unison, posthumously published and still virtually unknown.

Prokofiev must have had senior students in mind, for his

writing presupposes quite advanced technique and confident bravura attack. Under Pank's bow it sprang to tough, pungent, wholly characteristic life: we can no longer count this as a negligible work. Kirshbaum opted for Bach's Suite no. 1 in G, and addressed it with as much authority as

he invested it with personal,

moment-to-moment feeling. These performances prepared the way superbly for Ravel's 1922 duo-sonata. Though it used to be thought dismayingly astringent, its

the repertoire willy-nilly. Nothing could introduce it better than Prokofiev's robust, linear wit and Bach's leanly expressive patterns. Ravel's instrumental pair

stern merits have lodged it in

afforded him room for more exposed contrapuntal friction than he had previously dared, and Pauk and Kirshbaum gave the music full value without any mollifying gloss. The muscular shifts of tone in all the quicker tempi were stark, unlubricated, compelling. The scherzo suggested a properly baleful subtext - and yet the slow movement was wistful enough to betray a clear echo of the Andantino of Debussy's

long-honoured string quartet.

Leipzig and Lyon are both preparing major musical celebrations for the coming anniversaries to mark - the 250th of the renowned Gewandhaus Orchestra and the 300th of its opera company. Lyon will re-open its Opéra after a £60m reconstruction masterminded by French architect Jean Nouvel.

The Leipzig Gewandhaus has commissioned a special anniversary symphony from east Germany's leading composer, Siegfried Matthus, to be premiered on March 11 under

Kurt Masur. The operatic celebrations follow on May 1 with a new production of Boris Godunov staged by Hungarian film director istvan Szabo, featuring

Simon Estes in the title role. There will be a ballet premiere on May 2 with choreography by Uwe Scholz, followed on May 8 by Gottfried Pilz's new production of Rameau's

Hippolyte et Aricie, conducted by the Lelpzig intendant Udo Zimmermann. On May 28, 29 and 30, there will be performances of the Milan production of Stockhausen's Dienstag aus Licht. A new opera by Jörg Herchet, entitled

Nachtwache, rounds off the festivities at the end of June.

The Opéra de Lyon re-opens on May 14 after nearly four years of reconstruction, leaving only the shell of the old building as a base for a multi-storey, high-technology theatre. The first production is Debussy's Rodrigue et Chimène, a youthful work which was never heard in the composer's lifetime and for which a special performing edition has now been prepared. It will be conducted by Kent

Nagano and staged by Georges Nagano also conducts Louis Erio's new production of Les Contes d'Hoffmann opening on May 15. The following day sees a new production of Coppélia choreographed by Maguy Marin. The programme is completed

on May 20 by Lully's Phaeton, conducted by Marc Minkowski and staged by French choreographer Karine Saporta. EXHIBITIONS GUIDE

The Indian government survived an important challenge by suppressing a planned mass rally by Hindu militants in the centre of the capital. Tomo: row it meets an equally significant test when Mr Manmohan Singh, the finance minister, presents his annual budget and presents his annual budget and launches a new phase of India's wide-ranging reform

When he addresses parliament, Mr Singh must try to convince the nation and foreign countries that the pas-sions raised by the destruction of the Ayodhya mosque last December have not deflected the government from the vital task of modernising the economy and opening it up to international trade and investment

He faces a daunting challenge, given the determination of the Bharatiya Janata party, the right-wing Hindu party whose supporters stormed the mosque, to prolong the atmosphere of political crisis. As Mr Kantikumar Poddar, the president of the Federation of Indian Chambers of Commerce and Industry, says: "This is a very important budget for the country because of the uncertainty which has been created about the future of economic reform.

Mr Singh does not have political support for the kind of radical measures which might turn the spotlight away from Ayodhya. Mr Narasimha Rao, the prime minister, prefers to keep his head down, in the hope that the storm raised by the BJP will blow itself out. So instead the finance minister is likely to present a modest package - and hope it will be enough to keep India on the road to economic recovery.

He will take credit for the measures he has carried out so far, including cuts in protectionist customs duties, easing restrictions on foreign investors, reductions in government subsidies, and the scrapping of much of the "licence raj" the system under which companies needed government permission to build or expand factories. Last summer's scandal in the Bombay securities market and the Ayodhya crisis limited the speed of reform in the second half of last year, but the government has sought to regain the initiative in the past month with a spate of announcements including the partial liberalisation of statecontrolled fuel prices.

Modest step for reformers

Political tensions will limit the scope of India's budget, says Stefan Wagstyl

even more warily.

All these non-controverstal

sasures will be welcomed by

The finance minister will also point out the fruits of these changes: he has pulled India out of a balance-of-payments crisis, curbed government borrowing and cut inflation in half to about 7 per cent a year. With the help of a good monsoon, economic output is growing this year at a steady annual rate of 4 per cent, up from 1.2 per cent in the year to March 1992. Exports are increasing and foreign investors have pledged about US\$1.3bn in the past 18 months - more than in the previous

The World Bank and the International Monetary Fund pronounce themselves satisfied with India's progress. As the government's annual economic survey said this week: "The phase of crisis management is

The question is what comes next. The budget is almost certain to contain a reduction in import duties of perhaps 20 percentage points from a current maximum of 110 per cent.

your reliable partner for

Corporate Finance, the solidity

of a state bank and the lead-

reform is dependent on reform of public spending – including cuts in support for state-owned

If reform of subsidies and of banking will be limited by political considerations, a third important area — redundancy laws — will probably be off the agenda. The government believes that, to help promote investment, it should relax restraints on employers' powers to dismiss workers. It has been told as much by business-men, including the British delegation which last month visited India with Mr John Major, the prime minister.

But ministers have been wary of advancing reform for fear of political opposition, particularly from the left. In the wake of the Ayodhya crisis, the ruling Congress (I) party needs support from left-wing parties and labour unions to help counter the right-wing BJP and its allies. So, Mr Singh is even less likely to be bold in this area than he was before.
India, therefore, will not rush its reforms. With each

passing month, Mr Rap's liberalisation programme looks less like a blitz and more like a drawn-out campaign. The democratic tradition, the decentral isation of power to the provincial states, and the ability of the bureaucrats to block changes that might threaten their power all serve to stifle change. Ayodhya is yet another excuse for going slow. As Mr Freddie Mehta, a senior director of the Tata group, India's largest industrial group, says: "You can't go as st as Margaret Thatcher in

The problem is that some challenges will become harder with the passage of time. The longer it takes for the government to cut wasteful public spending, for example, the longer it will be before funds are available to invest in education and infrastructure. Half of India's population is illiterate. A quarter of the electricity produced is wasted through inefficient transmission.

The government hopes that the current reforms will lay the foundations for a substantial jump in the rate of economic growth, perhaps to 7 per cent a year. With such a leap, India will be able to generate funds to meet some of its chronic investment needs and attract foreign capital. But such a take-off is still some distance away, and Mr Singh's budget is likely to be but a modest step in the right

Faint signs of life

Britain's La-bour party is showing faint signs of recov ery from the torpor into which it sank last April. Its leader, Mr John

Smith, has begun to find his feet. He is performing better in parliament. He is also, in his own way, stage-managing the half-modernisation of his party, to the extent that his cautious nature permits. Although not good enough, the process is

For the past two weeks Mr Smith has menaged to excortate Mr John Major so effectively that on Tuesday the prime minister took up the traditional whine of the contemporary politician in trouble The Labour leader, Mr Major bleated, is indulging in "sound-hite" politics. Titch. Some of Mr Smith's remarks about how unemployment has risen under the Tories have turned up on the radio and television news. Voters might have overheard. The extent to which the elec-

torate is taking any notice at all of politicians who have so signally failed them is questionable. None of the parties has an attentive audience right now. Backstage, however, some of what Labour's conservative critics have been asking for is being taken seriously. This should be acknowledged. What might pass, in a poor year with the lights out, for a "new" Labour party is being constructed. Mr Smith set the tone in a speech in Bourne-mouth on February 7. Labour's goal, he said then, "must be about the advancement of individual people". This could only be fully achieved, he added, "in the context of a strong and

supportive society". Oops. Wait a minute. What did he mean by "strong and supportive society?" Not state

ownership, or excessively high taxation, or "government sim-ply for its own sake". But, believe you me, untold shelf-miles of regulations. "In the modern world, you simply cannot leave everything to the market any more than you can leave everything to the state," said Mr Smith. Coming from a Tory moderate, such a remark might sound unexceptionable. Coming from a leader of the

leftwing, it arouses suspicions. Labour is the creature of the trade unions that founded it. In whose interests would regula-tions be drafted? Mr Smithneeds to spread the belief that the answer is us, as citizens and consumers. He needs to be convincing. That is why he moved on Wednesday to

the weaken hold of the unious over the party organisa-tion. They com-manded 40 per cent of the votes in the electoral college that chose him last July. He favours now excluding them

from future party leadership contests. He would also have unions excluded from the process of selecting parliamentary candidates, although on this he offered a sop - a future register of union members who support Labour - to soothe any wounded feelings.

Then he blew it. The trade union bloc vote at Labour's annual conference provides annual sound-bites that confirm that the unions run the party. The bloc will command a mere 70 per cent of the votes this year, down from 90 per cent. Mr Smith now supports a gradual reduction of the union esence to 50 per cent, as the number of individual members increases. As he said this week, that is not a divorce; he

never wanted a divorce. Yet the suspicion that Labour is the tool of a powerful vested interest will persist until there is an armalength relationship with the unions. They should live separately, as do the Democrats and the AFL-CIO in the US. The unions can always send a cheque through what will soon be the privatised

Mr Smith is also being too cautious about the removal of clause 4 - the one interpreted as threatening the old-fashioned nationalisation of industries - from the party's constitution. He regards this as of little concern to the average voter. True, but it is no use deploying the words "new" and "renewal" 25 times in a 37-min-

ute speech, as

Labour and the Bournemouth, unions should live if there is to be no symbolic separately. The unions can always of Labour's socialist past.

send a cheque There are also significant through what will noises coming soon be the from other privatised mail Labour spokes-

men. The twin slogan - individual and community - is being deployed to some effect. As I suggested on Tuesday, Mr Tony Blair has the Tories rattled with his attacks on their record on crime. Mr Gordon Brown is two speeches on in a series in which he will seek to convince

us that Labour's "new economics" is a serious alternative to the government's non-strategy. Mr Brown has not yet found the magic formula. His "investment in people" and "partnership" between industry and government sound Clintonesque. He is calling for more competition for the privatised utilities. He might evolve into a credible trust-buster if he stops being over-enthusiastic about regulation and stops

over-stressing the cross-directorships between Tory MPs, exministers, and the new compa-nies. In the delicate art of attacking the Tories on their right flank Mr Blair is the master, Mr Brown the apprentice.

Mr Smith's unique selling point may be his passion for constitutional reform. Britain is "one of the most centralised states in Europe," he pointed out in his acceptance speech. "I want ... a future that puts power back in the hands of our citizens, he said in Bournemouth. He will be more specific at a meeting of Charter 88 on Monday night, although he will be coy about proportional representation. He will doubtless speak about his belief in regional government, devolution to the Celtic nations, a bill of rights and a freedom of information bill. In his view, the latter would include consumer rights and corporate

The Labour leader is an admirer of the German federal constitution, and a true believer in decentralisation unlike his predecessor, who never bought devolution and quite unlike Mr Roy Hattersley, Labour's former deputy leader, who gagged on the bill of rights. When he packages all this as a new "open society" Mr Smith may be able to command greater verisimilitude than does Mr Major with his carefully-controlled Citizen's

Charter. This emphasis on constitutional change is music to my ears, but it is hardly pop. It would be a treat to say that Mr Smith is bringing British political debate back to life. Alas, it is far too early to draw any such happy conclusion. We are still saddled with an ineffably weak government that appears likely to complete its term, and an opposition that seems insufficiently aware of how radically it must change if it is to win next time.

A suggested cure to the problem of surplus ACT

Sir, Howard Davies (Letters, February 23) is right on diagnosis but wrong on the cure. "Surplus ACT" is indeed an incentive to move costs offshore. Unpalatably, however, an effective cure would increase the tax bill of those companies which are now complaining.

Contrary to general percep-tions, the ACT system positively encourages companies to invest overseas, up to a point. This is because they reduce their UK tax bill by paying dividends out of the overseas profits and claiming, quite legiti-mately, that the dividends come from UK profits. Of course, this analysis regards the ACT as a withholding of income tax on the gross dividend, and not as a tax on the company profits, as your leader of February 19 ("Budget

for the supply side") states. If the overseas profits go beyond a point - typically around half of group profits the company will have made this claim to the full and will run into "surplus ACT". It will by then be paying only 8 per cent tax on all its UK profits. A well-advised chancellor would stop dividends funded from overseas profits being used to reduce UK tax bills. UK companies would then find they had a marginal corpora-tion tax rate of 33 per cent and would no longer have a tax reason to export their adminis-trative and development functions. This move would increase the tax liabilities of most UK companies investing overseas and put them on to the same footing as overse companies investing here. Christopher Daws,

Rupert Brooke: no relation

From Mr Justin Brooke. Sir, Michael Arditti is to be congratulated on his article "Drama at the Marlowe Society" (Arts, February 20). However, he is in error in suggest-ing that Rupert Brooke was in any way related to my late father. Apart from a writer of doggerel verse, we have no poets in our family. Justin Brooke. Chymoroah Vean, Cornwall TR17 0DO

Government should remove UK bias against full-time jobs

Sir, Edward Balls writes ("A scar that will persist for years to come", February 18) on the high level of unemployment which will continue to exist after the UK economy recovers from the present slump. One reason why the outlook is so pessimistic for the unemployed is, he says, that "technological change and competition from low-cost producers in developing countries has reduced the demand for unskilled labour

other than in low-wage, often part-time employment. These obs have ... been mainly taken by female entrants into the labour markets". Evidence on part-time work-ing is usually cited in support of this view. Since June 1978,

well over 2.5m full-time jobs have been lost. Over the same time there has been an increase of more than 1.25m of part-time jobs. Indeed, a third of those in employment now work part-time. This trend is vorkforce

But is this due to the market forces which Edward Bails describes? Or are there particular circumstances in Britain which make such an outcome inevitably unfavourable to those wishing to seek full-time employment? I would suggest that such an

outcome is inevitable, given the way the contributions for national insurance are structured. Employees and employers pay no contribution on the first £54 of earnings. When creating new posts, many employers bear this in mind and often offer part-time rather than full-time posts. Some employers, Burton is a recent example, are now cutting full-time jobs and offering only

part-time work. I believe it is time that these House of Common national insurance rules were London SW1 QAA

way out of line with other looked at critically. I would kuropean countries, with hope that the government Britain currently employing 40 would consider in next per cent of Europe's part-time | month's budget levying tions for employers from the very first pound of earnings. As the move would not be aimed at raising additional revenue (which would be an additional tax on jobs) the overall level of employer contributions would therefore be adjusted to make the move revenue-neutral

> Such a simple change would remove the present blas which is working in favour of creating only part-time employment. It would not, of course, prevent employers and employ-ees negotiating packages of less than full-time employment. But it would mean the removal of the current penalty which operates against the cre ation of full-time posts. Frank Field MP,

UK mechanical engineering sector can fight back

From Mr P Salisbury. Sir, Andrew Baxter ("Chart-ing the mechanics of decline", February 22) makes reference to the fact that UK industrialists complain that they are forced to buy foreign equipment. He goes on to say that process plant contractors say it is "no longer possible to buy big UK-produced compressors". As managing director of Peter Brotherhood, I can issure him that large gas compression equipment, whether reciprocating, centrifugal or screw machines, is manufactured in the UK, most notably by ourselves in Peterborough. While I cannot speak for any other UK manufacturer, I can

assure him that process plant

contractors, and other customers, continue to buy our equipment on the basis that our quality, delivery and prices are competitive with those of any other manufacturers through out the world. In view of the dismissive

comment about the British machine-tool sector by the head of a German machine-tool company, I can only hope that the complacency contained in his remarks continues.

While there are many aspects of German industry worthy of study, my experience of buying specialised equipment from Germany is that the equipment is often delivered late, of poor quality and accompanied by an attitude on commercial matters that borders on arrogance. On that basis, maybe UK industry! can start to fight back. Finally I would say that size

is not the issue with regard to the mechanical engineering sector. Neither indeed is the absolute value of currency. What really matters is the ability of UK companies to penability of the companies to pen-etrate their markets properly and to offer high-quality goods delivered on time, and manu-factured cost-effectively. If we get these matters right, then everything slse will follow. Mr P Salisbury,

managing director, Peter Brotherhood, Lincoln Road. Peterborough PE4 6AB

The going can get tough when payment of a debt is sought

From Mr Robert Jenkins. Sir, The battle between the large customer and the small supplier is rougher than Michael Cassell ("The dangers that lurk in delay", February 23) makes out. A couple of weeks ago a colleague and I went to a large customer which owed what was to us a large sum the debt going back five months. All telephone attempts to get the debt had received the now usual response of "the cheque is in the post" and sim-

lar excuse We waited patiently for more than three hours until we eventually got to meet the company's finance director. His view was stark - his com-

pany had not produced the necessary internal documentation to allow him to pay us. So he was not going to pay us. Bad hick, goodbye! We persisted as courteously

as the circumstances permit ted, only for me to end up in hospital with damage to my spine resulting from the finance director losing his cool and tipping me on to the floor. And the company still hasn't paid up. Robert Jenkins,

managing director, Burnaston Crane and Plant Hire. Worksop Rood. Worksop, Notts S81 8DX

Income stream

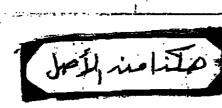

From Mr John Duffield Sir, Your editorial, "Paying for roads" (February 23), referred to "the lack of any income stream from the roads". I do not know how much income the government gets from excise duty on petrol and road fund tax, but, as Damon Runyan would have put it, if this is not an income stream from the roads, it will do until an income stream comes along.

Given this, any further income should be raised by increasing one or both of these. The marginal cost of collection is nil, so the take is correspondingly maximised.

FINANCIAL TIMES

Number One Southwark Bridge, London SEI 9HL Tel: 071-873 3000 Telex: 922186 Fax: 071-407 5700 Friday February 26 1993

When industry fears the worst

day by day the toll continues. The scale of the cutbacks at some of Britain's leading companies is striking. Is UK industry in a self-rein-

forcing spiral of pessimism? Behind the wave of cuts lie the pressures of an agonisingly long-drawn-out recession. But there are also deeper trends.

In all developed countries, there is a steady fall in the proportion of the labour force engaged in manu-facturing production. The shrinkage of employment in the manufacturing sector as a whole - a drop of 16 per cent in the UK since 1988 - if anything understates this, since more and more manufacturing workers have servicetype jobs, in design, marketing, after-sales, and so on.

Europe must also cope with the restructuring of production and distribution during the creation of an integrated regional economy. Any individual European economy is likely to gain jobs from this process as well as lose them - but in hard times bad news is always more striking than good.

Though services are destined to play a larger role in future a strategy.

FOUR-THOUSAND more UK jobs employment, they have been to go at ICI, 2,400 at British Gas - undergoing their own shakeout, in both the US and the UK. Middlemanagers in big companies, clerks in banking and insurance, stockbrokers and telephone engineers no service occupation has been immune. Deregulation and privati sation are special cases of this

At worst, these forces are ines-capable. At best, they contribute to the long-term health of companies and the economy: everyone gains from the cost savings forced on British Gas by its regulator.

Still, there was something in the tone of yesterday's message from ICI - the emphasis on continued cost-cutting, the born-again ruthlessness about businesses which fail to meet profitability targets that hints at the emergence of a mood of contagious pessimism among British industrialists.

That darker mood will serve a purpose if it is accompanied - as at ICI - by a willingness to address difficult strategic issues. Companies that do not ask themselves such questions are not helping their shareholders or their

Italian question

WITH EACH passing day, the political crisis in Italy more closely resembles a fin de régime. One by one, some of the highest in the land are toppled by a spreading series of corruption scandals. The political parties that ran the country in shifting anti-communist coalitions during the cold-war decades are discredited to the point of illegitimacy. Top public and private sector company managers find themselves in increasing numbers behind bars. The government teeters and the lira plunges. Beneath it all, a ground-swell of public discontent is forcing fundamental political change on to the agenda, and if Italy's ruling class fails to find an adequate response, it may simply be swept away.

That change was on the way has been increasingly apparent since general elections delivered an unprecedented rebuke to Italy's established parties last April. The coalition government created in response, under the deputy leader of the Socialist party, Mr Giuliano Amato, set out an ambitious and long overdue programme of economic reform. It has managed -by political guile and by dint of the weakness of traditional party bosses - not only to survive but to push through a surprising number of changes to Italy's bloated welfare state and its ossified wage-

bargaining system.

But it always had something of the air of a transitional regime. and that impression has become rresistible in recent weeks. The nain reason is the spreading irray of investigations into senior politicians and businessmen being conducted by magistrates up and lown the land. Emboldened by strong public support, the magis-racy has provided detailed evilence of a network of bribery and orruption that reaches into the abric of Italian political and eco-10mic life. The politicians have een paying the price - from Mr lettino Craxi, who was forced to esign as Socialist leader earlier his month, to the latest casualty, epublican Mr Giorgio La Malfa. As a result of all this, and of the mato's government is clearly liv- ready for.

ing on borrowed time. Its sole realistic raison d'être is now to survive long enough to oversee changes to Italy's voting system that will enable new general elections to be held later this year. Even the shaping of the new system is out of the hands of the established politicians, and will probably be decided by referendum in April.

New elections are the only way that Italy will begin to pull itself out of the present morass, and it would make no sense for them to be held under the current system of proportional representation. which has been in some measure responsible for the country's history of weak government. After the proposed plebiscites, Italy will probably end up with a mixed system of first-past-the-post and proportional systems, which at least stands a greater chance of presenting voters with genuine political choices and the possibility of alternance in power.

However, such technical changes are only a first, small step towards the more thoroughgoing constitutional, political and economic changes Italy needs, including greater transparency in the operations of its public sector, radical reform of the state budget and of party finances, vigorous privatisation of state assets, and a more sensible distribution of power between central government and the regions.

Indeed, tinkering with the electoral system without more broadbased reform could just as easily exacerbate Italy's existing divisions, with the regionalist Lega Nord predominant in the north and the Christian Democrats in the centre and south. The result could be stalemate, further damaging drift on fiscal and other policies, and even ultimately the break-up of the country.

Any newly elected Chamber of Deputies and Senate will have to assume the role of a constituent assembly with the task of drafting a new constitution, and confronting the real dilemmas Italy's polit-ical system has enabled it to duck for so long. That is what the voters, in the south of the country as overnment's own divisions. Mr much as the north, seem to be

Not so special

emed well satisfied with his first eeting with President Bill Clin-n. Indeed there is no reason to link it went badly. But it would ave had to go very badly for Mr aior to sav so in public, since its ain purpose was to demonstrate, r British domestic consumption, at the "special relationship" is ill in working order.

The truth is that this relationip is special above all in its lopledness. For a time the personal spect and affection of the then esident Ronald Reagan for the en Mrs Margaret Thatcher did mething to offset the manifest equality between their two untries. But even the afterglow that time has now faded.

Ill the world can now see is, on 3 one hand, a self-confident ung American leader, fully saged in an ambitious project of lonal recovery and not in the st disposed to be sentimental rut any foreign country; and, on other hand, a nervous and ensive British leader whose ject has already been derailed. Major desperately needs to be n to get on well with Mr Clin-. Mr Clinton has no reason to arel with Mr Major, but that is

nuch as one can say.
'n two issues Mr Major's advis-claim that he was able to influe the president. On one of ent agreement expires in July.

IR JOHN Major yesterday them, the handling of the war in plies into the Moslem enclaves, in return for being publicly exempted from participation, with a gracious acknowledgement of what British troops are already

> On the other issue, trade, the differences are real and important. It will have done no harm for Mr Clinton to be reminded personally by a European leader of what is at stake. But no one should imagine that by reiterating his commitment to a successful conclusion of the Uruguay round he actually shifted the US position on any of the points in dispute; still less that Mr Major was able to convince him that European governments' advances to the Airbus consortium are not really subsidies. If anyone did think so, they will have been disabused yesterday by the US trade representative, Mr Mickey Kantor, who revealed that he is asking for "special consulta-tions" on Airbus before the pres-

he bull market in bonds around the world has taken a further, dizzying turn in the past fortnight. Bond prices have soared, pushing yields down to levels not seen for more than two decades in the US and UK markets. The Japanese bond market has risen to heights not touched for

more than 25 years, save for a three-month interlude in the 1980s. Is this bull market about to run out of steam, or is the world economy as weak as the buyers of bonds seem to believe? Most market observers believe the top of the market may soon be reached.

"We're not there yet - but we're much closer to it than we have been for a long time," says Mr Gordon Johns, a managing director with Kemper Investment Management, the US fund management company. The argument for buying bonds rests on the economic slump that has afflicted industrialised nations. Without economic growth, compa-

profits and pay the bigger dividends that make investors buy equities. Also, with the slowdown encour aging governments in Japan and the US to cut short-term interest rates to historic lows, investors have had little incentive to leave cash in short-term deposits with banks or in money-market instru-

nies cannot generate the higher

ments. Result: a rush into bonds. The US bond market has led the surge. The market's bell-wether, the 30-year bond (known as the "long bond"), hit its highest level since the early 1970s at the start of this week. The yield on the bond turnbled below 7 per cent, encouraged by the economic plan announced by President Bill Clinton in his state of

the union address last week. The romance between Mr Clinton and the bond market has been remarkable. Last autumn, the prospect of a Democratic victory in the presidential election for the first time in 17 years seemed a bond investors' nightmare. The market feared the incoming president would bring in measures to stimulate the economy, in the process stoking up inflation and adding to the US fiscal deficit.

Mr Clinton's tax-raising and deficit-reducing plan has eased those fears. In the past week, the yield on the long bond has fallen from 7.12 per cent to 6.32 per cent. This sug-gests a high level of confidence in an untried president, whose ability to push through a tough economic package is still uncertain.

The leap in bond prices in Japan has been equally marked. Last summer, the yield on the benchmark government bond No 145 stood comfortably above 5 per cent. An admission by the authorities that the real economy was slowing down sharply after the collapse in property and share prices since the end of the 1980s forced the yield down to 4.5 per cent by the turn of the year.

Richard Waters says that the current bull run in the world's main bond markets could lose momentum

In sight of the summit

below 4 per cent. The rise of the yen has provoked fears that Japanese exports will become less competitive, further undermining the country's manufacturing sector. Finance minister Mr Yoshiro Hayashi said earlier this week that another reduction in the country's discount rate - cut to just 2.5 per cent ear-lier this month - could follow.

The buying spree in part reflects disillusionment with Japan's equity market. The Nikkei average is stuck at about 17,000, less than half its peak in 1989, and investors have little confidence that share prices will rise soon. As a result, they have Bufflet of

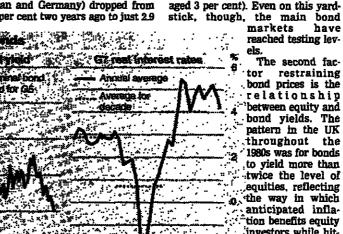

channelled their money into bonds.

That contrasts with the 1980s bull market, when Japanese bonds rose with the stock market. "This time, it's & the sort of buying to you get in a slump," says Mr Stephen Lewis, an economist at London Bond Broking Company, "Bonds are simply the least ... bad investment."

yield on long-dated UK government bonds (gilts) fell below 8½ per cent a fortnight ago, its lowest level since the early 1970s. Can these price rises be sus-tained? At least three factors sug-

gest that the bond markets are entering testing times, and that further gains depend on a break with recent investment trends. First, real (after-inflation) yields

stand at low levels by recent standards. The average real yield of the three main bond markets (the US, Japan and Germany) dropped from 4.6 per cent two years ago to just 2.9

according to Kemper Investment Management. During the 1980s, real vields averaged 4 per cent.

This suggests that bond investors expect inflation rates to fall further, or that they think the threat of resurgent inflation has receded and are prepared to accept lower real returns. It may be a return to the pre-1970s investment landscape. Before the oil shocks of that decade knocked confidence in low-inflation growth, real returns were noticeably lower (in the 1960s, they averaged 3 per cent). Even on this yardstick, though, the main bond

markets have reached testing lev-

tor restraining bond prices is the relationship between equity and bond yields. The pattern in the UK throughout the 1980s was for bonds to yield more than twice the level of equities, reflecting the way in which anticipated inflation benefits equity investors while hit-By comparison, Little L

now fallen below two. In the US, meanwhile, bonds yield about 4 percentage points more than equities, roughly the level they have held for the past three or four years. Bond prices will only rise further if this relationship shifts.

That this could be about to happen, according to observers like Mr Lewis. He argues that investors in the US have overly optimistic expectations of earnings growth in US companies as the economy comes out of recession. As their hopes are disappointed, he expects a switch from equities into bonds However, he adds that this would give only a limited extra lease of life to the bond market because of the

historically low level of yields. The third shadow over the bond markets comes from the large overhang of bonds that governments around the world will have to sell this year. Members of the G7 group of leading industrial nations are expected to raise more than £500bn between them to finance the large budget deficits that have resulted

eral European countries threaten to outpace the capacity of their domes tic bond markets, forcing them to the international bond (Eurobond) market for money, Italy Sweden and Finland have borrowed internationally this year. This competition for capital could prevent long-term interest rates falling, limiting further gains in bond prices.

The combination of these factors is prompting investors to review their exposure to bonds. "The case for being bullish on bonds is nowhere near as clear as it has been," says Mr Johns of Kemper Investment Management.

Nevertheless, there may still be some areas of growth. Markets in Europe where currencies are still tied to the European exchange rate mechanism should offer the best hope. High German interest rates have kept European bond yields higher than they would otherwise have been given the slowdown in the European economy. Further easing of the Bundesbank's monetary policy – provided it does not imply that Germany is relaxing its anti-inflationary stance - can only be good for bonds.

However, even here prices could have risen too far, too fast. With financial markets anticipating a quick fall in German short-term interest rates, 10-year bonds have fallen sharply this year, nudging below 7 per cent 10 days ago.

For the other big markets, the market peak seems even closer. There may be little current risk of an inflationary spiral, sending bond prices crashing. But the world econ-omy will need to take a further lurch towards the abyss if the bull market in bonds is to maintain its

Canada's involvement in

premier Brian Mulroney whose

arket forces are leaders say Liverpool airport should playing havoc with be expanded from 400,000 to 12m passengers a year. Their proposal would preclude the need for a second runway at Manchester airport, which Manchester wants to handle 30m passengers a year by 2005, compared with its present 12.4m. Since the second runway would

intrude into the affluent Cheshire green belt, Merseyside will join some of the north's richest residents next year to fight it on both environmental and economic planning grounds at a public inquiry. Planners estimate that every 1m

passengers a year passing through an airport generate about 1,000 jobs. The five Merseyside boroughs -Liverpool, Knowsley, St Helens, Sefton and Wirral - want them funnelled where they are needed most. Merseyside's unemployment rate

of 17.5 per cent compares poorly with Greater Manchester's 11.4 per cent, which is nearer the national chester is playing in. But Mersey-side wants to spoil the party: local diversified and has withstood the

current recession well, while Merseyside's has continued to struggle. Indeed, the economic tide has been running against Mersevside for most of the century. The Right Reverend David Sheppard, bishop of Liverpool, says: "In every recession, Merseyside has gone down further and faster than anywhere else and has never recovered to the level from which it started. Unemployment here is not cyclical, but chronic and structural."

Changing patterns of trade, cou-pled with new technology in bulk shipping and stevedoring, have continuously reduced demand for unskilled labour and port-related services in the Mersey docks.

The catalyst for reversing decline, says Mr Ian Berry, chief executive of Liverpool Chamber of Commerce of Industry, "is to improve strategic sites and create a better image". Many of these sites are derelict and near Liverpool airport.

Mr Harry Rimmer, leader of
Liverpool City Council and an air-

OBSERVER

go towards reclaiming derelict land and improving road and rail links between the airport, motorways. railways - and Manchester. He says Merseyside was already

on the slide before the financially disastrous period of 1983-87, when Militant, a Marxist grouping he has helped purge from the Labour party, controlled Liverpool council. The area had 619,000 jobs in 1977, but by 1981 this was down to 560,000. The figure dropped further to about 480,000 by 1986 and about 420,000 in 1990. Most lost jobs were manual. Most of the area's employment is now in service busines which require an educated or

An exodus of people with the wrong skills, unable to get work locally, saw Merseyside's population shrink by 276,000 to fewer than 1.4m between 1971 and 1991 - the most rapid rate of contraction in Britain in that period. Paradoxically, depopulation has not seriously damaged

port director, says EC money would the tax base and local spending power, because the remaining work-ers are better paid.

What drags Merseyside down to EC disaster levels, however, are 47,000 long-term unemployed. Mr Peter Stoney, a Liverpool University economist, says more than three-quarters of these are male manual workers and half live in council houses, so they cannot move.

"We need the type of economic growth that will match the quality of the labour available. Retraining has not had a noticeable effect," Mr Stoney says. "We need more port-re-lated and 'brown' [manufacturing] industries. Leisure and office developments push land values above what manufacturers can afford."

No-nonsense business parks for manufacturers, clustered around an expanding airport, might do the trick, thinks Mr Rimmer. But if Manchester gets its second runway
- never mind the Olympics - Merseyside's fear is that it will always be the poor relation.

Problem for the Gatt pack

Bosnia, the Clinton administration has indeed moved closer to the European view and away from its early twitches of more forthright interventionism - but this change occurred a fortnight ago. All that happened this week was a fairly simple bargain: Mr Major agreed to swallow his doubts about the wisdom of parachuting relief sup-

doing on the ground.

international trade questions should have given Mulroney the background to do the Gatt job as well as any of the others mooted He is on first-name terms with most of his fellow G7 leaders and has the added experience of knowing how to hold together a

country which, like the international trading system, is in danger of disintegrating. However, he is not the only out-of-work international statesman looking for a big job. The names of Lord Lawson and Peter Sutherland, the Irish predecessor of Sir Leon Brittan as the European Community's competition-policy commissioner, have been mentioned, as has Mexico's President Salinas, even though

he's not expected to step down until next year. The problem for all of them, however, is whether the job will be worth doing after Dunkel's half-year extension of his term in

the post runs out this summer. The answer is impossible to predict while the plight of the Uruguay Round of talks on world trade liberalisation hangs in the balance - and with it the plight of a more powerful Multilateral Trade

If the talks fail, Gatt and its secretariat could be marginalised, deterring any budding global deal-maker from considering the job, which in turn could hamper the institution's ability to strong-arm world leaders to commit their nations to further trade liberalisation. No wonder the staff at Gatt's

headquarters in Geneva are currently talking gloomily about vicious circles.

Family affair ■ The House of Warburg must be

feeling pretty pleased with itself because of its role in the ICI demerger. Leaving aside the accolades that

will be heaped on a couple of S G Warburg directors, John Walker-Haworth and Rory Tapner, for earning the firm some very fat fees. Warburg can also point with pride to Goldman Sachs' Jon Aisbitt, the other financial adviser. He honed his early merchant banking skills at Warburg. And don't forget John Mayo, finance director of Zeneca, the

demerged drug company - who

just happens to have been recruited

'Isn't that Bobby Moore sitting on St Peter's shoulders?"

from Warburg. If only ICI's Sir Denys Henderson had not decided to hog both chairmanships, it might have been possible to find a job for Warburg chairman Sir David Scholey, But then again that might have been just a little too incestuous.

Speak up, Bill

■ Another small explosion behind the scenes at the new-look Labour party. Lord Bill Wedderburn, Britain's leading authority on trade union law, has resigned from Labour's front bench in the Lords on the eve of its debate on the trade union reform and employment

Lord Wedderburn, the 65-year-old Cassel professor of commercial law at London University, has spent the past 14 years fighting Conservative industrial relations legislation in the Lords. But he has grown increasingly

frustrated at what he sees as the lack of enthusiasm inside his party at resisting those parts of the latest measure that curtail trade union

Current Labour tactics consist of concentrating on opposing the abolition of wages councils and trying to improve the government's Bill on sex equality issues, but keeping away from proposed changes in more sensitive clauses that cover trade union organisation, such as the right of a worker to join any union of his choice.

Wedderburn can't stand this sort of pussy-footing any longer and intends to get on the record his own objections to the bill from the backbenches.

Aitch-oo

■ British Gas's directors were feeling the chili yesterday as they presented their annual results which bore the scars of heavy regulation and last year's

unhelpfully clement weather. The atmosphere was hardly improved when the letter "h" fell off the British Gas sign which was hanging behind their heads and

clanged on to the floor. "Times are hard and the squeeze is on," muttered the deadpan chief executive, Cedric Brown, through

Europe's economic woes will be high on the agenda of G7

OFFICIALLY, it will be a "get to know you" session, with no decisions or communique planned. But tomorrow's meeting of the Group of Seven finance ministers and central bank governors in London could turn out to be one of the more important gatherings

of the policymaking group - as well as giving Mr Lloyd Bentsen, and Mr Yoshiro Hayashi, the recently appointed Japanese finance minister, a chance to meet G7 colleagues.
The ministers - from the US,

Japan, Germany, France, Britain, Italy and Canada - will be meeting in extremely difficult circum-

· Europe's economy is causing particular concern, with output in Germany and France falling and threatening to pull the rest of the continent into recession. Japan is facing one of its most serious economic crises since the second world war and its trade

surplus is growing. Protectionist pressures, encouraged by difficult economic conditions, are again emerging as a threat to world trade and wel-

 Currencies are under renewed strain with the yen testing new highs against the dollar and sterling and the lira fluctuating around historic lows against the

• Of the G7 industrialised democracies, only the US has a politically strong administration. Mr Brian Mulroney's resignation this week as Canadian prime minister has come hard on the heels of corruption scandals and a cabinet reshuffle in Italy. France's socialist government is facing defeat in next month's National Assembly elections. The centre-right coalition in Germany has so far failed to produce con-

The US and Britain are among the few bright spots in a bleak global economy, according to the latest quarterly worldwide survey of business optimism from Dun & Bradstreet, the business information group. The survey of 11,000 executives in 16 countries recorded a sharp increase in sales and profits expectations for the first quarter of this year among managers in Britain, while hopes in the US were steady at a relatively high level. However, in Europe as a

and social problems caused by unification. Japan has a weak

their lowest level since 1988

Since sterling's exit from the European exchange rate mechanism last September, the British government of Mr John Major has been among the west's walking wounded, with the Conservative party divided over Europe and unable yet to declare an end to the longest recession since the second world war.

The US, by contrast, appears to have returned to growth with a charismatic young president and a programme to break years of budget gridlock in Washington. But in terms of international economic policy, President Bill Clinton's administration is very much an unknown quantity. Other G7 members will be looking to Mr Bentsen for clarifi-

Mr Bentsen has said that he wants to revive the G7 as a forum for co-operation, putting a recent history of bickering behind it. But nobody has a clear idea of his plans while some of the new US administration's actions over trade and currency have unsettled America's partners. The Japanese have come away

whole sales expectations fell to

ling wrong-footed on currencies. US officials first gave private assurances that Washington was not seeking an increased value for the yen to combat Japan's growing trade surplus, only for Mr Bentsen to say last Friday he favoured a higher yen. Efforts have since been made

to play down Mr Bentsen's remarks. Indeed, the US Treasury line is to support Mr Hayashi and plans for fiscal stimulus in Japan. Mr Bentsen may simply have spoken out of turn.

Recent US moves against imports of steel and leisure vehicles and Mr Clinton's adverse comments about the European Airbus programme are difficult to reconcile with the president's pledge to put a "real effort" into completing the Uruguay Round of world trade talks. The UK hosts of the meeting

think that the US administration will support the multilateral trading system and that its trade grumbles concern "specifics". It is clear, however, that the

new US adminstration will put America first as part of its policy to revitalise the economy. Mr Bentsen pushed hard for tomorrow's meeting, suggesting that

Business sales expectations

allies through action to boost growth and combat unemploy-

The German delegation can expect to be questioned over the Bundesbank's monetary stance. Mr Theo Waigel, the German finance minister, will seek to reassure his partners that the Bonn government is pressing ahead with its solidarity pact, with its provisions for curbing the budget deficit and controlling wages. There may even be discreet hints of an early cut in Bundesbank interest rates to ease the pressure of Germany's tight monetary policy on its partners

Mr Norman Lamont, Britain's chancellor of the exchequer, will point to the UK's expansionary fiscal policy and the substantial easing of monetary policy since September as evidence that Brîtain has "done its bit" for global growth. Japan may outline a new fiscal package. But the atmosphere of the talks

will be as important as the substantive discussions. Numerous economic problems are looming beyond the G7's boundaries, with near hyperinflation in Russia top-

THE LEX COLUMN

An Imperial past

shareholder value, ICI's demerger has got off to a poor start. Paying a por-tion of this year's dividend out of reserves only to ask for the cash back in June is hardly the most tax-efficient way to proceed. If the demerged chemicals side keeps its promise to main-tain the pay-out this year, that may also come indirectly from the proceeds of Zeneca's rights issue. Shareholders might equally be forgiven for balking at the £75m cost of separation. These misdemeanours will only be forgiven if demerger reverses ICT's long-term lecline relative to the market.

Yesterday's 6 per cent rise in the shares is therefore encouraging. The promise of a maintained dividend limits the downside in the near term: the yield is a match for the return on cash. But the act of demerger is unlikely to unlock much further value. Assuming a yield of perhaps 7 per cent for the degeared, demerged chemicals side results in a share price close to 500p. Given the market's suspicion of pharmaceuticals stocks and Zeneca's lacklustre performance, a yield over 5 per cent might be required to get the rights issue away. That suggests a valuation for the group not far

from yesterday's closing price. The real test is whether liberated management can transform the fortunes of the group. Shorn of cash-generative pharmaceuticals, ICI chemicals will be under particular pressure to eliminate losses and take out costs. Yesterday's £516m rationalisation provision is another step in that direction. But ICI still looks over-manned, judged against the best of the competition. If ICI's management does not deliver this time around, someone else may be tempted to step in and do the chemicals job for them. Split, the business looks much less imperial than when Hanson bought its stake.

British Gas

Not many companies go to such lengths to highlight their weaknesses as British Gas. But then not many companies' fates depend so hugely on the outcome of a Monopolies and Mergers Commission inquiry. If British Gas's directors owned hair shirts, they would surely have worn them yesterday. Annual profits were hit by £320m of extremely prudent exceptional charges. By refraining from capitalising interest on £1bn of exploration expenditure, the company further

depressed its bottom line. At the operating level, the results FT-SE Index: 2828.7 (+11.7)

th price galation to the Liver pages Composite Liver

contained few surprises. Ofgas's pric ing regime is clearly squeezing the company, forcing it to cut costs to improve efficiency. The effects of more rigorous competition are also becoming apparent. For the moment at least, weather remains a greater vari-

able affecting profitability.
Gas's shares are supported by a dividend yield above 6 per cent. The MMC's conclusions could send them sharply either way. Having seen their shares climb 20 per cent since the referral, nervous investors may wish to switch into other utility stocks until the horizon clears. But the suspicion must be that the company's plight will ease. The MMC is due to report in April - probably just before the government launches its third sale of shares in British Telecommunications. That would be an embarrassing moment for the government come down hard on a privatised utility.

The patrician sang froid of the Shell board in London yesterday was in marked and unwelcome contrast to the ritual slaughter at Showa Shell in Tokyo. While there are some decent excuses for the failure to pick up the unauthorised forex dealings, a little public abasement goes a long way towards drawing the sting of tabloid criticism. It is also a bit thick for Shell to hide behind Showa Shell's associate status as an explanation for lack of control. Associate or not, such compa-

nies can bite back. Still, at least Shell could find plenty f plusses to fill in the hole in its preliminary figures. The artificial

assistance of tax credits and, ironi-

cally enough, foreign exchange move-ments, rather flatter the total. At the operational level, things remain tough European chemicals losses are accelerating and the situation will not improve without substantial retrenchment. Refining margins remain low and production cannot offer much further help without a significant rise in

4

the oil price. Barnings in dollar terms are likely to fall this year, which explains the cautious 5 per cent final dividend increase at Transport and Trading. Indeed, the final dividend at Royal Dutch rose by a mere 2 per cent -presumably because continental investors take a longer view than those in the UK. Only the continued weakness of the pound will make things look better, come the 1993 sterling

Royal Insurance

Royal insurance is obliged to make a virtue out of its capital constraint. Since growth prospects are limited, it aims to improve profitability by increased operating efficiency. It is thus less likely than better endowed competitors to succumb to excess in the upswing. Lloyds has shown that money can be made by shrinking and cutting costs in banking. But Royal is unlikely to acquire similar status in insurance. For one thing, its competitors are also bent on greater efficiency. For another, any battle for market share can ruin pricing for everybody. In those circumstances, a little spare capital is always a comfort

Royal could hardly raise fresh equity now. Things might look different next year, given the improving trend on a range of fronts from reinsurance to estate agency. Its rebased dividend could then be increased modestly and still be well covered. The market might even welcome a rights issue next year on the albeit shortsighted grounds that enhanced growth prospects would narrow Royal's discount to the rest of the sector.

Those with strong nerves might be tempted to hold on until after Royal has managed to raise some capital and before the proceeds have been frittered away. That is a gamble, though which assumes that mortgage indem nity losses will continue to fall in 1994. The opposite could happen if building societies step up repossessions as soon as house prices have risen to the point where the entire loss is covered by

US president strongly restates his support for Russian leader's policies

Clinton to meet Yeltsin in April

MR Bill Clinton and Mr Boris Yeltsin, the US and Russian presidents, will hold their first summit meeting on April 4, at a venue yet to be decided.

The announcement was made by Mr Warren Christopher, US secretary of state, and Mr Andrei Kozyrev, the Russian foreign minister, at a joint news conference which followed a three-hour meeting in Geneva yesterday . Mr Clinton had hoped the

meeting, which would be his first foreign trip since becoming president, could be held next month. But Mr Kozyrev said the agenda could be so extensive as to require considerable preparation.
The US president is also looking for ways of helping Russian reforms and engaging

scow in global problem: including peace in former Yugo-

He has also sought to dampen talk in Washington that Mr Yeltsin's own position was becoming increasingly parlous. A holdover Bush appointee at the State Department was this week removed from his post for saying the Russian president might not be a reliable partner because of his domestic political difficulties. Mr Clinton rejected this and

summer in Washington. Mr Christopher said in Geneva Mr Clinton had asked him to underscore "his strong personal support for the reform policies of the Yeltsin administration". For his part Mr Yeltsin will want to reassure Mr Clinton that bulatov told them the plans were

expressed full confidence in Mr

Yeltsin, whom he met briefly last

icy objectives to the west although it would like more help with its economic reforms. Mr Yeltsin is expected to press

Mr Clinton for more financial help, as well as an increase in US government incentives to attract American companies to Russia. Professor Jeffrey Sachs, the US economist who advises the Russian government, arrived in Moscow yesterday for discussions on his latest proposals on how the west can best underpin con-

tinuing reform efforts. Yesterday Mr Yeltsin suffered a fresh humiliation in his battle with the chairman of the Russian parliament, Mr Ruslan Khasbulatov. Deputies refused to discuss Mr Yeltsin's proposals for a constitutional truce after Mr Khas-

reduce inflation," he said. High

domestic interest rates would not be eased until salary restraint

brought down labour costs and

boosted competitiveness. Mr Gonzalez said he would resist calls to inject economic growth artificially and had no intention

of letting the peseta float. The business leaders, currently facing overnight money market

rates of 19 per cent, gave Mr

Gonzalez a lukewarm reception. The leader of the CEOE called

the pro-union strike law spon-

sored in parliament by Mr Gonz-alez's party "a declaration of

war" against the business com-munity. Earlier, the CEOE's chief economist had urged a major

devaluation of the peseta, even at the expense of leaving the ERM.

days, the Bank of Spain reduced its intervention on the money

markets as pressure on the peseta eased. Dealers said there

ally drained of liquidity.

For the first time in several

He also managed to persuade parliament to put off until next Thursday a debate on whether to call a special congress to discuss the plans. This followed a presidential request for parliament to discuss the issue yesterday.

During Mr Christopher's meeting with Mr Kozyrev they discussed the Middle East, the conflict in ex-Yugoslavia, arms control, and US support for Russian economic reforms, all of which are likely to feature in the summit. Mr Kozyrev said they had also talked about co-operation in trade and investment, rescheduling Russia's foreign debt and Russian sales of conventional weapons "in full compli-ance with" international rules.

Major ends visit, Page 3

GM fund for laid-off workers runs out of cash

By Martin Dickson in New York

OTHE FINANCIAL TIMES LIMITED 1993

UP TO 11,000 blue-collar workers at General Motors are expected to be indefinitely laid off next week as a fund, set up by the troubled car company to keep unneeded workers on full pay, runs out of money.

The development could cause friction between GM and the United Auto Workers union at a time when the company is seeking union co-operation in its massive restructuring programme and before crucial talks next autumn on a new three-year labour contract.

The job guarantee programme was established in 1990 under the three-year labour agreement expiring this year. It created a \$1.7bn fund for a Job Bank, which allowed UAW workers laid off for at least 36 weeks to be called back to work indefinitely at full pay, even if there was no particular job for them to carry

GM has begun notifying workers involved in the scheme that it is expected to run out of money next week. About 20,000 workers are

some 9,000 of them are expected to take early retirement under a programme negotiated by GM and the UAW late last year. According to GM, those indefi-nitely laid off will continue to receive for 26 weeks some 95 per cent of their pay, thanks to state unemployment benefits and money from the company's supplemental unemployment bene-fits scheme. The GM unemploy-ment scheme, established under the 1990 UAW pact with \$1.65bn of funds, is expected to last the

life of the current contract. The early retirement offer, which is due to close at the start of March, is part of GM's effort to shrink its hourly-paid workforce by about 13 per cent, from 288,000 to 250,000, as it cuts its size to reflect its reduced share of the US car market. It is also planning to close 21 plants during the next

few years.
The UAW's agreement to the retirement programme last December was taken as a sign of improving relations between the union and the company after a series of autumn strikes, several of which appeared to be UAW warning shots over the compa-

Equitable sharply reduces deficit to \$128m from \$898m

By Nikki Tait in New York

THE Equitable, the large but troubled US insurance group in which France's Axa holds a 49 per cent stake, yesterday reported an after-tax loss of \$28.9m in the final three months of 1992.

This was a sharp reduction on the \$246.9m deficit registered in the same period of 1991. The Equitable, which recently

completed a lengthy "demutualisation" process that turned the company into a shareholderowned company, said that if results were confined to "contimuing operations" the 1991 final quarter deficit stood at \$161.3m, with the 1992 figure remaining at \$28.9m.

The fourth-quarter results mean that The Equitable is posting a \$128.6m deficit for the year after tax, compared with an

\$898m loss in 1991. However, both these figures are

1992 figure comes after a \$101.3m extraordinary charge to cover demutualisation expenses, and the 1991 result after a \$28.9m extraordinary item and a \$561.9m loss from discontinued operations. The insurer said that the loss from continuing operations, and before extraordinary charges, improved from a \$307.8m deficit in 1991, to a \$32.2m loss last year.

muddied by special items: the

Within the core insurance divi-sion. The Equitable reported an annual after-tax loss of \$7.5m, against a \$44.8m deficit in 1991. The 1992 figure excludes a loss on investment transactions of \$22.7m and \$15.6m of restructuring charges.

However, investment services operations - which include the Donaldson, Lufkin & Jenrette brokerage business and Alliance Capital fund management arm turned in after-tax profits of \$192.5m, up from \$111.6m.

Emiko Terazono and Robert Thomson report on how Japan is in danger of throwing away a decade's progress in market reforms

Tokyo wrestles to shore up stock prices

otherwise undistinguished Tokyo office building, the electronic boards of large securities dealing room flicker on the wall as white-shirted men hunch over terminals. The setting is the ministry of posts, part of the government rescue team attempting to prop up stock prices. Stock prices have fallen 56 per cent during the past

There are fears that companies financial and non-financial, will offload stocks in coming weeks, bolstering their own accounts, but further undermining the market. Mr Gaishi Hiraiwa. chairman of the Federation of Economic Organisations (Keidan-ren), has expressed "serious concern" about any sell-off and the consequent "price plunge".

The government has urged banks and life assurers not to sell shares. The Bank of Japan has cut official interest rates, in theory making stock investment more attractive. Disclosure rules have been relaxed by the finance ministry, which expects financial institutions will keep their side of the no-selling bargain.

The campaign is however having a serious side-effect in the financial markets. After a decade of slow and selective reforms to make markets more open, financial officials are returning to wink-and-nod tactics. They are reviving the cosy relationships severed during the stock industry scandals of the past two years.

The four biggest brokers -

Nomura Securities, Daiwa Securities, Nikko Securities and Yamaichi Securities - are quick to remind ministry officials of the industry's successful Black Monday salvage operation in October 1987, when the Nikkei's fall was limited by concerted buying.

Now the aim is to keep the Nikkei average at about the 17,000 level until the close of the financial year next month. The longer-term goal is to hold prices steady until there is a recovery in investor demand for stocks. That strategy is supported by a range of Japanese institutions now under pressure:

 Banks. The lower the Nikkei, the lower their capital adequacy ratios, which must be above 8 per cent at end-March to meet international standards. The banks also plan to write off some of the their non-performing property

offs on stock portfolios.

• Life assurers. They rely on

unrealised gains on their stock portfolios to cover other losses, including heavy losses on foreign bond investments. Stock profits are needed to make up the differ ence between the average divi-dend, about 6.5 per cent, and the return on the assurers' total investments, which has fallen in tandem with official interest

Brokers. They must deal with losses on their in-house stock portfolios, and they welcome government attempts to support prices, as investors may return to the market if given the impression that the downside risk is

• Industrial companies. Big stock investors during the "bubble era" of the late 1980s. Each time the Nikkei falls, they are further weakened. Their unrealised stock gains, a measure of corporate strength in Japan, are depleted, and write-offs are ris-

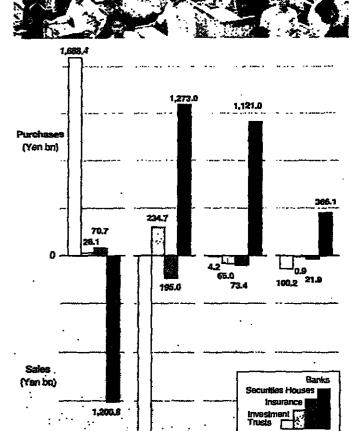

ach sector is waiting for the others to start buying stocks. Most potential investors feel prices will continue to fall, and dividends are no incentive to buy; the average yield on Nikkei stocks last year was 0.89 per cent. Japanese brokers were big sellers last year. The finance ministry has

"advised" banks, life assurers, and brokers not to dump stocks in an attempt to realise profits this year. The ministry will bend accounting rules and allow assurers to book unrealised gains. The ministry is making other

favourable rule changes. It has relaxed controls on employee share ownership. The use of companies' funds to buy their own shares is now being debated. These changes will not be

enough if stock prices spiral downward. Last August, the Nikkei hit 14,309.41, its lowest level in six years, prompting the government to announce that an extra Y1,120bn in public funds would be available for stock

It also announced an emergency public spending package Another may be introduced this year, but the use of public and postal funds is controversial. Japanese who deposit money at the local post office do so on the

understanding that it will be used conservatively. Japanese brokers, ministry offi-

1990

cials, and the ruling Liberal Democratic Party are looking to history for examples of successful salvage operations. The government accepts that there are limits on the direct use of the public's funds for stock purchases.

The most obvious model for a market rescue is the operation of the early and mid-1960s, when investment trusts, the Japanese version of mutual funds, were overwhelmed by loss-making stocks. Prices in early 1964 were 25 per cent lower than three years earlier, demand had virtually disappeared and fears of broker collapse were rife.

The government established the Nihon Kyodo Shoken (Japan Securities Co-operative) in 1964, which bought shares with funds received indirectly from the Bank of Japan. The buying operation was unsuccessful, prompting the government to back a brokersrun Nihon Shoken Kumiai (Japan Securities Association), which purchased stocks directly from

the ailing investment trusts and was regarded as a success. The crucial between the two organisations was that the former attempted to buy against a tide of selling, while the latter attempted to stop the selling by accepting unwanted shares from the investment trusts.

1993 to date

Another lesson was the importance of collective action. Commercial banks contributed to the rescue by feeding money into the market. There are clear signs that the collective mentality is returning. The securities industries scandals of the past three vears were supposed to end the exclusive relationships among the finance ministry, the brokerages and the banks. Now severe market conditions have begun to draw old players together again.

Instead of letting prices fall to a level at which buying will resume, the government and the financial industry are intent on defying gravity. The financial system is reverting to old habits, becoming more opaque, and increasingly serving institutions rather than investors.

SKF scraps dividend as falling demand pushes loss to SKr1.8bn

By Christopher Brown-Humes in Stockholm

SKF, the world's leading roller bearing maker, has scrapped its dividend after slumping to a SKr1.8bn (\$237m) loss in 1992. The result was in line with the group's December forecast and reflects the impact of depressed markets, restructuring and heavy losses within Ovako Steel. In 1991, when the group paid a SKr4.25 dividend, its loss was SKr221m. This is the first time the group has not paid a dividend

24 24, 17

Sales rose to SKr26.65bn from SKr26.3bn, thanks to the consolidation of Ovako Steel which had previously been reported as an associate company. Excluding Ovako, sales were 7 per cent lower at SKr24.37bn.

trend accelerated towards the end of the year. The group has been particularly badly affected by the drop in European car production and Germany has become a difficult market. By contrast, conditions improved in the US and the group increased its sales and earnings there for

the second consecutive year. The group expects to make another loss in 1993 because of continuing poor conditions in its main European markets. "Last year we finished weakly, and this year we have started weakly," said a spokesman.

The group's 1992 result includes a SKrl.1bn provision to cover further restructuring in 1993 and 1994 when the group expects to shed an additional

European market, which accounts for 60 per cent of its sales, declined steadily, and the 5,000 jobs, bringing staff levels down to 42,000 by 1995.

The group's core business, The group's core business, rolling bearings and seals, saw 1992 sales fall to SKr22.69bn from SKr24.35bn, while the loss after financial items increased to SKrl.26bn from SKrl35m.

Its second main business. Ovako Steel, reported a SKr442m loss on a drop in European special steel demand. It is expected to remain in the red this year.

SKF has been increasing its focus on its rolling bearings and seals operations, leading to the sale of its tools business, CIT Tools, to Sandvik AB from the start of this year. Last year the tools business made a SKr117m loss on sales of SKr1.73bn.

The loss per share before extraordinary items was SKr13.20, compared with SKr10.40

The group said demand in the Shell lifts profits 8% to £3bn

By Deborah Hargreaves in London

since 1923.

THE ROYAL Dutch/Shell group,

the multinational oil company, saw profits rise 8 per cent last year in spite of lower oil prices and the first annual loss in its chemicals business for a decade. A rise in oil production accompanied by cost-cutting and an increase from exchange rate gains pushed Shell's profit up to £3.12bn (\$4.46bn) from £2.89bn on a replacement cost basis which strips out gains and losses from holding stocks. Sir Peter Holmes, chairman of Shell Transport, the

company's UK arm, said 1992 had

been a difficult year. "There was

little respite on prices and no

respite for chemicals, but the core business did well. Now

we've got to move on and do bet-

ter on the chemicals side."

The company made a provision of £131m to cover its share of the Y125bn (£744m) of potential losses on currency speculation at its Japanese associate, Showa Shell Sekiyu, and said it would make an additional provision of 265m in the first quarter.

Sir Peter said: "I'm staggered by the scale of the losses and staggered it could happen at all." Top managers at Showa Shell resigned yesterday as they accepted the blame for the unauthorised currency dealings.

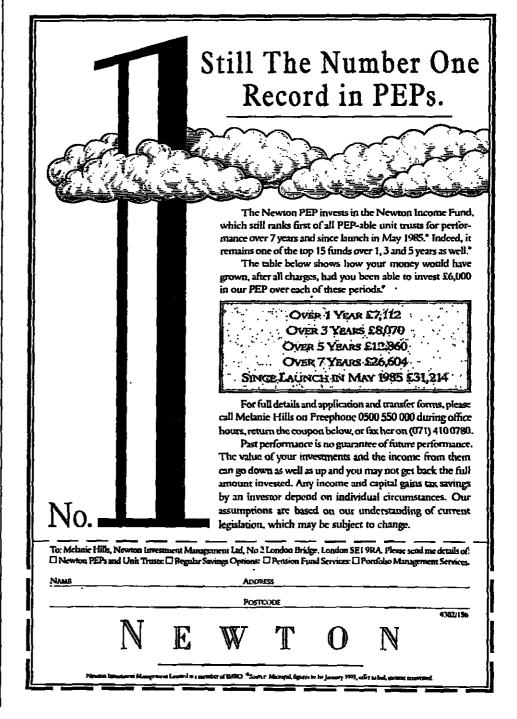

However, the group as a whole benefited from favourable exchange rate movements in 1992 to the tune of about £400m and the company's results included a special credit of £425m from changes in pension provisions in Sir Peter said the outlook for

chemicals was better this year

and the company planned substantial investments in all of its businesses during the next five years. Capital expenditure is planned to reach £7bn this year, up from 26hn last year, which showed a 9 per cent decline from the year before.

He said the chemicals division is planning to cut about 10 per cent of its jobs, but that invest-ment will be made to increase the division's geographical spread. "These figures are quite good,

but a lot of the gain comes from currency movements and that is reflected in the company's extreme caution on the dividend," said Mr Nick Antill, analyst at Hoare Govett, the UK stockbrokers. Shell increased its payout for the year by 4.8 per cent to 21.9p a share. Lex. Page 16; Details, Page 24; Top two at Showa quit, Page 22

Exceptionals leave ICI £384m in red

BATTERED BY the long recession and reorganisation costs; imperial Chemical Industries, yesterday reported a £384m pre-tax loss for the year to December 31, following

exceptional charges of £949m. Pre-tax profits before exceptional items fell 28 per cent from £789m to £565m as demand and prices softened for many products.

The results were prepared according to the new FRS3 accounting standard.

The pre-tax profits, which compare with £843m in 1991, were achieved on a turnover of £12.1bn (£12.5bn). The board maintained the full-year dividend at 55p with a second interim of 34p, although it was paid from reserves.

The exceptional charge was to cover restructuring activitles, including disposals, closures, write-downs of certain asset values, a re-es environmental liabilities and iemerger costs.
Rationalisation costs were

2516m, including 2313m for employee-related costs, principally severance, and £160m for et write downs and provi-

A further provision of £148m was made for environmental costs, particularly for cleaning up soil and groundwater in the US. Loss on sale and closure of operations provisions were £191m. Reorganisation costs for the demerger, including professional fees, product registra-tion and labelling costs, amounted to £75m.

Lower selling prices and disposals accounted respectively for 1 per cent and 3 per cent of the fall in sales. Favourable

exchange rates increased sales by 1 per cent. UK turnover fell £350m, equivalent to 14 per cent of sales.

Sir Denys Henderson, chairman said the results reflected difficult trading conditions throughout 1992. He added that the recession in the UK, which had now lasted three years. had been one of the deepest since the 1930s.

"Signs of recovery from recession are patchy, but lower interest rates, a more competitive pound, low UK inflation and some indications of the US markets picking up plus the major restructuring efforts should ensure a better year ahead for ICI and Zeneca. On a pro forma basis

reflecting the pending split, trading profits before excep-tional items at the newlyformed Zeneca, which includes ICI's drugs, agrochemicals and seeds, and specialities businesses, fell from £682m to 2587m. Sales increased from £3.93bn to £3.98bn.

Pharmaceuticals trading profits fell from 2536m to £488m on turnover of £1.61bm (£1.55bn). Sir Denys said this was mainly due to the effects of generic competition against Tenormin, Zeneca's heart drug. the US patents for which recently expired. Sales had fallen by between 40 and 50 per cent instead of the expected 30

to 35 per cent. Agrochemicals and seeds trading profits dropped from £145m to £85m on turnover of £1.29bn (£1.32bn). The results were affected by intense price competition in the US and Sales in eastern Europe had

common agricultural policy had also had an impact.

Mr David Barnes, Zeneca chief executive, warned the worst of the impact of the CAP reforms were yet to come, with a possible 3 to 5 per cent fall in the European market this year. Specialities operating profits fell from £29m to £26m on sales of £936m (£916m). Mr Barnes said the colours business had had a difficult year.

Zeneca's results included losses of £12m (loss of £28m) on sales of £148m (£142m) under the heading of trading and mis-

announced today." Rowever, he ruled out any suggestion that the trade unions at ICI would call on

will not just involve actual About 1,000 employees will

However, the unions will seek assurances from management that if there are to be redundancies they must be on

Higgs. "The unions are not pleased, to put it mildly, at what the company has

The unions intend to press the company to invest more in the UK during the next few years and to diversify its product range.

They remain extremely worried about the likely effects of the proposed demerger, how-

Last July, when ICI mounced its intention to solit the company in two, Mr Higgs denounced the move as "a betrayal of the workforce" that demonstrated "a total lack of commitment by ICI's board to maintain the company as Britain's largest manufactur-

ing concern' We still do not think the demerger is in the best interests of our members," he said

"The company is going to become much more vulnerable to a hostile takeover bid when it is no longer a single Two-thirds of the UK workforce will be in the new ICI

which is badly affected by depressed chemical markets, its global manpower of 114,000 their members for industrial action. "Striking would just make the situation worse," he will be in ICI and a further Robert Taylor That follows a cut of 21,000 £1.3bn rights issue cools investors'

enthusiasm for bioscience demerger

greeted ICI's plan to demerge its bioscience business with resignation but no great enthusiasm yesterday. Several said they failed to see strong investment attractions in

There was particular concern that, in ending its year with higher-than-expected debt of £2.3bn, ICI would have to accompany the Zeneca demerger with a rights issue

as large as £1.3bn.
"The world is a lot different now from nine months ago, certainly in terms of the valuation of pharmaceuticals stocks," said one large institutional investor. "And the tradnot got any worse but it need convincing that the ing position for bulk chemicals

certainly has not got any better. The amount they are seek-ing to raise smacks slightly of robbing Peter to pay Paul, in that they have committed to pay a level of dividend on the difficult bit - the bulk chemical side - of the business."

Shareholders were universally unimpressed by the 71p rise to £11.53%p in the share price yesterday after the demerger news. Not only did the rise follow a run of recent falls, but institutions said the stock had attracted heavy interest from US investors attracted by the yield of more than 7 per cent. Once the stock went ex-dividend, this interest might be reversed, they said.

alchemy of demerger whereby the value of the sum of the demerged parts is greater than the whole would work. "We are not saying we are against demerger in principle nor are we saying that the pharmaceuticals divi-sion needs to be an integrated part of ICI," one invester said.
"But we are struggling to see

whether two and two does in reality make four and half." Some shareholders were also surprised at ICFs choice of raising finance through the demerged Zeneca rather than through ICL. Given the marked underperformance of the pharma-

ceuticals sector since ICI announced it would demerge

last year, Zeneca may be rated

has recovery potential. There is also a large expec tion that ICI's bulk che business is about to benefit from recovery, even though ICI is fairly dependent on sales to continental Europe, where economies are slowing down. Shareholders recognize this operational gearing but accept they will have to more patient

unless ICI and its advisers can dissuade them from this lessthan-enthusiastic view, they might sell enough ICI to take up the Zeneca rights without having to put any new funds

Richard Gourlay grew 30 per cent, while Diprivan, an anaes-

Focus will be on core businesses

THE ICI left behind after spinning off Zenecz is the world's sixth largest chemical group, with sales of more than 28bn a year. It still manufactures a large range of products: from bulk petrochemicals to high-performance plastic films. from chlorine and canstic sods to paint and explosives.

However, the range of activities is likely to be much nar-rower by 2000. Mr Rosnie Ham-pel, chief executive of the new "plain vanilla" rights issue from Zeneca, to coincide with ICI, says the company "is the demerger in early June, may have been the price it had going to focus during the 1990s to pay for investor support for on areas where we can be successful globally". ICI shares rose sharply yes-terday although the size of the issue at about £1.3bn is higher

That will mean continuing the process, started two years ago, of selling or closing down activities in which ICI is not one of the world's top three companies. The UK-based petrochemical (olefins and aromatics) and chlor-alkali (chlorine and caustic soda) ses are high on the dis-

posals list. "The decision taken in the early 1980s to restrict petrochemicals and chlor-alkali to Europe turned out to be wrong," says Mr Hampel. "The error of judgment was to

be operated on a regional rather than a global basis." He believes that the world petrochemicals industry is about to undergo large scale restructioning, which will end up with about five global groups manufacturing on an integrated basis from oil and gas feedstocks to finished plastics. ICI is not going to make the investment required to be one of them.

Another error of the 1960s. as ICI moved away from bulk commodity chemicals, was to expend into too wide a range of higher value-added products. That too will be corrected, Mr Hampel says. "Some businesses in the portfolio will not survive. Those that are not global or not making an adequate return on capital must

The global businesses on which ICI will be relying for growth to make up for cuts ewhere include: • Paints, ICI is the world's largest paints manufacturer and, with its Dulux and Glidden brands, is particularly

Explosives. The 1990 actualisation of Atlas in the US made ICI the undisputed global leader in explosives. The prod-ucts are used mainly in mining and quarrying, although Kd hopes that safety airlags for cars will represent a fastgrowing new market: a mini-explosion of sodium szide filis the bag with gas in the event

 Chlorofinorocarbon substi-tutes. Although ICI is losing revenue through the global phase-out of CFCs to protect the ozone layer, it is investing heavily in ozone-friendly hydrofluorocarbons to replace them. The leading substitute in the UK, US and Japan. • Specialised plastics. By swapping ICI Fibres for Du Pont's acrylics division, ICI became the world's leading producer of acrylics. It is also

strong in polyurethane foams and polyeier films. The paints and explosives businesses have traded steadily through the recession. During the three years from 1990 to

2550m for explosives, while profits were 2115m for paints and 255m for explosives. The outlook for both divisions is for slow, steady growth in turn-over and profits.

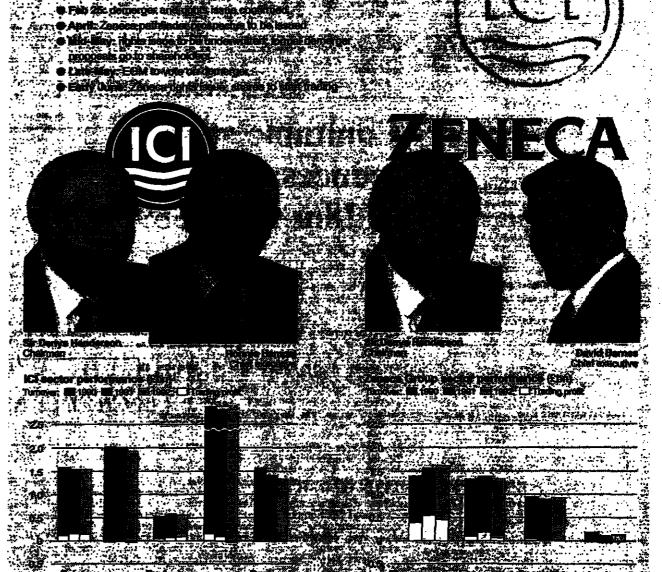

In contrast, the remaining parts of ICI – materials and industrial chemicals – have suffered a decline in sales and profits. They made a trading loss of £42m on £5.4bn turnover in 1992. There is an opportunity for a sharp revival in profits as the world economy recovers, but analysts see no prospects of the exceptional

returns in the late 1980s. Mr Hampel says ICI will inevitably remain an essentially cyclical company, but his long-term aim is to achieve on average a 20 per cent return on

capital employed.

The other executive directors of ICI will be Mr Chris Hampson, Mr Rob Margetts and Mr Colin Short, Non-executives will be Sir Anthony Pilkington, Miss Ellen Schneider Lenné and Mr Paul Volcker.

Tenormin sales collapse hits Zeneca

ZENECA, ICT's newly formed bioscience company, will comprise the group's drugs, agrochemicals and seeds, and speciality micals divisions.

With an annual turnover of nearly sabn, Zeneca's products range from betablockers to dyes, genetically engineered tomatoes and herbicides to anti-cancer drugs. It will be about the 15th largest bioscience group in the world.

Mr David Barnes, Zeneca's chief execu-

tive, faces a considerable challenge put-ting the company back on the rails. Last year its operating profits fell from 2682m to 2587m. All three divisions encountered

The main short-term problem was in drugs. American sales of Tenormin, ICI's heart drug and once the world's fourth biggest-selling medicine with a turnover of \$1.18bn, collapsed by as much as 50 per cent last year. The fall followed the expiry of Tenormin's US patents.

Mr Barnes says the group had expected a fall in Tenormin sales of between 30 and 35 per cent but the drug proved an sistible target for generic manufactur-"It was the single largest-selling product

to come off petent since the generic indus-try was set up," he says. He expects Tenormin's US sales to stabilise at between 25 and 30 per cent of original

Tenormin's collanse affected not only sales but also profits, admits Mr Barnes. Tenormin was a high-margin product. Newer groducts offset the fall in Tenormin sales - pharmaceutical turnover was up from £1.55bn to £1.61bn - but operating profits fell from £536m to £488m. Sales of Zestril, a newer heart drug,

both rose by 50 per cent last year. These three products represent 30 per cent of Zeneca's drugs sales.

Much of the future of Zeneca depends on new drugs in research and development.

Mr Barnes is dismissive of those who

argue the pipeline is thin. The quality of the pipeline of new products is better than at any time in the last 35 years." he says. He points to Merrem, an antibiotic,

which was filed for licensing last December. Casodex. a treatment for prostate cancer, and Accolate, a promising asthma treatment, will be filed next year. Mr Barnes says the group is moving from its core of anti-cancer and heart drugs into new therapeutic areas such as asthma, in which the group has less mar-

"We will look at all forms of strategic alliance," he says. These will include alliance," he says. These will include cross-licensing, co-marketing and even acquisition. But Zeneca is not racing out to buy another company.

Nearly all of Zeneca's earnings growth for this year at least — will come from pharmaceuticals. The main impact of Tenormin's US decline has probably come to

Meanwhile, the new products will continue to grow. The group will also benefit from currency changes — about 40 per cent of drug sales are in the US.

While the drugs division has been suffer. ing, so, too, have the agrochemicals and seeds operations. Trading profits fell from £145m to £85m last year on turnover down from £1.32bn to £1.29bn. The decline would have have been worse but for rigorous cost-con-

Pricing pressure and a cold wet spring

thetic, and Zoladex, a cancer treatment, in the US dented turnover, as did a 30 per cent plunge in sales to the East European

accide (PT) 4/0 million

between 3 and 5 per cent last year in the west European agrochemicals market after the announcement of the reforms of the common agricultural policy. Mr Barnes said there would be a continuing decline in Europe this year, perhaps of between 1 and 2 per cent.

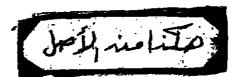

Meanwhile, specialities have also been hit by the recession. Colours, which represent about 30 per cent of the division's 2936bn turnover, have been suffering par-ticularly, since their performance is tied to the textile industry.

Mr Barnes accepts that the division's profits of £26m on such a large turnover is unacceptable. However, he insists the colours operations are not for sale.

For the next couple of years, any improvement in Zeneca's earnings is likely to come from renewed growth in pharmaceuticals, currency benefits and cost-Specialities should benefit from an

upturn in the economic cycle, when it happens. But the problems at the agrochemicals operations are more related to structural problems within the industry and are unlikely to be resolved quickly. The other executive directors at Zeneca will be Dr Peter Doyle, Mr John Mayo, Mr Alan Pink and Mr Tony Rodgers. The non-executive directors will be Lord Chilver, Sir Richard Greenbury, Miss GIII Lewis, Sir Jeremy Morse and Mr Tom

Gota Bank operating loss deepens to SKr2.4bn

By Christopher Brown-Humes

GOTA BANK, the troubled Swedish bank under state control, saw its operating loss deepen to SKr2.4bn (\$306m) in 1992 from SKr1.9bn a year earlier after credit losses more than tripled to SKr12.5bn from

The loss would have been SKr12.9bn without SKr4.5bn in financiai insurance and

SKr6bn in state guarantees. The bank said its capital adequacy ratio at the year-end stood at 8.46 per cent, although it noted that without state support its capital base would

The government agreed last

month to provide a total of of problem credits. Total prob-SKr10bn in guarantees to Gota, lem exposures, before proviso it has some additional loss coverage for the current

Credit losses ballooned well beyond the SKr8bn level predicted last September when it first became apparent that the bank would need state sup-

The bank said 96 per cent of its credit losses arose from the corporate and financial sector, and 59 per cent of this total was related to real estate. It said just 15 loss engagements accounted for 38 per cent of total credit losses

Gota was also hit by a sharp drop in net interest income because of its growing volume

arm helps lift WestLB profits sions, amounted to SKr28.7br although after provisions the By David Waiter in Frankfurt

total fell to SKr15.0bn. Operat-GROUP operating profits at ing revenue rose marginally to SKr4.1bn, but this was only Westdentsche Landesbank

after SKr2bn in financial insurrose by nearly a quarter last year, the large German public-A reconstruction of the bank sector bank reported yesterbeing carried out. Its problem loans have been trans-ferred to a separate "bad bank" But stripping out the effects

of integrating a subsidised housing subsidiary for the first time – and the income from the bank's own account trading activities - "partial" operating profits were up only slightly over the DM780m (\$487m) made in 1991.

The bank pointed put that the rise in total group operat-ing profits, to DMI.16bn last year from DM960m in 1991, was strongly influenced by the integration of Wohnungsbau-förderungsanstalt des Landes NRW (WIA), acquired from the government of North-Rhine Westphalia at the beginning of last year. Total operating earnings - which include the contribution from own account trading – would have risen by 10 per cent without

the contribution from WiA, WestLB said vesterday. Reflecting the effect of a 17 per cent increase in staff costs, partial operating profits which exclude own account trading results - rose by 11.8 per cent from DM637.3m to DM719.5m. WestLB said most

of this rise was due to WIA. Total assets of the group rose 17 per cent to approximately DM270bn, consolidating WestLB's position as one of Germany's top three or four banks in terms of balance sheet size. The contribution to assets from WfA was DM14bn, the oank said.

"Even if we disregard the special effect of the WfA integration, we were able to stabi-lise the positive development of our operating result, despite the unfavourable interest rate scenario," commented Mr Friedel Neuber, chief executive. He said this would be helped through the bank's recent expansion in the state banking sector. WestLB, the state bank for North-Rhine Westphalia, recently took a 37.5 per cent

Christiania Bank profits helped by interest income

By Karen Fossii in Osio

CHRISTIANIA Bank, Norway's second-biggest bank, has cut losses significantly during 1992 due to a huge increase in net interest income, a sharp reduction in operating expenses and a substantial cut in credit

Net losses at the state-owned bank fell to NKr1.3bn (\$187m) from NKr9.2bn as net interest income rose by NKr357m to NKr3.1bn, despite a NKr300m reduction in loan volume. Mr Borger Lenth, chief exec-

utive, hopes to reach breakeven this year, but said there was still uncertainty over corporate customers' ability to service debt

Astra chief quits after dispute over policy

DR PETER Sjöstrand resigned abruptly yesterday as executive vice-president and chief financial officer of Astra, the leading Swedish pharmaceutical group, writes Christopher

Brown-Humes.
His departure stems from a personal disagreement with Mi Hakan Mogren, Astra chief executive, over the future divi-sion of responsibilities. Neither the company nor Dr Sjöstrand were willing to elaborate.

Dr Sjöstrand, 46, Joined Astra in 1975 and has been on the group's executive committee for the past 15 years. He was secretary of the board between 1976 and 1988 and a deputy of the board since then.

German builder optimistic

BILFINGER + BERGER, the German construction group has promised another "good" dividend after further increasing profits during 1992, writes Christopher Parkes in Franktor of Today, brought in Mr David Seymour as group politifurt

The company, which increased output by 14 per cent to DM6bn (\$3.72bn), thanks to strong domestic demand, gave no details of earnings. In 1991, it paid out DM10 a share after a 50 per cent rise in net profits to DM65m.

However, figures released yesterday suggested that progress had slowed in the second half. Output rose 23 per cent in the first six months, with the domestic business up 39 per cent and overseas up almost 9

Bobst sales fall 10 per cent

BOBST, the Swiss packaging machinery group, said its sales last year fell 10.2 per cent to SFr1.01bn (\$674m), reflecting an accelerated slowdown in the last months of 1992, especially in Europe, writes Ian Rodger in Zurich.

The group expected cash flow and profit figures for the year to be lower, but to a lesser degree than turnover thanks to cost-cutting programmes.

Price changes hit British Gas

By Deborah Hargreaves

BRITISH Gas said it would cut 2,400 jobs over the next two vears after last year's profits dropped sharply following an increase in competition in its core UK market and a tough new pricing formula which forced the company to reduce prices. Profits were also hit by warmer weather.

British Gas's profit for last year almost halved to £681m (\$967m) from £1.16bn the previ-

An exceptional charge of £320m to pay for redundancies, environmental clean-up provisions and restructuring the for a large part of the profits

Mr Cedric Brown, chief executive, said the job cuts would "slim down the contract trading side and respond to the ze on margins in the tariff sector".

He emphasised that the reduction would be achieved through voluntary redundancies and natural wastage -British Gas loses around 7,000 people a year from normal

The planned cut in the workforce follows the loss of 800 jobs last year and an announcement earlier this year that the company would reduce its

headquarters staff by 1,200. Unions have blamed the job reductions on the regulator, which has imposed the tough new pricing regime and forced British Gas to give up

Securities offer by mortgage lender

By Tracy Corrigan in London

NATIONAL Home Loans, the troubled UK mortgage lender, has repackaged most of its non-performing mortgages into an offering of mortgage-backed securities in order to raise funds to repay some of its bank

The process, known as securitisation, allows the company to remove £175m (\$245m) of non-performing mortgages from its books, leaving a mortgage book of £325m. It is the

first publicly-offered issue of sterling mortgage-backed securities consisting of mortgages which are in arrears.

This is the latest sten in NHL's efforts to repay its debt and reduce heavy financing costs. The company's funding costs soared following the rescheduling of its debt, when it came close to collapse last June. "We need to restore our financial position by de-gearing," said Mr Nigel Terrington, NHL's treasurer. "With this latest deal, we will have paid

debt in nine months." The issue has been rated

triple-A by Moody's and Standard & Poor's. The rating agencies awarded their top ratings because of the high level of collateralisation; the £105m issue is backed by a £175m pool of mortgages. In addition interest payments on the securities can be delayed, to allow for the uncertain cash-flow on non-performing Details, Page23

INTERNATIONAL COMPANIES AND FINANCE

broking and banking restrictions

By Emiko Terazono in Tokyo

JAPAN'S ministry of finance yesterday announced specific rules on easing of the barrier and California's International between the country's banks Lease Finance Corporation tied and securities industries.

The Japanese government last year decided the broad outline of rule changes in the financial markets, which come into effect in April. The banks and brokerages will then be able to enter some areas of each other's businesses through subsidiaries.

The details, which are expected to be approved by the cabinet today, lays out the conditions such as costs and rules concerning "firewall" restrictions between the parent company and subsidiary.

Banking subsidiaries of brokerages will need minimum capital of Y2bn, while Y10bn will be required to set up an year's package allows banks' affiliates to issue but not to market convertible and warrant bonds and to deal in straight bonds. Banks will be kept out of stock trading for the indefinite fature.

The new rules will allow banks to deal in commercial paper, certificates of deposit placed overseas, housing loan trust certificates and card loan trusts. Rule changes which place such products as "securitles" under the Securities and Exchange Law, and are expected to bolster secondary mar-kets especially that of asset

Bangkok Bank, Thailand's largest commercial bank, said yesterday its board had approved a doubling of the company's registered capital to Bt20bn (\$788m)from Bt10bn, writes Victor Mallet in

"Whether we're going to call up the Bt10bn depends entirely on the bank's lending position," said Mr Piti Sithi-Amnual, executive vice-chair-

Bangkok Bank also predicted net profits would rise to Bt12.3bn in 1993, to Bt14.9bn in 1994 and Bt16.5bn in 1995. Last year, its net profits rose 45.3 per cent to Bt10.54bn.

Nikki Tait examines the partnership between American International Group and International Lease Finance Corp N THE world of corporate rate stripling. It was born 20 marriages, a large, conservative insurance group and go-go aircraft leasing business would seem an unpromising couple. But, two-and-a-half years after New York-based American International Group

the knot, the sceptics have fallen conspicuously silent. Yesterday, announcing annual results, AIG noted a "record" year for ILFC. The achievement was made all the more remarkable by ghastly airline industry conditions and turmoil beseting ILFC's Shan-

non-based rival, GPA. The results are only the latest outward sign of ILFC's success: its portfolio has doubled to over 200 jets during the past 30 months, while a \$4,1bn order for 82 new aircraft, placed last December, was one of the few happy moments enjoyed by air-craft manufacturers recently. Since matters are seldom simple in any leasing business,

can business really be as good as it looks? And, if yes, how has the curious coupling to an insurance colossus helped? Scepticism abounded when AIG's \$1.26bn purchase of ILFC was announced in June 1990. AIG, one of the world's biggest commercial insurers, is renowned for financial discipline, firm overseas links, and

tive, Mr Maurice "Hank" ILFC, by contrast, is a corpo-

a sharp-tongued chief execu-

years ago, when two Los Angeles-based college friends, Steven Udvar-Hazy and Louis Gonda, acquired a DC-8 and leased it to a Mexican airline. When AIG offered to buy, ILFC employed just 25 people and had posted 1989 profits of \$61.2m after-tax. Given the cyclical character of the airline business and questions about residual aircraft values, Wall Street wondered if Mr Green-

berg had taken leave of his

From ILFC's viewpoint, the desire for corporate parentage was simple: it knew capital would be needed to expand its business and build up the jet portfolio. But it feared Wali Street would be skittish about the airline industry at the very moment when money was most in demand. "AIG, in one clean sweep, became our equity source," says the company today.

ILFC's appeal to AIG was a little more subtle. "AIG felt their domestic insurance operations would not grow as quickly as our business." Mr Udvar-Hazy explains. "By aug-menting their financial services division with a company which had fast-growing earnings they could stabilise that end of their business."

Analysts make the point a little differently. "ILFC should not be viewed as part of AIG's basic insurance or even financial services businesses, but rather as an investment

Group yesterday reported after-tax profits of \$458.9m in the fourth quarter of 1992, up from \$399.8m in the same period of 1991. The figures included realised capital gains

tively, writes Nikki Tait in New York. The quarter's results take AIG's net profits total for the year to \$1.66bn, against \$1.55bn in 1991. The 1992 figure includes realised capital gains of \$64.2m, up from

of \$13.2m and \$10.3m respec-

The insurer noted that, like most of the industry, it had been hadly hit by catastrophe

\$60.7m in the 1991, and a

\$31.9m boost from accounting

vehicle for a large company in a declining interest rate envi-ronment," suggested a recent Salomon Brothers circular.

This "investment" aspect to the marriage seems to have been borne out by the minimal operational integration over the past two years. ILFC remains firmly planted on the west coast, a continent away from AIG's headquarters, employing just 43 people. The lessor's top management has stayed in place. And contact between the two businesses is limited to top-level executives.

They've had many opportunities to put a financial watchdog here...that's never been done," says Mr Udvar-Hazy. "So long as we meet the finan-

AMERICAN International losses last year - to the tune of over \$190m - but attrlbuted the results to the spread of its business.

An unpromising corporate couple's marriage still flies

For the year overail. AIG's general insurance division produced operating profits of \$1.12bn, a decline of 9.9 per cent from 1991's \$1.25bn, Feeling the impact of catastrophe losses, the underwriting deficit rose from \$4.5m to \$195m, while net investment income increased from \$1.16bn to

On the life insurance side, operating profits rose from \$561.8m to \$667.4m, while the financial services division overall made an operating profit of \$346.4m, up from

cial targets that have been established, we're effectively an autonomous subsidiary."

To keep the marriage sweet ILFC had to perform, and AIG had to provide, financial secu-rity. AIG infused \$125m of additional equity into the business at the time of the purchase and has committed another \$200m. the last tranche coming in the final quarter of 1992.

To alleviate its own shareholders' concerns, AIG made clear it would not undernin any of ILFC's debts, which run

to over \$4bn. But the solid corporate parentage still encouraged some upgrading of ILFC's debt rating. Moody's, for example, raised its rating of the senior

debt by one notch to a2, and the commercial paper to Prime-1, its highest rating.

ILFC's ability to perform in the current market is more surprising, given all the red ink in the airline industry and the fact that a glut of aircraft means lease rates are soft.

Mr Udvar-Hazy's response is that any airline leasing business becomes a financing source for carriers in the tough times, and the lessor's creditworthiness is all-important. 'Airline balance sheets are hurting," he says. "So those carriers that do need aircraft generally have to resort to offhalance sheet financing, using someone else's financial state-

He adds: "It's true we've had pressure on lease rates, but that has been more than offset by the lower cost of financing. We may have seen a 10 to 15 per cent erosion of lease rates, but we've probably had a 20 to 25 per cent decrease in our borrowing costs. In 1992, ILFC had the highest core leasing margins that we've had in 20 vears."

But what about the reliability of airline payments and the danger that aircraft can be tied up in bankruptcy or adminis-tration processes?

Mr Udvar-Hazy's response is more pragmatic. He notes all ILFC aircraft are owned "free and clear" - that is, without the company's debt-providers having any mortgage interest

Maurice 'Hank' Greenberg: renowned for his sharp tongue

and argues that this provides flexibility vis-a-vis customers. There is a firm policy of pulling back aircraft from troubled lessees at the first opportunity. As a result, 86 per cent of the fleet is leased outside the US. up from 60 per cent, and only one aircraft is operated by a bankrupt US carrier - by

But business can still be nerve-wracking. "We beat the administrator at Air Europe by nine minutes," remembers Mr Udvar-Hazy, "We had four air-craft leased there, and we filed our default notice and court papers just ahead of the administrator. We got our aircraft out of there in 24 hours, but some people had aircraft stuck

at Gatwick for 13 months." As for profits, ILFC made \$139.7m before tax in 1991, against \$123m in the previous 13-month period. In the first nine months of 1992, the figure rose to \$165.5m, against \$110m in 1991. But the company changed its depreciation poli-cles in 1992, writing down the value of aircraft more slowly. This lowered the depreciation charge - and bucked profits to the tune of \$28.4m in the first nine months of 1992.

Perhaps the most interest-ing question is how long ILFC can continue on this path? Mr Udvar-Hazy acknowledges that, once the company has built up a portfolio of 325 to 375 lets - that is by the mid-1990s - the dynam-

ics will change.
"I don't think we can handle 400 or more aircraft, the way we're set up now in terms of administrative support". he

Growth, he adds, should continue as more wide-bodied aircraft enter the portfolio. But, unless the business is radically restructured, the rate will probably slow.

But Mr Ed Matthews, head of AIG's financial services division, discourages the notion that ILFC will have then out-lasted its usefulness to the insurer. "ILFC's future rate of growth should be at treat equal to AlG's," he claims, "which, we've said, should be 15 per

Danske Bank reports DKr1.7bn loss

By Hilary Barnes

DEN DANSKE BANK reported a loss of DKr1.7bn (\$274m) in 1992, against a profit of DKr1.22bn in the previous 12 months, but the board expects an improvement this year. Profits on core operations rose from DKr334m to DKr702m.

The bank displayed its confidence in the future by proposing to maintain unchanged the dividend of DKr12 a share. Continued high provisions and a large loss on the valuation of the securities portfolio pulled down the 1992 performance. Loss provisions increased

from DKr2.88bn to DKr2.94bn. but were considerably lower in both years that in 1990, when they peaked at DKr 4.25bn. The value of the group's shares and bonds portfolio fell by

The downturn in the economy of the Faeroe Islands contributed to the group's loss. Foroya Bank, in which Danske owns 81 per cent, made a loss of DKr395m and had to be recapitalised by Danske.

DKr1.03bn.

The bank's equity capital and reserves declined from DKr20.7bn to DKr18.3bn, but total capitalisation, including tier 2 capital, was virtually unchanged at DKr27.6bn.

As the balance sheet was reduced to DKr336.7bn from DKr363.4bn, the capital adequacy ratio increased from 10.2 to 11.0 per cent.

• An independent report has criticised Norwegian authorities for failing to stop Norway's biggest insurance firm. UNI Storebrand, from launching a disastrous raid on Swedish rival Forsakrings Skandia. A commission led by former

supreme court judge Erling Sandene said the Finance Ministry and the Banking, Insurance and Securities Commission should have blocked UNI purchases of Skandia shares which later crashed in value.

Yokohama Rubber slips 6.5% for year

By Charles Leadbeater in Tokyo

YOKOHAMA Rubber, the rubber products producer which is Japan's second-largest tyremaker, yesterday reported a 6.5 per cent fall in pre-tax profits to Y11.9bn (\$102.5m) in the year to December on sales down 2.8 per cent to Y286bn.

The company said it had been hit by a slowdown in the automotive industry, although sales of higher-value tyres, such as radials, had increased.

SA steel producer down 27% By Philip Gawith

EARNINGS at Iscor, South Africa's largest steel producer, dropped by 27 per cent in the six months to December as a higher portion of sales were exported while dollar prices were weak.

Although turnover rose by 5.8 per cent to R4.3bn (\$1.37bn) from R4.05bn a year earlier, weak export prices eroded

cent to R307m, from R376m, despite the benefits from the rand depreciating by more than 10 per cent against the

INTERNATIONAL COMPANIES AND FINANCE

in \$500m property assets deal

Martin Dickson in New York

GE CAPITAL, the fast-expanding financial services arm of General Electric, is spending some \$500m to buy about half the portfolio of troubled real estate assets put up for sale last September by First Chicago, the mid-western bank. GE Capital is one of the most aggressive buyers of troubled market, having avolded serious real estate investment prob-

slump of the late 1980s. First Chicago was one of the first banks to announce the wholesale disposal and write-down of its troubled property loans, which were originally valued at \$2.1bn. It decided that there were no near-term signs of recovery in the US market.

lems of its own during the

The assets being sold to GE Capital had an original book value of about \$1bn and are diverse, both geographically and by collateral type.
First Chicago said it did not expect the deal to have a material effect on earnings.

Rio Algom holds sales but profits slip

By Robert Gibbens

RIO ALGOM, an independent copper, uranium, potash and coal producer since Rio Tinto Zinc sold its 51 per cent control to the public last June, has

reported lower profit for 1992. Though copper prices were favourable, potash operations improved and the Canadian dollar was lower, uranium and metals distribution results were lower.

Profit from continuing operations declined to C\$39.4m (ÜS\$31.2m), or 85 cents a share, from C\$44.8m, or 97 cents, a year earlier.

Revenues were little changed at C\$1.03bn.

On the same basis, fourthquarter net equalled 22 cents a share against 29 cents, on revenues of C\$263m against C\$264.5m.

GE Capital | Amgen warning hits biotech shares |

larger number of patients, indicated that a high dose of the drug reduced mortality by only 15 per cent.

Synergen is not the first biotech company to stumble in its search for a treatment for sepsis. Both Centocorp and Xoma faltered after their once-prom ising drugs proved less effec-tive than initial studies had indicated. Neither Centocorp nor Xoma have received mar keting approval for their sepsis

In the case of Amgen, the company already has two effec-tive drugs on the market. But Amgen's future success as a drugs company depends largely on broadening its product line and the funding for future research will, to a large degree, depend on the sales of

JC Penney has strong final quarter

By Nikki Talt in New York

J.C. PENNEY, one of the largest department store and catalogue retailers in the US registered a sharp improve ment in final-quarter results for 1992-93, with the after-tax profits reaching \$375m.

The figure, for the three months to end-January, was scored on sales of \$6.08hn, up from \$5.37bn in the previous year. In the final quarter of 1991-92, the Texas-based retailer recorded after-tax profits of \$37m, but this lowly figure came after net restructuring charges of \$264m. The final quarter's results

take Penney's full-year profits to \$777m after tax, and 12month sales to \$18bn. In the previous year, the company made a net profit of \$80m after pulp and paper and building materials group, has raised restructuring and accountingrelated charges of \$448m.

Yesterday, J. C. Penney shares rose strongly on news of the final quarter's figures, adding \$2% at \$78%.

The company said the improvements last year had been spread across all of its main merchandise divisions including womens and menswear, childrenswear, home furnishings, and catalogue. It also said early spring merchandise sales in the current year owns 44 per cent of Domtar. | boded well.

Sandberg behind trade bank **purchase**

By Barbara Harrison in Miami

SIR Michael Sandberg, former chairman of Hongkong and Shanghai Bank, is behind the acquisition of First American International Bank of Miami a subsidiary of the BCCItainted First American Bank of Georgia, which is in liquida-

First American of Miami, which specialises in trade finance for Latin America, will be acquired for \$6.5m by AmTrade International Bank of Georgia.

Amtrade International Bank, which is being created for the Miami acquisition, also intends to start the only bank exclusively devoted to trade finance in Georgia. AmTrade International is 94

per cent owned by a holding company called Broadstreet. organised last year and chaired by Sir Michael. Broadstreet won approval this week from the US Federal Reserve for the two transactions.

Mr Robert Glustrom, an Atlanta attorney who is president of Broadstreet, said the group aimed to expand substantially the trade finance business of the Miami bank, which will be renamed AmTrade International Bank of Florida.

The bank last year was rolling over around \$75m to \$80m in trade financing every 90 days, according Mr Vincent Cater, formerly an official with First American in Miami and now president of AmTrade International. The company is linked to a network of 450 corresponding banks in 88 coun-

AmTrade International in Atlanta will target small and medium-sized companies, said Mr Glustrom. He said both banks would focus on building trade finance business with Asia and Europe. The Miami branch will seek to expand its US-Latin American business to finance Latin American trade

with Europe and Asia. Given the Federal Reserve's approval, the creation of AmTrade International of Georgia and the Miami acquisition are expected to be completed in the next few weeks.

Peoples Jewellers chief quits as more shortfalls revealed

By Bernard Simon in Toronto

PEOPLES Jewellers, the Canadian jewellery chain forced into court protection by a 1980s acquisition spree in the US, has disclosed details of numerous discrepancies in its financial statements and accepted the resignation of its long-serving chief executive. The 230-store chain also plans to seek court permission to solicit bids from prospective buyers for its entire business or for specific assets.

Mr Irving Gerstein, whose family owns about 86 per cent of Peoples' shares, has resigned as chairman and chief executive. The company said Mr Gerstein, who will remain a director, is putting together a restructuring or acquisition proposal with "independent sources of financing".

Peoples filed for bankruptcy protection in December, following similar action by Zale Corp. the largest jewellery chain in the US, in which Peoples had a 47 per cent stake. Peoples, in partnership with Swarovski International of

Switzerland, bought control of Zale in 1986 in a US\$650m leveraged buy-out engineered by junk-bond pioneer Mr Michael Milken.

Peoples said yesterday that an examination of its books by auditors Deloitte & Touche haduncovered, among other things, an unfunded shortfall in the executive pension plan and an unauthorised purchase for cash of almost 20,000 shares by the employee profit-sharing

plan. The company is also considering changes to its accounting practices, which it warned could result in further writedowns, it plans to apply for a 10-day extention, until early March, of the deadline for filing a plan of arrangement.
The board named Mr Duff

Scott, a former head of Prudential-Bache Securities' Canadian subsidiary as acting chairman. The chief financial officer has been appointed acting chief operating officer, leaving the company without a chief executive for the time being. Mr Charles Gill quit late last year

Viasa ends year in red

By Joseph Mann in Caracas

VIASA, the Venezuelan international airline that was privatised in 1991, suffered a loss of US\$50m in 1992, according to Mr Rafael Ordozgoiti, the company's vice-president. The Viasa executive said the airline hoped to reduce losses

this year to \$25m and shareholders would be asked to raise \$63m in new capital to cover Viasa, formerly owned by the

Venezuelan government, was

THE PAKISTAN FUND 1992 INTERIM RESULTS

Over the second interfin period from 1st July to 31st December 1992 the net 28st value of The Pakistan Fund declined by 21 9% to 1885, 19 per share whereas the Karachi Stock Exchange Index fell by 19,9% in Ropec terms and 21,3% in 105 dollar terms. The Fund's under-performance against the Index was a result of the poor performance of textile shares due to the cyclical dosentum in the undustry. Nevertheless, the long term outlook for the sector, in which the Fund is heavily weighted committee continuous. Furthermore dissortum in the undistry. Recentracies, the only term touched to the second in which the Fund is heavily weighted, remains optimistic. Furthermore, investor sentiment was also adversely affected by perodic unrest in Sindh province, the severe damage-causing floods in the North and mass protests in Pakistan in December after Hundu extremists desamyed the Pahri mosque

in the town of Ayadhya in India.

Between July and December 1902 the Pakistan Rupee depreciated 2.2% against the US dollar and this trend is expected to continue with further

against the US dollar and this frend is expected to continue with further strengthening of the US currency.

On a more positive note, the initiary's clean-up operation in Smith province has improved the law and order situation although initially threatening the Islamic Democratic Alliance by targeting the controversial MQM party within the inling coalition. However, domestic politics appear to have improved with the expectation of a moderate kaldership within MQM and a left to the protest marches by the opposition coalition party, the People's Democratic Alliance.

While the conclusion of the stockwarder is private to the above two these.

While the outlook for the stockmarket is mixed in the short term, the langer term prospects tentain prairie.

INTERNATIONAL COMPANIES AND

Top two at Showa Shell to quit over losses

Tokyo and Deborah Hargreaves in London

THE president and chairman of Showa Shell Sekiyu, the Japanese oil refiner and distributor 50 per cent owned by Royal Dutch/Shell, are resigning to take responsibility for Y125bn (\$1.07bn) of so far unrealised foreign exchange futures losses which the company revealed

Mr Takeshi Henmi, president, and Mr Klyoshi Takahashi, chairman, will step down after steps have been taken to ensure that the foreign exchange losses will be covered, the company announced yesterday.

Mr Henmi will also be resigning his post as vice-chairman of the Petroleum Association of

The Shell group has already said it will send Mr Neil Gaskell, head of investments, to the board of the Japanese company. Currently, Shell has one representative on Showa Shell's board.

Shell, which made a provision of £131m (\$183m) to cover the currency losses in the fourth quarter, announced yes-terday it would make a further provision of £65m in the first Mr John Jennings, Shell

group managing director, said the currency speculation was a "gross contravention of the company's internal procedures

He said the company was reviewing whether to tighten up its rules that govern the nies. Sheli is also looking at further disciplinary measures

at Showa Shell. One executive in the treasury division has also resigned and another has been moved to another part of the company, while the manager in charge of treasury operations has been dismiss Executives and auditors will also surrender their bonuses.

to incur losses of Y125bn on dollar futures trading conducted by a small group in the company's finance department. The group speculated in 1989 that the dollar would rise and continued to roll over futures

Showa Shell Sekiyu expects

contracts over four years, in breach of company rules. The company said yesterday it planned to cover the losses by selling assets, mainly stocks, and by making a charge against profits. For 1993, it expects to cover Y70bn of losses through asset sales of

charge of Y20bn. Showa Shell has already moved to limit the losses by capping the exchange rate at which it will buy dollar

Y50bn and an extraordinary

Over a period of about four years, the group in the trea-sury department took contracts to buy the dollar at a future date at an average rate of Y145. During that time, however, the dollar fell to about Y125 on

futures, it said.

osses snowballed. Depending on moves in the currency market the losses could be as high as Y160bn. The futures trading continned unknown to too management as the group postponed ment of their contracts so

that while the losses multi-

plied, nothing appeared in the

average, and Showa Shell's

company's accounts' In accounting rules do not require the disclosure of losses unless they are actually realised.

Yesterday, the company also announced a 12 per cent drop in profits for the year to December 31. Pre-tax profits fell to Y38.03bn from Y43.39bn the year before. Sales slipped 3 per cent to Y1,565bh from Y1,617bn. The Shows Shell figures did not include a provision for the foreign exchange futures losses.

Showa Shell said that the main reason behind the fall in profits was the slide in oil prices in Japan coupled with a rise in costs, mainly relating to transport.

Although oil prices fell, the dume of sales increased and this added significantly to domestic costs, the company

Asahi Glass warns of

By Charles Leadbeater

tough vear

THE Japanese business environment will remain severe for most of this year. Asahi Glass, the country's leading glassmaker, warned yesterday when it reported a 33.5 per cent fall in ordinary income for the year to the end

of December.
Asahi Glass' sales fell by 1 per cent to Y1,011bn (\$8bn), operating income fell by 46.9 per cent to Y25bn, ordinary income was cut to Y40hn, and net income declined by 44.6 per cent to Y20.4bn.

The company's consolidated sales rose by 5 per cent to Y1,316bn, but its operating income fell by 32 per cent to Y42bn and net income declined by Y35.6 per cent to Y24bn.

Asahi Glass said it was pressing ahead with a three-pronged restructuring programme, to cut costs, improve co-ordination between its Japanese and overseas subsidiaries and put more emphasis on more sophisticated, higher valne-added products.

The glassmaker has been badly hit by a fall in demand from the Japanese car and electronics industries and the stagnant construction sector.

Chinese 5 steelmaker buys HK group

in Hong Kong

SHOUGANG Corporation, the acquisitive mainland Chinese acquaintve maintain Cantese iron and steel maker, has pur-chased 25.12 per cent of East-era Century, a Hong Kong-based metals and minerals trader, for HK\$164.2m (US\$21.2m).

This is Shougang's second foray into the Hong Kong market - in October it bought a controlling interest in Tung Wing Steel, a steel trader and distributor and follows acquisitions as far afield as Peru and Calif-

The company, also known as Capital Steel, is believed to be in the bidding for Overseas Trust Bank, which has been put up for sale by the Hong Kong government.

Rastern Century was listed

on the Hong Kong stock exchange in April last year. Its main business is the trading of manganese ore and manganese ferro-alloys essential raw materials for

steel making.

Last year it went into a mainland venture for the production of manganese ferro-al-loys when it established Xinyu Far Rast Ferro Manganese and Shanghai Shenjia Ferro-Al-

Shougang, with headquar-ters in Beijing, published its financial results to coincide with the deal.

Last year, it earned pre-tax profits of Yn3.2bn (\$555.5m) on turnover of Yn13.4bn — the highest profit before tax of China's top 500 national com-panies. Fixed assets were valned at Yn30i

Mr Chan Chun Keung, chairman of Eastern Century, said: "The injection of Shougang's capital, expertise in technology and management will further the group's interest in the People's Republic."

After the deal, Mr Chan's shareholding in Eastern Cen-tury, will fall to 28.28 per cent from 45.98 per cent, and that of Deeside International, a French investor, will fall from 16.61 per cent to 5.79

Big turnround in shipbuilding boosts Daewoo

By John Burton in Secui

DAEWOO, South Korea's fourth largest conglomerate, yesterday reported a 10-fold increase in net profits for 1992, mainly due to improvements in its securities and shipbuilding operations.

Net earnings for Daewoo, which consists of 22 subsidiaries, rose to Won298.2bn (\$370m) from Won28.4bn in 1991. Sales increased by 25 per cent to Won20,000bn.

The results were encouraging for Daewoo, which has had siim profit margins in the last few years due to losses in its industries. Profitability had also suffered from a mounting debt burden, with high-interest short-term loans accounting for about one-third of outstanding borrowings in

Daewoo Securities reported a sharp increase in earnings, which climbed to Won55bn from Won1.8bn. This reflected increased brokerage activity as the Seoul bourse posted its first annual gain in three years. Turnover for the firm rose by 68 per cent to

Daewoo Shipbuilding, which is unlisted, posted the biggest profits among the group companies with earnings of

Won211bn, a 167 per cent increase over the year before. Sales rose by 43 per cent to

The sharp profit increase at the shipbuilding unit was due to rationalisation and a rise in orders. The company also diversified into vehicle production last year and reported good sales for its range of mini-

cars and vans. The results represent a dramatic turnround for Daewoo Shipbuilding, which suffered huge losses in the late 1980s and had to be rescued from possible bankruptcy in 1989 with a Won400bn government

As part of the rescue package, the government ordered Daewoo Shipbuilding to merge with Daewoo Heavy Industries, traditionally one of the group's strongest units, by the end of 1994 to improve its financial stability.

Sales and earnings at Daewoo Heavy Industries, a machinery manufacturer, declined in 1992 after three vears of growth.

Earnings fell by 44 per cent to Won10.5bn, while sales dropped by 10 per cent to Won904.7bn. The decrease was blamed on sluggish domestic industrial investment and a downturn in construction.

US insurer to quit Japan

CONTINENTAL Insurance, the Japanese arm of US casualty insurer Continental Corporation, yesterday announced it would withdraw from the Japa-

nese market in September. The move is part of Continental's restructuring of its overseas network after facing es from hurricane damas and the costs of reinstating catastrophe reinsurance.

it may trigger similar decisions among US casualty insurers facing huge claims for dainages caused by hurricanes Andrew and Iniki. Japan's tightly-regulated insurance market has also been a barrier for foreign insurers, which find it difficult to crack traditional relationships between Japanese business and their insurance companies.

Continental has about 50,000 contract holders in Japan, and its premium income totalled Yl.2hn (\$10m) during the year to March last year, ranking eighth among 33 foreign insurance companies in Japan.

The Tokyo arm of Assicurazioni Generali, a leading Italian casualty insurance company which started its Japanese operations in 1991, will take over Continental's operations and contracts. Continental's 50 employees are also expected to be transferred to Assicurazioni.

Renison falls to A\$10m in first half

RENISON Goldfields, the Australian mineral sands, tin. gold and copper mine which is 40 per cent owned by Hanson of the UK, yesterday posted a fail in net profits to A\$10.35m (US\$7.21m) for the first half to December, from A\$23,54m a year earlier. Reuter reports from Sydney. The group also said it would have difficulty matching the profits in the sec-

ond half. Sales advanced to A\$328.9m from A\$299m; earnings per share fell to 5.2 cents from 11.9 cents; and the interim dividend is being halved to 2.5 cents. Mr Campbell Anderson, managing director, said: "The company does not anticipate any significant market recovery in the second half."

He said that, to contain operating costs, plant rationalisation in mineral sands might require a limited write-down of existing plant and equipment. He said the first-half result was disappointing and reflected mainly depressed conditions in most of Renison's principal commodity markets. Mr Anderson said US dollar gold prices were below those of a year ago, and the price

Tough first half for Brambles

By Kevin Brown in Sydney

BRAMBLES Industries, the diversified Australian transport group, yesterday blamed economic conditions in Europe and the US for a 0.7 per cent fall in net profit to A\$88m (US\$59.8m) for the first half to end-December. Sales fell 10 per

cent to A\$1.3bn. Mr Gary Pemberton, chief executive, said the result "fell short of expectations", mainly because of reduced demand for waste processing in the US and a lower UK contribution.

Mr Pemberton said prospects for the second half were diffi-cult to predict, but "any reasonable reading of overseas economic conditions would demand caution".

He said Brambles' full-year result would be "particularly sensitive" to the state of the US economy, where the newly established Chep USA pallet business recently won a big contract with Campbell Soup, the US food group. Brambles said the contribu-

tion from Australian operations slipped slightly from last year, but added that the economy had showed some signs of recovery before preelection jitters set in after the New Year. Some Australian businesses contributed improved trading profits, but the economy continued to pro-

vide a difficult trading environ ment for most of the company's industrial service activi-

In Rumone, the group's new contracting, records manage-ment and forklifts businesses contributed to a slight improvement in trading profits, although crane and construction-related operations

were "disappointing."
Mr Pemberton said UK trading conditions were tough. The effects of high interest rates and rising unemployment were most severe on the Cleanaway and GKN-Chep joint ventures The group said the interim dividend would be maintained at 30 cents, fully franked.

Finance sector lifts Lend Lease 1.6%

By Kevin Brown

LEND LEASE, the Australian life insurance and property group, yesterday announced a 1.6 per cent increase in net profit to A\$111m (US\$79m) for the six months to the end of

The result included a sharply higher contribution from financial services activities, offsetting a further decline in property earnings, which fell from 32 per cent of net profit to 27 year proved to be short-lived. | per cent.

Mr Stuart Hornery, chairman, said the group expected to exceed last year's full-year net profit of A\$195.3m. The interim dividend was raised from 32 cents to 33 cents, fully

The group said retail financial services contributed A\$75m to net profit, compared with A\$56m in the previous comparable six months. The result included a dividend of A\$13m from Australian Eagle Life, which was acquired last

Lend Lease said the downward trend in profits from property development, construction and management was believed to have stabilised. The property services division earned A\$43m before tax, compared with A\$51m.

The group said it expected strong growth in the contribution from management of corporate superannuation funds. Premium income from corporate superannuation rose to A\$751mn from A\$340m during the period.

"Spin-off" is the term increasingly used to describe the system of decreasing staffing levels of major corporations by encouraging executives to set up separate enterprises as satellites to the parent company. What companies stand to gain from spin-offs, and the advantages of this fast-growing technique for local, regional, national and even Eastern European economic development, are to be discussed by top industrialists, senior EC Commission officials and politicians at this high-level conference.

Participants will represent scores of major companies around Europe already benefitting from corporate spin-offs, and Forum Europe's lively debating style will provide the ideal opportunity for professional contacts to be made.

By Antonia Sharpe in London and Karen Zagor in New York

ITALIAN government bond futures fell steeply yesterday afternoon on news that Moody's Investor Services, the US credit rating agency, had placed Italy's long-term foreign currency debt rating of Aa3 under review for a possible

Moody's last reduced lialy's foreign currency debt rating to Aa3 from Aa1 in August.

Earlier in the day the Italian government bond market had been supported by news that the government of Prime Minister Giuliano Amato had survived its second vote of confidence in the space of three

Late in the day, the Liffe March BTP future traded at 95.51 on volume of 19,343 contracts, down from a high of 96.50 in the early afternoon, and below the previous day's close of 95.86.

Moody's said it had taken this action because of two concerns, firstly because of the lack of progress in reducing the country's public sector deficit, and secondly, because efforts to improve the fiscal balance have been impeded by the deepening political crisis.

Moody's also lowered the domestic currency rating of Enel, the electricity authority, to Aa3 from Aa1 and also placed the rating under review for further downgrades. Enel

GOVERNMENT BONDS

debt is guaranteed by the Italian government. A total of \$62.5bn worth of debt is affected.

Meanwhile, the Bank of Italy said it planned to change the auction system for government securities. Mr Bruno Bianchi, head of the central bank's monetary and financial divi-sion, said the revised system would be computer-based in order to shorten the time of the auction. The new system could go into effect next year.

Currently, banks participating in the securities auctions must send a telex to the central banks to make their bids.

■UK GOVERNMENT bonds rose steadily to close at the day's highs, supported by a slight recovery in the pound from its record lows. The long end rose between 14 and 1/4 point. The gain at the shorter end was limited to # point.

NHL is also paying 200 basis points over dollar Libor on its

Since last year, the company has generated cash to repay £140m. Its main source of cash is now the vehicles created to issue previous mortgagebacked offerings; any surplus revenue not needed to pay

Mortgage lender places its faith in securities

ational Home Loans' ties backed by non-performing mortgages yesterday achieves a number of important goals for the troubled mortgage lender, which had to be rescued by its banks last

As well as removing a further chunk of mortgages from its balance sheet. NHL will use the proceeds to repay more expensive bank and bond debt. The deal will leave NHL with a mortgage book of just £325m, after securitising a total of more than £2bn of its mort-

The mortgage-backed issue, launched yesterday by Gold-man Sachs, consists of two senior tranches and a large subordinated tranche, providing collateralisation, which is kept by NHL. The senior tranches pay interest of 85 basis points over the London interbank offered rate - for an estimated one-year average life and 110 basis points above Libor for a two-year average

Although this margin looks high compared with spreads on ordinary mortgage-backed securities with a similar average life, which are currently trading at 35 to 40 basis points over Libor in the secondary market, the cost savings for NHL are substantial.

When the company was forced to reschedule its debt last year, its financing costs rose dramatically. NHL is currently paying interest of 200 basis points over Libor on its £400m of bank debt. Prior to the restructuring of its debt last year, the company was paying only 30 basis points over Libor.

dollar bonds, which were also rescheduled. Barlier this month, NHL shelved plans to reschedule its D-Mark bonds.

interest on those deals is channelled back into the mortgage originator. Under the terms of its debt restructuring last June, all banks and bondholders received equal payments of the £140m paid in debt paid down, reducing the total level of debt to £560.

The latest financing serves another function: the maturity of the securities matches the life of the mortgag

The severity of National Home Loans' problems in the last few years were exacer-bated by the company's failure to match the maturity of its assets and liabilities, by funding long-dated mortgages in the money-markets.

renegotiating its syndicated

Yesterday's £105m issue by the troubled National Home Loans achieves a number of important goals, says Tracy Corrigan

bank facilities when moneymarket funding dried up sud-denly, as investors withdrew funds in the wake of the BCC collapse. This resulted in the steep increase in cost of funding, which it is now attempting to reverse. Last year, NHL recording

pre-tax losses of 146m, but Mr Jonathan Perry, the group's executive chairman, predicted a "significantly reduced loss" in 1993 and a future return to profitability. Although the company has

managed to repay some of its debt. NHL is not generating any new business, and with only a small mortgage book left, is little more than a shell company.

So far, Barclays and the TSB are the only UK banks to have securitised any mortgages, but UK banks and building societies are currently studying the market. There is a strong incentive for banks to remove non-performing mortgages from their balance sheets. since they require twice as

TransAtlantic slips to £60.7m

TRANSATLANTIC Holdings, the property and life assurance group which obtained a London stock market listing last year, yesterday announced a marginal fall in pre-tax profits from £61.2m to £60.7m for the year to December 31.

Earnings per share fell to 9.93p compared with 14.52p in 1991, reflecting increases in the amount of unrelieved advance corporation tax and reduced interest capitalisation A recommended final divi-

dend of 6p raises the total for the year to 12p, against 11.45p TransAtlantic is owned

jointly by Liberty Life, the South African life assurance company, and Union des Assurances de Paris, France's largest insurer. It owns 50 per cent of Sun Life Holdings, the UK life insurer, and Capital & Counties, the property com-

Inchcape completes resources withdrawal

By Catherine Mitton

INCHCAPE, the motor and business services group, yes-terday lost another link with its colonial past as Inchcape Berhad, its 63 per cent owned Singapore-based subsidiary, sold its timber offshoot to local investors for £24m.

The move completes Inchcape's withdrawal from In 1991 it sold its tea investments and is now almost exclusively focused on its core

notor, marketing and services ses, apart from the odd country chib and time share operation, acquired in March 1992 when it bought TKM. funded by a £376m rights Incheape Timber Group has

operations in Malaysia, Indonsia, Papua New Guinea, Singapore and Hong Kong and is involved in the extraction of tropical hardwood and softwood logs, and the processing and trading of timber prod-

Inchcape's interest in timber stretches back to the

for the 1992 year on turnover of \$\$198.1m.

Inchcape said that the sale would result in an extraordi-nary profit of £3.5m, less

The sale is conditional on regulatory approval.
ITG's trading profit had declined in the last three

financial years following the expiry of its main logging conenvironment at the new logging concession in Papua New Guinea between 1990 and 1992, and recessionary conditions in the main timber markets, Inchcape said.

Weak pound helps Micro Focus rise 23% to £22.3m

AIDED BY the weak pound. Micro Focus, the Newbury-based software company, maintained its record as one of the UK electronics sector's strongest performers with profits up 23 per cent and a cash reserve

Pre-tax profits for the year to January 31 were £22.3m (£18.1m), with turnover ahead 21 per cent to £67.7m

The results were in line with City expectations and the shares closed down 80p at £25.15. At their peak last month they reached £29.98, after a steep ascent from 800p at the start of 1991. Earnings per share, fully diluted, increased by 28 per

cent to 106.2p (88.1p). Most of the company's cash is held in dollars, the strength of which helped to increase reserves to £52.9m at the end of January, 71 per cent up on January 1992.

Mr Paul O'Grady, chairman, did not rule out an acquisition this year, but said it was

Micro Focus supplies software tools for programming in Cohol, internationally the most widely used data processing language. Shipments of Work-bench, its leading package, were 29 per cent up, with main-tenance accounting for 21 per

cent of direct revenues. More than 40 per cent of the company's stock is now held in American Depositary Receipts and another 5 per cent in other forms of US stock. The group is traded on New York's Nasdaq market and has a foreign private issuer status with the US Securities and Exchange Commission. More than half of rev-

enne comes from the US. Mr O'Grady said that despite the depressed market he expec-ted Micro Focus to "maintain or exceed its current growth rates," with the company's new 32 bit technology released this year "the foundation of our product strategy". Growth in direct sales of

software products was up 25 per cent in dollar terms, accounting for 80 per cent of total revenues. Sales to origi-nal equipment manufacturers were up 6 per cent. Contracts

eral, Motorola, Hitachi. Fujitsu, Siemens-Nixdorf and

Staff numbers rose to 613, up from 445 two years ago. Average revenues per head are up from \$382 to \$580.

.....

COMMENT

Micro Focus continues to dazzie a depressed electronics sector. Analysts expect the rate of increase in US carnings to slow slightly this year, but growth of 20 to 25 per cent remains impressive. With research and development spending up by nearly a third and a cash mountain of £53m - which its chairman insists just lets him "sleep easily at night" - nothing is being left to chance. Both the direct marketing of its software tools, and its maintenance contracts, offer sound prospects for medium-term growth. Pre-tax profits are fore-cast to rise from £26.4m to about £34m for 1993, equal to earnings per share of 157p. With a prospective multiple of 16, it does not appear overpriced, although no change in dividend policy is expected.

Exploration and production side lifts Royal Dutch/Shell

PROFITS AT Royal Dutch/ Shell, the international oil group, were boosted by an exceptionally good result from the company's exploration and production division, but depressed by the first annual loss in a decade from its chemicals business. Sir Peter Holmes, chairman

of Shell Transport, the group's UK arm, said that although the oil price had dropped by \$4.50 a barrel since 1990, the compa-ny's exploration business had increased production and cut costs to report an improvement in profit from £1.44bn to

During 1992, Shell saw its oil production increase by 3 per cent to 2.2m barrels a day (b/d) - the highest level since mid-1970s - with gas sales also up by 3 per cent.

In the fourth quarter, the company increased its profits from exploration and production from £391m to £682m in achieved on the back of lower UK-quoted oil and gas compa- per cent premium over Bra- that if the offer for Brabant, what analysts called an unusual" result, part of which is attributable to a lower tax

The trust also declared an interim of 8.1p for 1993, compared with a forecast 7.9p, and is forecasting a final of 3.5p.
Holders of the B shares will receive a scrip issue on the basis of 3.95679 shares for every 100 held on March 26.

Net assets at December 31 stood at £351.8m compared with £304.3m - equal to 293.3p (253.7p) per share. Net revenue was £12.9m (£13.4m) - equal to 10.9p (11.31p) per share

By Richard Lapper

ROYAL Insurance, one of the UK's largest insurance companies, yesterday announced a £20m increase in its reserves against possible employers' liability claims arising from industrial diseases such as industrial deafness and repeti-

tive stress injury.
This indicates that the industry, hard hit by weather and recession-related claims in recent years, may soon face problems from a fresh source.

The decision, combined with news of heavier than expected losses at Royal Re, the reinsurance subsidiary, clouded an otherwise impressive performance by Royal insurance during 1992, which saw pre-tax losses fall to £119m from £373m in 1981.

Royal, which omitted its dividend last year, declared a final dividend of 3p, making a total of 5p (11,25p),

The group also announced a £100m subordinated bond issue. The proceeds - like those from a £75m convertible issue launched in December will be used to repay short term borrowings, lengthening the repayment profile of Roy-

WOOLWICH Building Society,

the fourth largest with assets of £23.3bn, yesterday disclosed

a 9.5 per cent rise in pre-tax

profits to £149.3m, compared

with £136.4m, despite doubling

its provisions for possible bad

debts in the depressed housing

Woolwich made new provi-

sions of £144.7m (£72.4m), rais-

ing its total provisions to

£207m. About 40 per cent of the

active" stance being adopted

by trades unions.

The group has a market share of employers' liability business of about 5 per cent. according to Mr Roy Elms,

director of underwriting.

Mr Richard Gamble, chief executive, said that the £254m improvement in trading reflected a lower level of weather and domestic mortgage indemnity claims in the UK but was achieved despite three major weather catastrophes in the United States.

improvements reflected "the new creed" of tighter underwriting controls, added Mr Gamble. "We don't write for market share. We write for Worldwide premium income

fell to £3.42bn (£3.46bn), with life premiums dropping to £332m (£390m). The fall in general insurance income largely reflected exchange rate factors. However in the UK the company reduced its exposures

sharply in motor business (down 10 per cent) and motor fleet (down 8 per cent). Underwriting losses fell to £588m (£887m), reflecting a decline in losses on domestic mortgage indemnity - which insure borrowers against a por-tion of their losses on the sales of repossessed property losses from £257m in 1991 to

£160m in 1992 and an improvement in most other lines. Mr Gamble said that reserves

against DMI losses were £367m at the end of 1992. Some £60m in claims was paid out during the year. The group had not increased its most recent esti-

mate of potential DMI losses. Claims frequency in motor business declined by 10 per cent, with UK underwriting losses in personal motor falling to £12m (£34m).

Underwriting losses fell in the US and at Royal International, but increased by £3m in Canada. Underwriting losses at Royal Re rose by £40m to £96m, largely as a result of increased claims from recent catastrophe losses such as hurricane Andrew in the US last year. Investment income fell to 2486m (£492m), while income from associated undertakings dropped to £21m (£34m).

Estate agency losses rose to £33m, compared with a deficit of £19m in 1991. Costs associated with the restructuring of the network of offices by 67 to 517, more than outweighed the benefit of new cost controls, introduced by Mr Gamble.

Capital and reserves amounted to £1.5bn (up from £1.41bn), but would have fallen without exchange rate gains of £198m. The solvency margin the yardstick which measures net assets as a percentage of non-life premium income amounted to 42 per cent, compared with 40 per cent at the

While we consued to develop the strengths of British Gas tohe benefit of our shareholders, we also achieve major benefits for our customers. Gas prices tolk domestic customers were reduced by 6 in 1992 and are now 20% lower in real terms the at the titue of privatisation in 1986.

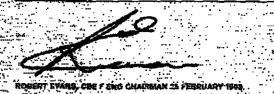

independent research also shows that customer satisfaction has reached record levels, although we recognise that further improvement can and will be schieved.

Looking to the future, we must succeed in seizing every opportunity to shape the Company to meet ever changing market conditions. However, the twin pressures of the regulatory squeeze and continuing regulatory uncertainty are currently having a significant effect on our operations. It is to be hoped that the outcome of the MMC inquiry will enable the Company to plan properly for the longer term, and to continue to expand internationally, based on a strong technical and financial base in the UK.

Dividend

Finally, I am pleased to announce that, despite the disappointing results, the Board has decided to recommend a final dividend of 7.8 pence, bringing the total for the year to 14.2 pence. This compares with a notional dividend of 13,4 pence last year, following the change in the Company's accounting reference date, and represents an increase of 6%. The maintenance of the Company's policy of increasing dividends in real terms in the future may be significantly influenced by the outcome of the MMC Inquiry.

COMPANY NEWS: UK

Warmer weather, loss of market share and lower domestic prices blamed for downturn Overseas side helps stem fall at British Gas

ERITISH Gas saw profits in its core UK business decline by \$276m in 1992 as a result of warmer weather, loss of market share and lower prices for the supply of household gas. But this was partly offset by an company's overseas divisions.
On 12 months' turnover of £10.25bn (£10.49bn) group pretax profits came out at £1.05hm after exceptional charges of pared with £1.71bn.

Mr Philip Rogerson, British Gas's director of finance, pointed to a strong improve ment in fourth quarter profits at the exploration and production division, where income doubled from £60m to £128m, following the increase in production at its South Morecambe bay field in the North

and production, where most revenues come from overseas, increased slightly to £224m compared with £221m. The overseas gas supply

business saw a rise in profits

for the year to £137m, against

£125m, following an increase in

For the full year, exploration

Cedric Brown, chief executive (left) with Robert Evans (centre) and Philip Rogerson: the oversess divisions provided a welcome contribution and now account for 25 per cent of group profits

drop in the purchase price of gas. The rise came mainly in the fourth quarter, which

accounted for £42m (£33m). Mr Robert Evans, chairman, said the overseas divisions provided a "welcome contribu-

tion," to profits, accounting for

roughly 25 per cent of the total.

sales volumes abroad and a He hoped the two divisions drop; the squeeze on prices as drop in the purchase price of would provide 60 per cent of a result of the tough new forprofits by the end of the decade.

The profits of the UK gas business fell from £1.5bn to £1.2bn last year. Factors behind the decline were the warmer weather, which accounted for £140m of the

mula imposed by the regulator, leading to a fall of 250m; and the loss of market share in the

industrial market, taking out Non-gas costs also increased and pipeline revenues the UK gas business showed a roughly stable profit of £626m.

compared with £636m. Earnings per share were 15.8p for the full year, compared with 27.3p. In the final quarter earnings per share

were 5.4p (11.8p). The company declared a final dividend of 7.8p, which made a total for the year of 14.20 - a rise of some 6 per cent from 10.25p for the previ-

ous 12 months. Mr Rogerson said: "The poiicy of increasing the dividend in real terms and the ability to maintain it depends to a significant degree on the outcome of the MMC inquiry." British Gas is currently under review by the Monopolies and Mergers

The company had a net cash outflow of £1.5bn, slightly higher than analysts had forecast. This was chiefly because of heavier tax and dividend payments during the 12 months after changing the reporting period from the tax year to the calendar year.

British Gas's level of gearing rose to 33 per cent from 25 per 

1992 Group Results

ICI Group 1992 profit before exceptional items and taxation was £565m, compared with £789m in 1991, with the decline reflecting the continuing effects of recessionary conditions. In addition, the Group has taken exceptional charges of £949m before tax relating mainly to further planned restructuring activities including disposals and closures, write-downs of certain asset values, a re-assessment of environmental liabilities and the impact of the decision announced to recommend demerger. The Board of Directors has declared a second interim dividend of 34 pence to bring the

Dividends per £1 Ordinary Share *Restated in accordance with FRS 3			55.0p	55.0

In announcing the results, Sir Denys Henderson, Chairman of ICI,

Today we are making two announcements. The Board of Directors has unanimously recommended that ICI should now proceed to put to its shareholders formal proposals for the demerger of ZENECA. The demerger proposals, which will include a fund raising of approximately £1.3 billion by ZENECA, will, in the absence of unforeseen circumstances, be put to shareholders at an extraordinary general meeting in late May and subject to approval, would take effect shortly thereafter.

We are also announcing our results for 1992. With pre-tax profits before exceptional items down by 28% on 1991, the results reflect the very difficult trading conditions which we encountered throughout 1992. This recession, which has now lasted three years in the UK, has been one of the deepest since the 1930s. Nevertheless, a number of our businesses have put in a robust performance and in a year which was expected to be difficult, the Pharmaceuticals business achieved trading profit approaching £500m. Explosives produced another record result and Paints performance continues to be strong. Included in profits were £290m of benefits arising from the restructuring initiatives undertaken since 1990. These benefits are equivalent to over £350m of savings on an annualised basis and the Group is on target to

achieve the £400m annual savings indicated at the start of the programm The 1992 pre-tax results include net exceptional charges totalling £949m.

The great majority of these items have been charged in the fourth quarter of 1992. The earlier quarters' results have been revised to disclose separately gains and losses of an exceptional nature. This restatement is in accordance with the new Accounting Standard - FRS 3 - which ICI is adopting for its

Much of the exceptional charge is directly attributable to meeting the changes taking place in the chemical industry, exemplified by our decision to proceed with demerger. It has been exacerbated by the recession and has resulted in the need for better focus, reductions in the cost base, write-downs in asset values and withdrawals from businesses through divestments and closures. This, together with increased environmental provisions and the costs of reorganisation, account for most of the exceptional charge. The Board considers the restructuring actions to be essential in order to enhance

the future prospects of both ICI and a demerged ZENECA. Gearing at year end was 39.8% compared to 31.8% in 1991, with the increase due to the recessionary effects on the Group profits, delays in

planned divestments and the impact of the exceptional charge.

After careful consideration of the current trading environment and future prospects, the Board has declared a second interim dividend of 34 pence making a total of 55 pence for the year.

While signs of recovery from recession are patchy, lower interest rates, a more competitive pound, low UK inflation, some indications of the US markets picking up plus the major restructuring efforts which we have put in place over the last three years, including those announced today, should ensure a better year ahead for both ICI and ZENECA."

GROUP PROUT AND LOSS ACCOUNT: 1992 The trading realis of the Group for the year 1992, subject to completion of the audit, together with comparative figures for 1991 are set out below. The figures have been prepared in adordance with Financial Reporting Standard 3 and comparative

Full Year - Before Exceptional Items

Full Year - Before Exceptional Items
Group numover in 1992 was \$2,061m compared with £12,488m in 1991. The fall resulted primarily from lower elling prices (-1%) and the impact of divestments (-3%) partly offset by favourable exchange rates (+1%). In the UK, sales were particularly depressed with turbover £350m (14%) below last year's level.

In Pharmaceuticals, trading profits were £494m, down £44m due mainly to the effects of generic competition on "Tenormin" in the United States, partly offset by higher sales of all other major products including 'Zestril', 'Diprivan' and 'Zolader'. In Agrochemical and Seeds, profits declined to £88m due to intense price competition in the United States and reduced volumes throughout Europe, reflecting bith concerns over the restructuring of the Common Agricultural Policy and conomic difficulties in Eastern Europe.

In the Specialty Chemicals and Materials segment, trading profit at £177m was similar to 1991 with reduced plume and lower prices being offset by the benefits from restructuring. Industrial Chemicals incurred a trading loss of £24m in 1992 compared to a 1991 profit of £135m, with the decline almost entirely due to reduced selling prics and lower volumes in the Chemicals & Polymers business. Tioxide's trading profit was broadly maintained with the benefits from higher volumes and so ngent cost control being offset by lower

benefits from higher volumes and stingent cost control being offset by lower prices. Due to the continuing relession in many countries, Regional Businesses lost £8m compared to a polit of £9m in 1991.

Earnings from associates at £46m were £43m higher than last year's level due to a reduction in the losses of the European Vinyl Corporation (EVC). Whilst the PVC market remained dipressed, EVC benefited from lower feedstork prices from its parent composition. feedstock prices from its parent compalies.

Fourth Quarter - Before Exceptional Items
Group turnover in the quarter was 3% above 1991 due mainly to favourable exchange rates. Higher turnover in Continental Europe (+11%) and the

United States (+5%) was partly offset by educed sales in the UK.

Pharmaceuticals trading profit at £127n was £31m below 1991 due mainly to different US wholesaler purchasing patterns and the impact of generic competition in the US on Tenormin'. Agrichemicals and Seeds results were slightly better than in the prior year with exchange rate benefits offsetting reduced volumes.

Recessionary pressures resulted in lover profits in Specialties and Materials. In Explosives, profits were above last year's level with higher royalty income and improved results in Australia. Industrial Chemicals fourth

GROUP PROFIT AND LOSS ACCOUNT: FOURTH QUARTER

The trading results of the Group for the fourth quarter 1992, subject to completion of the audit, together with comparative figures for 1991 are set out below. The figures have been prepared in accordance with Financial Reporting Standard 3 and

Fourth	Quarter 1	991		Fourth (Quarter I	992 .

9.5p	2.4p	11.9p	Earnings per £1 Ordinary Share	2.5p	(127.6p)	(125.1

quarter loss increased from £2m in 1991 to £49m in 1992 due primarily to Chemicals & Polymers which suffered from a poorer sales mix and lower prices to external customers and EVC. Tioxide's results were similar in the two periods.

The tax charge for the year was £183m (1991 £279m) representing an effective rate of 35% (1991 35%) on earnings before exceptional items. The effective tax rate on the exceptional items reflects the impact of asset writeoffs, tax costs of reorganisation, tax relief on rationalisation costs and a deferred tax provision covering timing differences on UK capital allowances to reflect the expected future tax position of the Group following demerger.

Dividends for 1992

The Board has declared a second interim dividend of 34 pence per £1 Ordinary Share, which the Annual General Meeting will be asked to confirm as the final dividend for 1992, payable on 29 April 1993 to members on the Register on 25 March 1993. This, together with the first interim dividend of 21 pence, makes a total dividend of 55 pence for the year. Including the imputed tax credit of 18.3 pence this is equivalent to a gross dividend of 73.3 pence for the year.

Trading Prospects

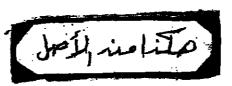

Although trading conditions in the early part of 1993 continue to be difficult, the Board believes that prospects for the full year are better than for 1992. Cost saving measures which have been underway since 1990, together with the effects of the actions covered by the exceptional items, will have a positive effect on the 1993 results of both ICI and ZENECA.

In addition, the proposed transactions with Du Pont (in relation to fibres and acrylics) and BASF (in relation to polypropylene and acrylics) are expected, subject to receipt of regulatory approvals, to be completed during the second or third quarters with a beneficial effect on ICI results.

The company's Annual Report will be available at the company's registered office from 11 March 1993 and copies will be despatched to shareholders

Next Announcement Trading results for the first quarter of 1993 will be announced on Thursday 29 April 1993.

IMPERIAL CHEMICAL INDUSTRIES PLC

otch operties, the investent vehicle of the Inian Tchenguiz the Intan remaining family is one of the lesser-known toperty buyers to have emered in the past three years of K recession. Rotch, and 50 per cent-owned sister impany Wyn-Ro Properties, is bought more than £100m property in the past 18 mons, taking its port-folio to abol £400m. It says it will sign anher £40m of deals in the nex few weeks. "We think this the best buying opportunition 20 years," says

Rotch, hich is ultimately owned by family-owned company incoprated in Panama, is run y two Tchenguiz brothers incent and Robert, both in teir 30s. Vincent, who used towork at Prudential Bache ad Shearson Lehman Brother describes himself as a finaner. Robert is the deal-

THE ACENT BANK

and Norwich Union have also been prominent sources of long-term funds. Rotch would like to attract more institutional funding.
"We are looking to refinance

our borrowings through insti-tutions rather than hanks," says Vincent Tchenguiz. He would also like to raise some equity from the institutions and plans to seek a stock mar-ket listing in a couple of years. Rotch borrows up to 100 per cent of the cost of its acquisitions, but it is unconcerned about the high level of debt it is amassing. "We are not wor-ried about our gearing. You could be 200 per cent geared provided you have cash flow to support your debt," says Rob-

But Rotch's high gearing has resulted in the shrinkage of its net asset value during the steep downturn in the property market over the past few years. The combined net asset value of Rotch and Wyn-Ro was £143m in the year to May 1991. The Tchenguiz brothers say it has now fallen to £42m.

This valuation of its portfolio underestimates the true value of the buildings' income streams in the view of Vincent Tchenguiz, who is a critical of UK valuation techniques. He believes that once the current phase of forced sales is over property yields could fall by between 30-40 per cent.

Property has lurched from a period of being over-valued to a period of being under-valued, he says. "Every period of exag-geration is followed by another period of exaggeration.

respectively. Offices and industrials showed a relative improvement in their monthly returns of four and five basis points respectively, while those for

the retail sector remained

static, at 0.3 per cent. The industrial sector showed the strongest monthly return, beating retails for the first time since January 1992. A slight deterioration in cap-

ttal values, to -0.4 per cent, meant that total return for the retail sector remained at 0.3 per cent for the month.

Office values improved by about half a point in January, representing their highest monthly return since early Suc. 01 03 52/ 45 87 GE

168 Fenchurch Street, London EC3P 3HP

O you happen to be bored out of your skull? If so, then although the Johs column will make every effort, perking you up is likely to prove a struggle. The reasons, if we are to believe German researchers Reinhard Pekrun and Michael Frese, are twofold.

The first is what's technically called mood-congruence. Memory tests show that people in a happy mood tend to be best at recalling happy things, and sad folk sad ones. So presumably anyone who starts out bored will be mentally predisposed to find anything that happens more wearisome still.

The second reason why you'll probably resist my struggles is that the very topic of boredom is boring, even to psychologists. Although there is clearly a lot of it around in the workplace and elsewhere, hardly any of them have bothered to study it.

Still, such research as they've done is not without surprises. For example, while it seems tediously obvious that people in crassly monotonous jobs will function like zombies, that is not always so. On occasion, they are almost super-humanly productive.

A possible explanation is that deary tasks sometimes go beyond merely boring us into a stupor,

Even boredom can be a surprise

and goad us into exasperated action. Shrinks have now noted the difference in their jargon. They use the term "boredom" only for the stupefying kind, calling the energising sort "satiation - a state of high arousal with a strong negative emotional content of resentment...."

Alas, whether you're satiated or just bored, the mood tends to persist. In particular, it has more sticking-power than the "positive emotions" like happiness that can slip away like wet soap in a bath. Even they produce the odd surprise in a work setting, the

German pair say*. Take decisionmaking for instance. Although positive emotion "seems to enhance an intuitive and holistic mode of thinking", it "can induce risk-aversion for higher risks" even while promoting a happy-golucky approach to lighter risks. By contrast, sadness apparently induces more analytic, detailoriented, narrowly focused ways

*In International review of industrial & organizational psychology,

colleagues and customers, the opposite moods tend to have the same effect. If either happy or sad, compared with feeling some emotion between, we're more apt to help. Either way, too, the

motive may be selfish: helping in hope of hanging on to slippery happiness on the one hand, or on the other in the hope of earning relief from our own sad mood. Perhaps fortunately, however, that isn't sure. For the two Germans' prime finding is that what goes for boredom applies to emotions in general. Although they clearly have a marked effect on our work, they have been very little studied. Hence I'll return to

Now to the table alongside giving extracts from Day Associates' latest three-monthly survey of pay and perks in City of London banks. Anyone wanting the full report -covering 283 jobs

them occasionally in weeks to

come - unless readers would find it too boring, that is.

of cognitive problem solving and making decisions."

Yet when it comes to helping in 123 banks of various sorts and priced at £220 to those not taking part in the study-should contact Joe Clark at Suite 2.31, 75 Whitechapel Rd, London E1 1DU; tel (0)71-375 1397, fax -375 1723. Limited to 16 managerial posts, the table starts with basic

to the person a quarter way up from the foot of a ranking of all in the same true of job, the median to the serson half way, and the upper quartile to the one a quarter way down from the top. Next comes the average salary,

received as a bonus. The last two columns show the percentage of the job-holders with cars, as distinct from car allowances which look to be coming into vogue, followed by the vehicle's

DIRECTOR OF INTERNATIONAL EQUITIES

Full responsibility for management and organisation of all the overseas equities teams in London within one of the world's leading asset management firms.

This is one of the most significant team management appointments in international equities. The company has funds under management in European, US and Far Eastern Equities currently totalling about \$16 billion. In its UK equity function, the company has recently completed a successful reorganisation which has produced a better and more consistent house performance. The purpose of this appointment is to lead the international teams to achieve a similar objective.

The company is committed to achieving world class investment performance and intends to establish local offices in major overseas centres which will provide in house research and investment strategy. Your prime responsibilities will be to direct the London based

fund managers to achieve a disciplined and consistent investment process, utilising the output from the new local offices. It will be your function to ensure that the benefits of this approach are captured in client portfolios.

We invite applications from international equities fund managers who have achieved consistently outstanding investment performance. You should have at least 10 years professional experience and you must have held team management responsibility for at least 3 years.

To apply, please write in strict confidence to: John Sears, John Sears & Associates, 2 Queen Anne's Gate Buildings, Dartmouth Street, London SW1H 9BP. Tel: 071-222 7733/Fax: 071-222 3445.

The Structured Haance Group analyses the creditworthiness of debt obligations secured on financial assets. This includes cash flow, documentation and legal analysis

Moody's London office is currently recruiting two European nationals to fill new posts created by its continuing international expansion.

Analyst/Senior Analyst - Structured Finance

Integrated into the Structured Finance Group, this senior appointment has individual accountability. The position involves liaising with issuers, carrying out detailed analysis of asset-backed and other structured transactions in order to identify and quantify the risk of the collateral and structure, and producing analytical reports for publication. Candidates should have a minimum of 4 years direct experience of assot-backed securitization. A strong knowledge of corporate law would be an

Research Associate - Structured Finance

This position provides support to the Structured Finance Group, and involves undertaking detailed background research and quantitative analysis. Moody's is seeking a numerate graduate with an interest in financial markets. PC skills, including a knowledge of spreadsheets and possibly databases, a European language, and work experience with a financial institution or similar organisation would all be advantageous.

Applications, including either a curriculum vitae or standard application form, should be made in writing to Janet Unwin at the following address: 51

Fasicheap, London ECSM (LB.

Local authorities called to account

in an age of competitive tendering

Andrew Jack on the new regime for public sector balance sheets

ME THE THE

MAN SAME

Public sector treasurers and finance officials can expect a few sleepless nights ahead as they prepare for compliance with Cipia's recommendations, which are likely to be in force for the 1994-95 financial year and which all will have to

obey.
For the first time, local authorities will have to compile registers of fixed assets such as schools and equip-ment. Most will have to be shown on their balance sheets at current cost and regularly revalued. Depreciation charges will then be charged in their accounts based on these amounts

Surprising though it may seem, local authorities have never been required to show fixed assets in their accounts in the past. The emphasis has been on showing outstanding borrowings on assets which were externally financed. Assets financed from internal resources or which are paid for have not been shown.

'Charges at the moment are inconsistent and arbitrary," says Mr Martin Evans, head of Cipfa's technical division. "The balance sheet is meaningless. At the moment you are comparing chalk and cheese

The debate about capital accounting extends as far back as the existence of local pal corporations at the turn of the century were debating the inclusion of depreciation of assets in their accounts rather than focusing simply on loan

But central government was always most concerned with controlling the amount of capital expenditure, says Mr Evans. That was reflected in its primary aim: to control the amount of borrowing. Local authority accounting devel-oped accordingly, emphasising how assets were financed, not what they were or how they were used.

He argues that this was the result of a concern to restrict the level of borrowing and enforce repayment of any funds by local authorities not a concern always shared by national government either in the UK or elsewhere around the world.

That has begun to change, with capital accounting now in place in the National Health Service and required by Direct Service Organisations running local authority services as a result of competitive tendering.
For the public sector in gen-

eral, the most radical changes in accounting have only really happened in the last 15 years. Few have been as fundamental as this week's proposals, for which the immediate groundwork was laid nearly 10 years ago after a succession of previ-ous reports which were issued

and largely ignored.
Shortly after the Conservative government's election in 1979, Mr Michael Heseltine, the environment secretary, told a House of Commons select committee that the quality of public sector accounting was "abysmal".

He began an assault on accounting and auditing which led to the creation of the Audit Commission, the National Audit Office and the Financial Management Initiative. designed to improve account-

ability in central government. The 1980 local government land and planning act required authorities to issue annual reports for the first time. But when the first reports came in. they only made clear to officials how impossible it was to compare the different figures.

By 1965, the government was threatening to impose detailed new accounting regulations. In the face of strong opposition, it allowed the Audit Commission and Cipfa to draft a code of practice, which was endorsed by the Accounting Standards

Committee in 1987. But Mr Evans says the guidelines essentially represented a codification of existing best practice rather than any signif-

icant change. Most important, it did not cover capital accounting – a problem identified in a letter to Cipia from Mr

Nicholas Ridley, the environment secretary at the time.
"We took the letter seriously," says Mr Evans. "Per-haps we should not have done so." A joint Cipfa and local authority working group studied the issue yet again, and came up with recommenda-

ts proposals included show ing fixed assets on the balance sheet at current costs, with regular revaluations at least every five years.

The result, says Mr Evans, was that "all hell broke loose." Local authorities expressed concern over the costs, practicability and timing of the guidelines. But few could criticise the technicalities of its recommendations. Their primary concern was the difficulty and costs involved in changing their accounting systems, and paying for regular revaluations of fixed

As a result, the threat of change was again prolonged. Cipfa ran a pilot programme in Solihull metropolitan borough council to study the potential impact of the new proposals, as well as smaller field tests in Croydon and Bury St Edmunds. The results were

shown fixed assets in its bal-ance sheet of £117m. Under the Yet at the same time, the costs and time involved in implementation were not that significant - a total of 241 staff

That was possible partly

Cipfa will not release the costs incurred by Solihull, but The relatively minor difficul-

Solihull had previously

proposed system, these rose more than five-fold to £588m.

because much of the information on assets was already available although never before collected centrally. The council also did not attempt to identify every last immaterial asset, and was able to apply standardised valuation procedures without the need to separately value each one.

estimates that the total one-off charges for changing to the new system will be £6m for England and Wales, and a further £1m for local authorities across Scotland. There would then be about £1m across the UK each year for revaluations. ties identified seem to stand in stark contrast to the costs experienced by implementation at short notice of the same

accounting treatment by the National Health Service, partly

incurred by its efforts to attempt to track down assets even with very low values.

After the consultation period closes in April, it is likely that Cipfa's guidelines - which have mandatory status - will be on schedule to be implemented from next year. But many might question the relevance of the changes.

"We think getting accounts right is important," says Mr Evans. "Accountability is at the heart of the public sector. Authorities should be demonstrating not just stewardship of assets but also how they are

Most important, he stresses that inclusion of assets and a depreciation charge against them will improve the quality

of management. "If you don't have to pay for assets you are not going to worry about how you use them," he says. This will highlight the real costs of services. It brings local authorities as close into line with private sector practice as we can

The principal differences now between public and pri-vate sector will prove more difficult to change, since they are products of legislation restricting local authority accounting. These include the treatment of the housing revenue account.

Whether or not it was part of the reason for the change, the move to capital accounting will certainly aid comparisons in the move towards compulsory competitive tendering by local authorities. It may also make sense of the accounts for

MANAGEMENT ACCOUNTANT FINANCIAL TIMES

London SE1

c£19,000 pa

31

The Financial Times has a vacancy for a Management Accountant to work for the newspaper, in London.

The successful candidate will be responsible for the preparation of monthly management accounts, management information, forecast and budgets. Assistance will also be required for the production of year-end financial accounts. You should be educated to "A" level standard and have completed successfully the intermediate stages of a recognised accountancy qualification. Applicants aged less than 23 are unlikely to have the necessary experience/qualifications for this post.

You should also be computer literate with proficiency in spreadsheet skills and have at least two years experience in an accounting environment; good inter-personal skills and the ability to work to strict deadlines are essential.

Please write enclosing an up-to-date CV and quoting REF FT/24 to:

INTERNAL AUDIT **MANAGER**

Northern Home Counties

to £50,000 plus car

In the last 20 years our clients have built a £1 bn multi-location Group by committing themselves to standards of excellence in business practice and customer service. The value of these concepts has been confirmed in the present harsh economic climate and the Group remains cash-rich and very profitable. However the continuation of this success demands on-going and rigorous analysis of the business to identify internal areas of risk and vulnerability and to ensure that adequate controls are in place and being properly implemented. An Internal Audit Manager is now to be appointed to manage this process with a qualified/experienced staff of 3/4. He or she will report to the Group Finance Director but will be expected to adopt a proactive approach providing guidance to the Audit Committee of non-executive directors and to the main and subsidiary boards. The directors and senior management are a well-established. close-knit team and to contribute constructively in this

environment the person appointed will need to satisfy demanding criteria. The culture is one of professionalism rather than 'instinct' and of teamwork rather than autocracy. The management style is informal. In addition to a personality 'fit' the person appointed will be professionally qualified and able to demonstrate first class technical skill in the design and operation of cost effective control systems in a fast-moving, customerresponsive environment. This exposure will have come either from a comparable role in commerce/industry or from recent experience as an Audit Manager in a substantial Big 6 office. The Group's ambitious plans and record of achievement should provide significant career opportunities. Preferred age is 35 - 45. Ref: 1738/FT. Send CV (with current salary and daytime telephone number) or write or phone for an application form to R. A. Phillips ACIS, 2 - 5 Old Bond Street, London WIX 3TB. Tel: 071 493 0156 (24 hours).

Finance Director – Germany

Engineering

Package c. DM 300,000

Our client, a publicly quoted Group, is a highly successful British based multi-national with substantial interests in Europe and the USA. They now have a requirement for a Finance Director for one of their major subsidiaries operating in the west of Germany.

Reporting to the Managing Director, the person appointed will be a key member of the management team with overall responsibility for the total finance function, incorporating treasury and taxation requirements. An important element of the appointment will involve a thorough financial review of all of the subsidiary's operations, including reporting systems and procedures.

Candidates, probably aged 35 to 45, will be qualified accountants preferably with a degree or MBA and will have worked in a senior financial role with a major multi-national. An excellent working knowledge of the German language and of the country is essential, supported by strong leadership qualities and first class technical and interpersonal skills. A thorough understanding of acquisitions and their subsequent integration into new reporting systems is a prerequisite.

This is a high-profile appointment with a major industrial and engineering materials manufacturer. Career development potential is excellent.

Spreadsheets have come a long way in the last 10 years. The most significant development is the type of problem users are trying to solve with spreadsheets. Initially restricted to ad-hoc projects, the use of spreadsheets has now developed into more periodic work such as monthly or weekly reports planning re-forecasts and market share

Spreadsheet expert Neil Hudspeth, European Brand Manager at Lotus Development Europe, looks at ten years of spreadsheet milestones and discusses why the change in the use of the spreadsheet has dictated the need to re-invent it.

Lotus retains its place in the forefront of spreadsheet development. The Lotus 123 has been the world's best selling software package for over a decade Hudspeth reviews state-ofthe-art Lotus Improv - the reinvented spreadsheet - and highlights how it benefits today's

Neil Hudspeth will cover the following:

 Spreadsheet advances over 10 years Multipage spreadsheets

- Data access WYSIWYG

 The need for a radically different spreadsheet explained:
- Problems of viewing same data in different ways - Amending spreadsheets - Errors in spreadsheets

 An introduction to Lotus improv How it differs from traditional spreadsheets - dynamic views, multidimensional structure. item groups How it benefits the Finance Manager - easy presentation, fewer errors, more value Who should use it? - Does it replace Lotus 123?

Neil Hudspeth has over 10 years' experience in bringing the benefits of information technology to business managers and professionals. He has held a number of positions at Lotus including U.K. Product Manger for graphical spreadsheets and for cross planform spreadsheets.

Before joining Lotus, he held the position of Marketing Manager at Digital Equipment U.K. where he established a focus on solutions for the established a rocus on sournors for the accounting function. Previous positions include marketing and professional services roles at Comshare Ltd where he installed a number of budgeting. planning and reporting systems for

Merilock P.E. (Rubson Rhedes), London

RUSSIAN AND Ukrainian leaders gather for 11th hour talks in Moscow today to find a deal on debts and energy after Russia extended a deadline, which expired yesterday, for cutting off natural gas supplies

Mr Rem Vyakhirev, acting head of Gasprom, the state-owned gas monopoly said that the deliveries could be cut off as early as Sunday unless Ukraine paid world prices for 1bn cubic metres of gas it had received this year. The post-ponement of the threat is lesigned to allow for talks beginning today between Ukrainian prime minister, Mr Leonid Kuchma, and Mr Viktor Chernomyrdin, the former head of Gasprom and now prime minister of Russia.

Although various figures have been provided - ranging from the world price of \$85 per 1,000 cu m to Rbs26,000 (less than \$50 at present exchange

depending on which Russian official is talking) – it is not quite clear what world prices Russia wants to charge

Nor is it clear what Ukraine means when it counters that it will increase transit fees on Russian gas exports to western Europe, 85 per cent of which cross Ukraine. While Ukraine has quoted a transit fee of \$2.2 per 1,000 cu m, Russia says this is far higher than the world average. In an attempt to put western pressure to bear on Ukraine in turn, one Russian official said this week that Russia plans from March I to charge western customers for gas as delivered from the Russian-Ukrainian border. This would leave it up to western customers to bully Ukraine

into setting an acceptable transit price for their gas supplies. Interfax news agency said yesterday that Gasprom had received permission to sell 20 per cent of its shares to the public but that foreign inves-tors could account for no more

Russians meeting Espy today

than nine per cent of the com-pany's capital. Its articles of association as a joint-stock company are due to be regis-tered soon by the Justice Min-

istry.

• Mr Viktor Kress, the governor of Russia's Siberian Tomsk region, has made a plea for for-eign investors to help rejuvenate some 800 oil wells which would increase the western Siberian region's oil output by 2m tonnes a year to 14m. But a decision on whether to hold a tender for new oil-fields in the region has yet to be agreed between the region and the

authorities in Moscow. Meanwhile, attempts partly to privatise the region's Tomskneft production company have ground to a halt, the region's privatisation chief, Mr Alexander Petrov, said earlier this week. He said the stateowned enterprise's managers, who want more of the company for themselves and their workers, had gone to Moscow to lobby the federal govern-

to discuss grain debt defaults Russia and other former Soviet republics in difficulty with grain payments are seeking to expand the use of barter, according to the International Wheat Council, writes David Blackwell. Sales

have already been fixed under the US Export Enhance secretary of agriculture Mike Espy today to discuss Russia's Program (EEP) - mostly in exchange for cotton from Uzbekimounting grain debt defaults Australia, Canada, Finland and Turkey are thought to have and seek a solution to the credit crisis that has stalled US grain exports to the former

> However, with the exception of the US, the parties concerned are reluctant to reveal details of any possible arrangements" as they involve price exposure on both sides of a transaction. Traders need to cover themselves for commodities which they are unfamiliar with.

> international market at relatively low prices further complicates any attempts to expand barter trade, the IWC suggests.

Russian visit. Mr Nelson Denlinger, executive vice president of US Wheat Associates, said Mr Espy tried to dispel the notion that he had arrived at a solution to the Russian credit problem. "I don't think there are any simple solutions on the

table," Mr Denlinger said. For one thing, Mr Espy has said any plan would have to be co-ordinated through an 11 agency committee that includes the Treasury and the

In the meeting, the North American Export Grain Association proposed that the US form a fund to buy out Russia's bad loans and then place the country on a longer-term loan programme. The plan, alternatives in advance of the while allowing Russia to

held talks on barter deals, the IWC says in its latest grain market report. The Australians are believed to have been offered 40,000 tonnes of aluminium in exchange for wheat.

The fact that most commodities are in plentiful supply on the

resume grain purchases, would be expensive. It would also contrast sharply with US Department of Agriculture staff proposals that Russia be given direct food aid while allowing the credit arrears to mount.

"My reading of the [NAEGA] plan is, given current sentiment to cut programmes and reduce the deficit, that it would not fly [in Washington]," Mr Denlinger said.

arrears on US-backed grain loans. Bank claims against the defaults have begun to rise. To date, five banks, all of them foreign, have made claims totalling \$6.7m, and the USDA has paid out \$5.6m against those claims.

Aboriginal claim may threaten mine project

By Kevin Brown in Sydney

MIM HOLDINGS, the Australian resources group, is considering a potential claim by an aboriginal group for ownership of the site of its McArthur River lead/zinc/silver project in the Northern Territory.
MIM has received a letter

from the Northern Land Council an aboriginal advisory group, seeking consultations about the project on behalf of aborigines in the territory and in northern Queensland. This follows suggestions by the council that a legal claim for ownership of the land might be filed unless MIM agreed to provide jobs and compensation to aborigines claiming connection

MIM and a group of Japanese oint venturers received permission to develop the mine last year after complying with the environmental and planning regulations of the federal and territorial governments.

with the area.

However, the status of some mining rights has been thrown into doubt by a High Court decision last year that overthrew the legal doctrine that Australia was terra mulius, or unoccupied, when European settlement began in 1788. The decision created a form of "native title" applying to gov-ernment-owned land where aboriginal groups can to prove uninterrupted occupation or continuous close relationship.

A legal claim for ownership of McArthur River could delay development of the mine. which is 70 per cent owned by MIM. Nippon Mining and Metals owns 15 per cent, and Mit-sui, Mitsubishi Materials and Marubeni 5 per cent each.

The land council's action

angered the territory's government, which claimed that aboriginal and environmental opposition to mining has reduced investment proposals. Mr Shane Stone, mines and energy minister, said the threat of a land claim against McArthur River was "beyond the pale". He said the project was "too important to become another Coronation Hill" -- a gold project in the Northern Territory that was blocked in 1991 after the federal government accepted aboriginal claims that the site was sacred. The territory government did

islation. The federal Labor government and the conservative opposition have said that land claims should be resolved by negotiation.

federal race discrimination leg-

EC sets minimum fish import prices

By David Gardner in Brussels

THE EUROPEAN Commission last night set minimum import prices on white fish, but warned that tougher measures would be taken if this did not stem the flood of cheap imports coming into the EC and driving down prices.
The minimum prices will

apply to cod, haddock, whiting and monkfish until the end of June, and are based on the reference prices normally used to monitor the EC fish market. They are unlikely, therefore, to restore fully the 15 to 30 per cent drop in white fish prices caused by this year's import surge, because prices were

because of the community's industry's own structural problems and a fall in consumption because of recession.

The move follows a vigorous campaign by Breton fishermen, who on Tuesday partly destroyed the Paris fish market at Rungis. It has as its main

drifting downwards anyway

target Russian imports, as well as fish from Iceland, Norway and Poland. "This decision should allow

Mr Charles Josselin, the French maritime affairs minister, will today hold a meeting with the French fishing association in Rennes to discuss the European Commission's proposals for a minimum fish pricing system, writes Alice

Rawsthorn in Paris. The news of the meeting followed renewed lemonstrations from fishermen in the Brittany and Vendée. The fishermen who have, for the past fortnight, been protesting against the recent rise in cheap fish imports into France culminating in the ransacking on Tuesday of the Rungis fish market near Paris.

staged a demonstration in Brussels outside the building where European Community fishing

us to correct the disturbances caused by imports from third countries at extraordinarily was no longer practicable in the EC's border-free internal low prices," said Mr Ioannis Paleokrassas, the EC's environment and fisheries commismarket.

warned that if the situation was not stabilised quickly, the community could resort to an embargo on imports.

French fishing interests had also called for action to correct

the minimum import regime to three months, instead of the six months called for by Brussels and the four months finally agreed.

 Belgium may challenge the EC banana import regime through an appeal to the European Court of Justice, Prime Minister Jean-Luc Dehaenc's office said, Reuter reports from Brussels. In a statement issued after a cabinet meeting, the government said it was consid-ering measures to counter the

Gatt expects beef export fall to continue

WORLD BEEF exports fell by 2 to 3 per cent in 1992 and a similar decline is likely in 1993, the General Agreement on Tar-iffs and Trade says in a report published today.

In its annual review of international meat markets, Gatt highlights a continuing slump in European Community beef exports, which now account for about a quarter of the world total. The EC itself is predicting a drop of 22 per cent in beef exports this year after a 12 per cent fall in 1992. Despite lower production, EC beef stocks ended 1992 at record levels of

about 1m tonnes. Australia has regained the top spot among the world's beef exporters from the EC.

which is followed by the US in third place, New Zealand and Brazil. Argentina's shipments plunged nearly 30 per cent last year because of to rising production costs and the strong

currency.
"Major changes in world market shares are likely in 1993," the report says, predicting fresh gains by the US and Brazil at the expense of the EC and New Zealand.

World beef and veal production is estimated to have declined by about 1 per ceut in 1992, largely because of lower output in the BC, central Europe and the Common-wealth of Independent States. Gatt expects a further 1 to 2 per cent slide in 1993, mostly the result of falling EC produc-

The Gatt report says pros-

pects for the international beef market are clouded by the uncertain economic outlook and changing diets. In many countries consumers have switched to cheaper poultry meat, which now represents a quarter of world meat produc-

In the US, per capita consumption of poultry meat, at 43 kg the highest in the world, roughly equalled that of beef for the first time last year. In the EC, beef consumption stagnated or fell in all countries except for Spain and Por-

Import demand is set to rise substantially in Japan and other East Asian countries, especially South Korea, but elsewhere will remain sluggish, Gatt savs.

EC exports in particular are

being hit by falling demand from the Commonwealth of Independent States.

Gatt expects beef prices to weaken further in the US but to remain firm in East Asia and to strengthen in Europe as a result of lower EC production and a possible rise in beef demand in central Europe and

the CIS. Gatt's Arrangement on Bovine Meat, designed to expand and liberalise world meat trade, has 27 members (the EC counting as one) which account for about 90 per cent of world beef exports and about 60 per cent of consumption and production. International Markets for Meat

1992-93, available from Gatt, Centre William-Rappard, rue de Lausanne 154, 1211 Geneva 21.

Gold jewellery demand riding high

WIDESPREAD RECESSION has failed to dent world demand for gold jewellery, according to the World Gold Council, the promotional organisation supported by proto overcome the provisions of a record 2,400 tonnes last year,

14 per cent up on 1991. The council estimates that total identified worldwide demand for gold in jewellery, investments and industrial uses rose by 9 per cent to 3,057 tonnes - "a striking increase

WORLD COMMODITIES PRICES

m, 99.7% purity (5 per tonne

1195.5-6.5 1217.5-8

in a year where 600 tonnes of official gold was sold by Belgium and Dutch central banks".

The driving forces behind the increase in jewellery demand have been the Middle and Far Eastern markets. by 33 per cent to 654 tonnes. Chinese demand for pure gold jewellery, known as Chuk Kam, rose by 47 per cent to 250 tonnes. However, Far Eastern demand for bar and coins was

41 per cent down at 51 tonnes.

(Prices supplied by Amalgamstad Metal Trading)

In the developed world, trade

purchases of jewellery eased by 1 per cent, with Japan showing a fall of 17 per cent to 104.5 tonnes and the US registering a rise of 5 per cent to 230.6

Mr Roger Murphy, of the council's economics service, figures were based on identified demand, adding that there was probably substantial unidentified demand. He expects to see "a continued movement of gold from West to East and with it a steady rise in demand through 1993".

Tailings plant to boost Chilean copper output

CHILE COPPER Corporation's (Codelco) Chuquicamata, the world's largest copper mine, which should boost output by 50,000 tonnes a year, reports Reuter from Santiago. A new tailings plant came on line yes terday and will reach full capacity by the end of March. Processing tailings, which have accumulated for decades. is one of Codelco's most lucrative projects, according chair-man Alejandro Noemi.

MARKET REPORT

NICKEL fell sharply on the London Metal Exchange yesterday as support levels gave way, triggering sell stops and liquidation. Three-month metal fell through the \$6,200-a-tonne level - an area where support has held solid in recent days - and slid rapidly down. The decline occurred against a background of steep losses in other metals, notably COPPER and ZINC. Also, there were no fundamental reasons for nickel to be immune from the general weakness now affecting base metals, dealers said.

THE UK SERIES

By Terry Byland, UK Stock Market Editor

ish import pg

養養2月11日 1995年

THE LONDON stock market was broadly satisfied with the ICI statement confirming plans for its demerger, and relieved to hear that the planned £1.3bn rights issue call from Zeneca, the proposed new corporate holder of the pharmaceutical and bio-technology interests, will not arrive until June. Encouraged by a recovery of around 6.6 per cent in ICI shares, the equity market turned firmer, although investors were still restrained by the prospect of further rights issues and profits statements from leading companies.

Outside ICI, which made up almost 2 per cent of market activity yesterday, there were few salient features. Trading results from Shell and from British Gas contained no surprises for the stock market and neither share moved far from overnight levels. The heavy job losses foreshadowed by both ICI and British Gas did nothing to lift the shadow cast by the recession in the UK economy, but merely tended to confirm the view that economic recov-

ery is still some way ahead. Equity trading was influ-enced from the market opening by the looming statement from the ICI boardroom. Shares in the blue chip chemical group had been bought heavily by US

on the previous evening, and this development had left UK marketmakers dangerously short of stock; ICL and the market, rose sharply in the first half hour of official trading, help along by activity in ICI traded options.

The early gain of 12 points on the Footsie scale was soon reversed to a fall of 7.6, however, as traders grappled with the heavy flow of corporate

statements. The market then recovered steadily, encouraged as the time for Wall Street's opening drew near, by traders' awareness that renewed US demand for ICI shares was in the offing.

TRADING VOLUME IN MAJOR STOCKS

2,850 this week. Second line stocks drifted off At the close, the FT-SE Index as market attention focused on was just below the day's best at 2,828.7, a net gain of 11.7 the day's list of announcements from the blue chip list. points, with ICI effectively At 3,029.5, the FT-SE Mid 250 responsible for about 3.19 of Index shed 0.4. months

FT-SE

There were signs that investors were willing to turn away from the defensive sectors which have returned to fashion as rights issue fears have unsettled confidence for the near-term outlook for equities. Utility stocks gave back some of their recent gains.

However, financial stocks looked steadier as the market absorbed this week's disclosure of higher debt provisions at National Westminster. Store issues, weakened recently by realisation that further interest rate cuts may have to await the Budget speech from the UK chancellor of the exchequer, moved higher. Selected buying of store shares from the US, a somewhat rare occurrence, was

ICI wins brokers' approval

THE ANNOUNCEMENT by ICI of a £1.3bn rights issue to fund the demerger of its pharmaceuticals and chemicals divisions was followed, perhaps surprisingly, by a 6.5 per cent jump in the share price. This represented the sharpest rise in the FT-SE 100 index list and one of the biggest in the London mar-ket. The last time the shares saw a similar price hike and trading volume was in July 1992, when ICI first announced its intention to create Zeneca as a separate pharmaceuticals

The initial announcement of a pre-tax loss of £384m and the need to cut 9,000 jobs was not encouraging and the shares moved up by less than 10p, in spite of short covering by London brokers. However, at a packed meeting with analysts the company announced that barring unforeseen circumstances it would hold its traditional 55p dividend after the

Analysts returned to examine the yield on the stock and decided that a fair share price was about 1,200p. Mr Jeremy Chantry of Kleinwort Benson is looking for a combined share price "north of 1200" and Mr

Charles Lambert of Smith New Court, who has taken a bearish view of the group's prospects, also took a less gloomy attitude. Some analysts felt that, with the dividend guaranteed, the shares are now virtually as secure as gitts and at a better

return. The shares raced ahead to close 701/2 up at 11521/4 - but still lower than they were immediately after the original Zeneca announcement - on turnover of 13m. By the time the UK market had closed a further 2m shares had been traded on Wall Street and the share price there had reached the equivalent of 1,162p. A further 3m shares changed hands in the form of traded options.

Hartstone tumbles

Leather and hosiery group Hartstone fell by 27 to 223p. leaving the stock one of the biggest casualties in the London market, as rumours that the company broker had cut forecasts were confirmed.

Ms Julia Blake, textile analyst with BZW, reduced her 1993 estimate by £4.5m to £32.5m on the basis of a severe downturn in the European hosiery market. "There is serious overcapacity in the area and, although the company is still generating profits there, margins have been squeezed," she said.

The stock has been very volatile recently with the downgrade message competing with bid talk. Mr David Gratton, the company finance director said yesterday: "Unfortunately this is not the first time we have suffered from rumours - I am not aware that we are about to be taken over."

Property hopes

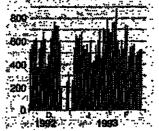

There were further positive comments on the commercial property market, with Smith New Court detecting a slow revival in its latest report. Like NatWest Securities, which came to similar conclusions earlier this week, Smith suggests that net asset values are at present taking second place to cash flow in analysts' judg-

ment of property stocks. The broker recommends Slough Estates, off a penny at 186p, MEPC, steady at 370p, and along with NatWest, British Land, 6 forward at 232p. In second liners, both brokers prefer Allied London Properties, steady at 55p, and Frogmore Estates, also unchanged at

Barclays Bank shares were given a mid-morning mauling. sliding to 414p at one point after a flurry of selling triggered by rumours that the bank had been summoned to the Bank of England because of concerns over its loan book. A denial of the story brought a swift rally in the shares which ended the session only 4 easier at 420p. Turnover was an unre-markable 7m. Along with the rest if the sector, Barclays shares have come under pres-sure since NatWest published disappointing bad debt figures on Tuesday. Barclays' prelimFT-A All-Share Index

MONEY MARKETS

Sterling futures recover

SHORT-DATED sterling futures bounced sharply yesterday after the pound staged a mild recovery against the D-Mark on the foreign exchanges, writes James Blitz. Throughout the week, the March contract has been steadily bid down to yester-day's low of 93.91 as dealers continue to assume that the

pound's weakness eliminates any chance of a cut in UK base

UK clearing bank hate leading rate 6 per cent from January 28, 1993 The March contract recovered

yesterday to close at 94.01, partly reflecting sterling's rise above the the historic lows that were reached in foreign exchange trading on

One London-based dealer said that it would be hard to push the contract below 93.75, because dealers buying the contract below this level would be assuming some tightening of monetary policy by the middle of next month.

However, another dealer suggested that the contract could easily move 50 basis points either way in the next few weeks. "The pound is so weak that you cannot exclude the possibility that base rates will rise in the next few weeks," he said.

Dealing in the cash market was relatively quiet and 3-month money again closed at around 6% per cent. However, a very large shortage is expected today and, according to one dealer, "it could be

pretty nasty."
With the end of the month approaching, liquidity conditions in money markets are always tight.

However, one dealer said that a large number of bills are due to be drawn by corporates and institutions today, and the discount houses will have plenty to offer the Bank of England. However, if the shortage is very large, the Bank may be under pressure to offer a shorter-dated repurchase to ease conditions.

European interest rate markets were quiet. German call money rose sharply to over · 9 per cent yesterday after the Bundesbank drew a large amount of liquidity in its weekly money market operations on Wednesday. However, the Bundesbank's move was only technical, designed to ease the transfer to

easier reserve requirements after this weekend. The March Euromark contract closed 5 basis points higher at 91.88. The steady drip-drip of the March French franc contract continued: it closed at 88.13, down 5 basis points on the day.

Drug stocks fail to maintain recovery

Wall Street

BIG board stocks moved lower yesterday morning, but the Nasdaq market held its ground in spite of a sell-off in biotechnology issues, writes Karen Zagor in New York At 1 pm the Dow Jones

industrial Average was 8.38 lower at 3.348.12. The more broadly based Stan-dard & Poor's 500 was off 0.43 at 440.44, while the Amex composite gained 0.84 at 404.25, and the Nasdaq composite added 2.22 to 664.68. Trading volume on the NYSE was 148.5m shares by 1 pm, and rises outnumbered declines by 918 to

The mixed tone of the market reflected continuing investor uneasiness about the Clinton administration's economic

Drug company stocks, which recovered lost ground at midweek, once more turned lower yesterday morning. Merck was off \$1/4 at \$38%, Bristol-Myers Squibb lost \$% to \$57%, Pfizer eased \$1/4 to \$57% and Glaxo Holdings ADRs fell \$% to

Among active NYSE stocks, Philip Morris dropped \$1 1/2 to \$65 1/4, Chrysler firmed \$1/4 to \$38%, Bastman Kodak rose \$1% to \$52% and AT&T

slipped \$% to \$55%.
Office Depot climbed \$1% to \$30% after Merrill Lynch

market's industry index -

Royal Dutch results depress chemicals

FEBRUARY inflation numbers from three of western Ger-many's four largest states economists but neither this. nor a flat beginning for the Dow on Wall Street did more than moderate a good rise for the Eurotrack 100 constituents, writes Our Markets Staff.

AMSTERDAM was weaker in

chemicals following results from Royal Dutch which featured a disappointing performance in that division. While Royal Dutch showed a slight 20 cent gain on the day to Fl 154.20, DSM slipped Fl 1.70 to F171.80 and Akzo F12.10 to Fl 147.80. The CBS Tendency index was unchanced on the day at 99.8.

Mr Marcel Bokhove, analyst with ABN-Amro in Amsterdam, commented that fourth quarter earnings for Royal Dutch came in better than expected, although mainly due to high currency exchange gains and less extraordinary losses. However, the chemical division's loss of £182m against £85m in the same 1991 period further illustrated the lepressed state of the sector.

Unilever remained solid following its results earlier this week, closing at another record high, up FI 2.50 at FI 205.10, while Heineken put on F1420 or 2.4 per cent at F1 181.20, partly on expectations of good VNU also rose to an intraday

high of FI 108 before closing 80 cents up at F1 107.30 as rumours continued that it was to sell the majority stake in its FRANKFURT recovered after

two days of losses, the DAX index closing 14.67 higher at 1.658.91. Financials maintained their relative strength, led by a DM10 gain to DM693 for De sche Bank, and one of DM24 to DM2,235 for Allianz, Turnover fell from DM7.4hn

to DM5.4bn. Carmakers recovered some of their recent es, with Volkswagen exceptionally strong as it put on DM5.40 to DM276.70. Chemicals were mixed with Bayer recovering from pressure asso with its pharmaceuticals interests, rising DM3.20 to DM270.70. But Hoechst eased 60 pfg to DM258.70 following an explosion at one of its chemical plants in a Frankfurt suburb

MILAN was again alive with rumours and Fiat rose a further 8 per cent after a newspaper report that Renault was to buy a 40 per cent stake in the Italian group's core car and

Sumitomo Electric gained Y25

to Y905 and Fujikura advanced

Y10 to Y528.

> truck business. The Comit index rose 4.05 to 506.80, also lifted by indications. that the privatisation programme might soon move

ahead after news that Iri had set criteria for the sale of Sme. the food group, which would protect the rights of minority shareholders. Fiat shares fixed L262 higher

L5,780 and continued up to L5,980 after hours, in spite of denials of the report from Renault and Fiat. Mr Matteo Amoretti, of

Albertini in Milan said it was the detailed nature of the newspaper report - which indicated that an announcement would come between March 10-13 and even suggested a price - that had sparked the renewed buying. However, he doubted whether

four-wheel drive vehicles, clos-ing Pta42, or 15 per cent higher at Pta324 after a Nomura buy recommendation which said that new model introductions will allow NMI to double its current revenues by 1994. The general index rose just 0.10 to 22R.00. STOCKHOLM was stronger

foliowing recent weakness as the Affärsvärlden general index gained 11.4 to 989.2 in turnover down to SKr973m from SKr1bu.

SKF, which said that it would pay no dividend on its 🥢 1992 results, the first time in 70 years, was unchanged in the B shares at SKr76.50.

ment-backed investment in Astra recovered some of this production capacity in week's losses although the southern Italy and the former announcement that the finance director was to resign did remove part of the gains and the B's finished SKr11 higher day's gains with the CAC-40 index down 8.75 at 1,944.64 in at SKr661.

COPENHAGEN saw a late rush to sell the March index future, and the KFX index fell 0.94 to 82.08. Den Danske Bank fluctuated after announcing a DKr1.74bn net loss, closing DKr7.50 lower at DKr290.50.

TEL AVIV recovered from a fall of more than 4 per cent on Tuesday with a gain in the
